Item:	TB246.1
Description:	Triumph Diagnostic Tool - Smart Scan Model Selection Care Point
Model Affected:	Rocket 3 GT Evel Knievel Edition, Rocket 3 R Evel Knievel Edition, Rocket 3 Storm GT, Rocket 3 Storm R

We would like to remind dealers to pay special attention to the Model Selection screen when performing a diagnostic tool Smart Scan on the above models.

Background

Calibrations for Rocket 3 GT Evel Knievel LE and Rocket 3 R Evel Knievel LE models will be available to download from the Triumph Diagnostic Tool 2024-13 update onwards. These will include special instrument calibrations which activate the Evel Knievel Limited Edition instrument splash screen.

When performing a Smart Scan on the above models, the SELECT MODEL screen may display a list of models containing both Rocket 3 Storm and Rocket 3 Evel Knievel Limited Edition models.

Instructions

NOTICE

Selecting an incorrect model on the Smart Scan Model Selection Screen can lead to an incorrect instrument calibration being downloaded to the motorcycle.

This could result in:

- Deactivation of the Evel Knievel instrument splash screen on a Rocket 3 Evel Knievel Limited Edition model.
- Incorrect activation of the Evel Knievel instrument splash screen on a Rocket 3 Storm model.

To prevent customer dissatisfaction, dealers must take care when selecting the model on the Smart Scan Model Selection screen.

1. When the SELECT MODEL screen is displayed, use the scroll bar on the right hand side of the screen to view all models listed.
2. When selecting a model, always make sure that you select the correct model and market variant for the connected motorcycle.
 - Always ensure a Rocket 3 Storm model is selected when connected to a Rocket 3 Storm Model.
 - Always ensure a Rocket 3 Evel Knievel model is selected when connected to a Rocket 3 Evel Knievel Limited Edition Model.
