

2025 STANSW Young Scientist Awards

Xiaofan Jia Presbyterian Ladies' College Sydney

Project Title: An Investigation Into The Role Of Native Australian Plants In Providing Protection Against UV Radiation

Year 9 to 10 Scientific Investigations - Biology

Dear Xiaofan,

Congratulations on being part of this year's Young Scientist Awards and for the thought, care, and originality you brought to your project. You've demonstrated genuine initiative in designing and carrying out your own ideas – an achievement that reflects both curiosity and persistence.

Our judges reviewed your project in detail, considering how clearly you explored your question, how well you supported your conclusions, and how effectively you communicated your process. Their feedback below highlights the aspects that were particularly strong and offers suggestions to help you extend your thinking even further – much like the peer review process used in professional research.

The strengths of your project include:

- carefully assessing the risks involved
- observing patterns in the data collected

Next time, you could make your project even better by:

- reaching a carefully constructed conclusion that links to your original hypothesis

Thank you for sharing your work with us, it is a testament to your growing capability as an investigator, communicator, and creative thinker. We hope this experience strengthens your confidence and inspires you to keep pursuing questions that matter to you..
