

2025 STANSW Young Scientist Awards

Livia Lin James Ruse Agricultural High School

Project Title: Comparing Dupilumab And Tacrolimus As Non-Steroid Options For Treating Atopic Dermatitis To Address Topical Steroid Withdrawal

Year 11 to 12 Scientific Investigations - Biology

Dear Livia,

Congratulations on being part of this year's Young Scientist Awards and for the thought, care, and originality you brought to your project. You've demonstrated genuine initiative in designing and carrying out your own ideas – an achievement that reflects both curiosity and persistence.

Our judges reviewed your project in detail, considering how clearly you explored your question, how well you supported your conclusions, and how effectively you communicated your process. Their feedback below highlights the aspects that were particularly strong and offers suggestions to help you extend your thinking even further – much like the peer review process used in professional research.

The strengths of your project include:

- critically evaluating your investigation, identifying areas of strengths and weaknesses
- providing evidence of critical thinking in your discussions and conclusions

Next time, you could make your project even better by:

- incorporating an informative introduction that effectively contextualises the subject of your investigation

Thank you for sharing your work with us, it is a testament to your growing capability as an investigator, communicator, and creative thinker. We hope this experience strengthens your confidence and inspires you to keep pursuing questions that matter to you..

A handwritten signature in black ink, reading 'Philippa Miller'.
