

2025 STANSW Young Scientist Awards

Jaimee Tandang Pacific Online Christian School

Project Title: Comparing The Effect Of Musa Acuminata Peel Extract With Chloramphenicol
On The Growth Of Staphylococcus Epidermidis

Year 11 to 12 Scientific Investigations - Biology

Dear Jaimee,

Congratulations on being part of this year's Young Scientist Awards and for the thought, care, and originality you brought to your project. You've demonstrated genuine initiative in designing and carrying out your own ideas – an achievement that reflects both curiosity and persistence.

Our judges reviewed your project in detail, considering how clearly you explored your question, how well you supported your conclusions, and how effectively you communicated your process. Their feedback below highlights the aspects that were particularly strong and offers suggestions to help you extend your thinking even further – much like the peer review process used in professional research.

The strengths of your project include:

- comprehensively recording each stage of your investigation in your log book
- effectively organising your data into tables and graphs

Next time, you could make your project even better by:

- adopting a fresh approach to a common problem

Thank you for sharing your work with us, it is a testament to your growing capability as an investigator, communicator, and creative thinker. We hope this experience strengthens your confidence and inspires you to keep pursuing questions that matter to you..
