Lava Orange

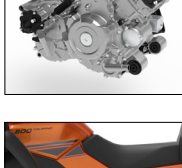

True Timber Camo

800cc displacement **75 hp at 7500 rpm** **52 lb-ft peak torque** **959 lb weight**

HIGHLIGHTS AND FEATURES

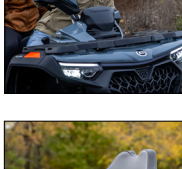

Precision Power—Enhanced Throttle Control

The all-new CFMOTO 800cc engine delivers 75 hp and 52 lb-ft of torque. Ride-by-wire technology delivers smoother and more refined throttle input, ensuring precision control and responsive power. Choose between three ride modes—work, normal, sport—to match the engine's character with your riding preference.

All-New CVT Transmission

CFMOTO's in-house designed and manufactured continuously variable transmission (CVT) is built to withstand the rigors of intense use, ensuring longevity and peak performance. Not just stronger, it's also lighter and more durable. These improvements mean it can handle more torque and stress, translating to a transmission that delivers exceptionally smooth and dependable performance, especially under punishing conditions.

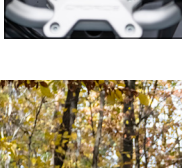

Advanced Rider Electronics

Rider electronics enhance control, increase safety, and reduce fatigue. The centerpiece is the Dynamic Downhill Assist, a selectable feature that intelligently manages engine braking for a stable descent. Electronic Power Steering (EPS) further refines your ride, offering four selectable modes that respond to speed and steering input, ensuring precise assistance at low speeds and firmer feedback on challenging terrain. Every element is synchronized for optimal control, putting mastery of the machine and the terrain firmly in your hands.

Sculpted 2-Up Seating

Share the thrill of the trail with a passenger as you both enjoy the spacious and ergonomically designed seating that ensures a comfortable journey, no matter how long the ride.

State-of-the-Art Tech Package

Stay seamlessly connected and in command of your journey with the cutting-edge tech package featuring a 7" TFT display. This intuitive interface keeps you informed, and offers Bluetooth phone connectivity and music controls. With real-time vehicle monitoring, every element of your ATV's performance is at your fingertips, ensuring a fully informed and confidence-inspiring ride.

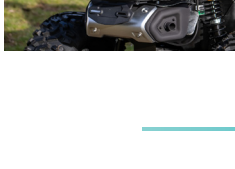

SPECIFICATIONS

Colors	Tundra Grey, Lava Orange, True Timber Camo

ACCESSORIES

ABOUT CFMOTO

CFMOTO was founded in 1989 as an engine manufacturer and quickly transitioned to engineering and building its own engines. It has always held a significant presence in China's domestic market including supplying government vehicles for police and fire while developing a name for itself as a manufacturer of reliable, feature-rich engines, parts, ATVs, side-by-sides, scooters, and motorcycles worldwide.

CFMOTO brought ATVs and side-by-sides to the US in 2002 and offered select scooters and motorcycles in the US in the 2000s. 2007 marked the establishment of CFMOTO USA's headquarters in Plymouth, Minnesota, and since then, CFMOTO USA has worked alongside CFMOTO's corporate headquarters in China to develop and improve their vehicle lines for the American market. In this time, CFMOTO has solidified itself as a competitive force in the US off-road market with over 570 off-road dealers to date and big plans for future model development.

In April 2022, CFMOTO USA was proud to launch a new line of 7 motorcycles to the US market and added an additional 3 models for 2023. Many of these models have already solidified their global presence in Europe, Australia, and Asia. CFMOTO now has more than 300 dealerships and counting nationwide that carry their two-wheel products.

CFMOTO USA recently completed building a new, significantly larger US headquarters to support the company's future ventures. The headquarters features full sales, marketing, vehicle development, design, parts and accessories, tech support, and domestic shipping and receiving departments. CFMOTO vehicle lines are currently manufactured in Thailand, China, and Mexico alongside other major global motorsports names.
