Full stack developer well-versed in web technologies: Ruby on Rails, JavaScript, React, HTML, CSS, Shopify, and WordPress. Has guided projects from ideation to deployment. Extensive experience in management, client service, and technical sales.

## EXPERIENCE

### The Good Doctor App

Developer • Dec 2016 - Current • Los Angeles, CA

I created the wireframes, helped with the business plan, and developed the prototype, which was written in React Native.

### Climate Cents

Developer • Feb 2016 - Current • Santa Monica, CA

I initially maintained the legacy WordPress site. Later, I created a new site in Ruby on Rails utilizing PostgreSQL, Stripe integration for donation processing, Bootstrap, JavaScript, HTML5, SASS, JavaScript, and jQuery.

### GameTree

Intern • Jun 2016 - Oct 2016 • San Francisco, CA

I was a remote developer that provided QA as well as code commits for a Myers-Briggs assessment and assisted in creating the landing page for app using Meteor.js and MongoDB.

### Extenda Communications

CEO • Oct 2005 - May 2015 • Van Nuys, CA

I wrote the company website and wiki in PHP, HTML, and CSS. Exposure to XML, network protocols and troubleshooting, Linux, XML, and VMware.

## FREELANCE PROJECTS

### Literally Magick

Developer • Eagle Rock, CA

Designed and implemented a Shopify ecommerce site, utilizing JavaScript, jQuery, SASS/CSS, HTML, Ruby and Liquid templating engine.

### Endeavor Awards

Developer • Santa Monica, CA

Maintain and modify WordPress site, utilizing PHP, JavaScript, jQuery, CSS, HTML
