As a token of appreciation for the lake's role in its success, some 100 employees from Yamaha's marine business will be joining forces with local employees at an annual cleanup event to clean up the lake and protect its natural environment. ===== A better life for everyone is at stake, as changing the water will inevitably change lives. The local water station is bustling with activity today, filled with the sound of laughter and conversation. This lively atmosphere serves as a stark contrast to the typical emptiness of weekdays at this marina. In Japan's coastal town of Hayama, six sailors and their instructor are all that remain on this weekday, their presence fueled by ambition. They're part of the Yamaha Sailing Team 'Revs', competing in internationally-certified 470 Class sailing dinghies, their sights set on a single goal - 2020. Meanwhile, Yamaha Training Schools (YTS) aim to provide opportunities for young people in India who lack the means to study or receive vocational training. These schools offer certified motorcycle technician training and are being introduced throughout the country, with students from diverse backgrounds dedicating daily trips to their education. We met a young man in his late teens at one of these YTS locations, learning to become a skilled mechanic to support himself and his family. His determination is palpable as he strives to help his younger brother attend school and secure a better life for his parents. In Mongolia, 400 rangers work tirelessly to protect the country's 99 national parks from poachers and illegal campers. Utilizing Yamaha AG200s, they patrol vast wilderness areas on small utility motorcycles. A visit to Lake Hovsgol provided an opportunity to witness these efforts firsthand. The Glamis Dunes in California offer a paradise for off-road enthusiasts, with weekends and holidays transforming into lively gatherings of families and friends. This scene echoes the pioneering spirit of the American West, where adventure, fun, and close bonds were forged over a century ago. A new boatbuilding factory in Mauritania has begun production on long-awaited fishing boats, sparking hope for the region's development. A Japanese veteran engineer is instructing factory employees, imparting construction expertise while showcasing his passion for the craft. 14 MINUTES // FIRST AIRED DATE 06/22/18 Moving You Volume 11: Make the Wind Your Ally 14 MINUTES // FIRST AIRED DATE 12/27/17 Moving You Volume 10: Skill India - Schools for India's Dreamers 12 MINUTES // FIRST AIRED DATE 04/16/17 Moving You Volume 9: Northern Mongolia's Durable Duo 10 MINUTES // FIRST AIRED DATE 09/10/14 Moving You Volume 7: Made in Mauritania 27 MINUTES // FIRST AIRED DATE 05/28/14 Moving You Volume 6: Supporting Lives and Livelihoods of Peoples of the Far NorthSnowmobiles brought life-changing products to northern peoples, while a Yamaha engineer perfected his craft for world-class motorcycle racing. ===== A recent Yamaha dealership in a city north of the Arctic Circle is changing lives. However, they need Yamaha products and service that only Yamaha can provide. They are very lucky to have found the right person who understands their needs and wants to help them. His name is Yamaha man, but his work is not about selling bikes, it's about supplying life-saving machines. But there's something much bigger going on here. Motorcycle racing is where riders compete all-out for victory and engineers pour all of their intellect into perfecting a single machine. A special engineer is responsible for making sure Valentino Rossi can put his legendary riding ability to work in its entirety. He spends hours analyzing huge amounts of data to create the perfect engine control systems. In other places, police officers need training too. They are expert motorcycle riders, but they still have to learn new skills. A veteran Yamaha Riding Academy instructor is helping them become better protectors of the peace. His name is Hidenobu Toh, and he's very good at teaching. For some people, being a mechanic is their pride and joy. The "Yamaha World Technician Grand Prix" brings together 28 mechanics from all over the world to compete for the title of "World's No. 1 Yamaha Mechanic". It was won by Mr. Thorsten Brand from Germany in the Sport Model Class and Mr. Le Truong Qui Tu from Vietnam in the Commuter/Business Model Class. But there are also schools where children can learn sailing, and even adventure sports like rafting and canoeing. The "Junior Yacht School Hayama" is one such place where kids spend their summer vacation learning to sail and develop new skills. They go on trips to nature and learn about danger and fear, but they also learn self-reliance and cooperation. In some parts of Africa, people are working hard to change lives. A small village near the Mauritanian border has a simple Yamaha Clean Water System that's bringing clean water to their community. The villagers formed a committee to manage the water supply, and now everyone can drink from a safe well,securing a daily supply of fresh potable water as a result has been a significant achievement for our community. ===== The HARMO electric outboard system's latest updates will be shared with subscribers, ensuring they are among the first to know about new sustainable technologies from Yamaha.
