

2025 STANSW Young Scientist Awards

Penelope Prangell Presbyterian Ladies' College Sydney

Project Title: Colour Me Distracted

Year 3 to 4 **Scientific Investigations**

Dear Penelope,

Well done on being part of this year's Young Scientist Awards! Your project shows how much you've learned about exploring real questions, solving problems, and discovering how things work. Completing your project means you've joined other young innovators in testing ideas, trying new approaches, and learning from what you find.

Our judges were impressed by your curiosity, creativity, and effort. They've written some feedback to help you see what went really well and what you might try next time. Every project helps you use and grow the skills and strengths you already have as a STEM problem-solver.

The strengths of your project include:

- critically evaluating your investigation, identifying areas of strengths and weaknesses
- recording the development and implementation of your ideas in your log book

Next time, you could make your project even better by:

- designing a procedure incorporating fair testing

Thank you for sharing your work with us. We hope this experience inspires you to keep asking questions, exploring new ideas, and using your skills to make and discover amazing things. We hope to see more submissions from you in the years ahead!

A handwritten signature in black ink that reads 'Philippa Miller'.
