

2025 STANSW Young Scientist Awards

Owen Sutcliffe Barrenjoey High School

Project Title: Impact Of Production System And Storage Temperature On The Development Of Botrytis Cinerea In Strawberries

Year 11 to 12 Scientific Investigations - Chemistry

Dear Owen,

Congratulations on being part of this year's Young Scientist Awards and for the thought, care, and originality you brought to your project. You've demonstrated genuine initiative in designing and carrying out your own ideas – an achievement that reflects both curiosity and persistence.

Our judges reviewed your project in detail, considering how clearly you explored your question, how well you supported your conclusions, and how effectively you communicated your process. Their feedback below highlights the aspects that were particularly strong and offers suggestions to help you extend your thinking even further – much like the peer review process used in professional research.

The strengths of your project include:

- providing evidence of critical thinking to synthesise information and to argue the merits of conclusions
- identifying dependent and independent variables and regulating the control of the appropriate variables

Next time, you could make your project even better by:

- having a larger sample size providing greater reliability of results

Thank you for sharing your work with us, it is a testament to your growing capability as an investigator, communicator, and creative thinker. We hope this experience strengthens your confidence and inspires you to keep pursuing questions that matter to you..
