When you work in the cold, you need to know if your gear will keep you warm enough. Many of our products, from jackets to boots, have Comfort Ratings to help you figure out what would work best in your environment. We test our products in a range of conditions to find the Comfort Ratings, so you know what you can expect for warmth.

**PLEASE REMEMBER THAT COMFORT RATINGS ARE ONLY GUIDELINES.**

What you do in the cold has a huge impact on how warm you are. The more active you are, the less insulation you need, because you generate your own warmth. If you aren’t as active, the temps might feel colder than they actually are. Each person’s unique circulation, metabolism and physical characteristics are also a factor, so bear that in mind when selecting products based on Comfort Rating.
THROUGHOUT THE CATALOG, YOU WILL NOTICE ICONS NEXT TO PRODUCTS. THESE ICONS INDICATE DIFFERENT FEATURES FOR OUR PRODUCTS, FROM ANSI COMPLIANCE TO USING RECYCLED MATERIALS. THE LIST BELOW DETAILS WHAT EACH ICON MEANS.

- 2960 54 GOLD GLOVE | PAGE 99
- 2800 HEATED GLOVE WITH RECHARGEABLE BATTERY | PAGE 98
- 2800 FREEZER EDGE® GLOVE | PAGE 102
The cold can’t tell you to stay at home. The RefrigiWear® Extreme Collection offers warmth like you’ve never experienced, with comfort ratings down to -60°F. You won’t find anything warmer or tougher to tackle conditions that make most people run for cover. Extreme is the best of the best to help you Master the Cold®.
The Extreme Hooded Jacket’s hood has a curved design to reduce impact on peripheral vision. It can also be fully detached for added safety. See refrigiwear.com/hoods for more info on headwear vs hoods.

Need to cool off just a little when working hard? Open the under-arm zipper to reveal a mesh ventilation patch and let air in so you don’t overheat. When the cold starts to creep in, zip it closed again.

8750
EXTREME HOODED JACKET

- Over 600g insulating power, including 200g AirBlaze™ polyester insulation
- Soft 100% polyester shell
- Water-repellent, wind-tight finish

54 GOLD
WARM WORKERS WORK WONDERS

Your team is the best there is. So give them the best to get the job done. We've been keeping teams warm since 1954, so we know what it means to be the Gold Standard. With AirBlaze™ insulation to keep garments lightweight but warm, Performance-Flex to improve movement and designs inspired by our original Iron-Tuff® freezer suits, 54 Gold is the right gear for freezing jobs.

AIRBLAZE™ INSULATION
All the warmth but 40% lighter. AirBlaze™ lets you work without the weight.

QUIET OUTERSHELL
Don’t get distracted by noisy fabric. The soft outershell is quieter than other nylon.
CLASSIC DESIGN, MODERN FEATURES
We took inspiration from the Iron-Tuff® freezer suits that made us famous and created “Iron-Tuff® on steroids” with 54 Gold. We updated the look and functionality with modern features that add warmth, mobility and comfort so you can perform your best everyday.

REINFORCED STRESS POINTS
Brass rivets reinforce stress points to make these garments extra durable.

WARMPLUS GRAPHENE LINING
The honeycomb graphene pattern traps your escaping body heat and reflects it back for more warmth.
How can a garment so lightweight keep you warm down to -50°F? Answer: the combination of AirBlaze™ insulation and our new WarmPlus graphene lining. Printed in a stylish gold honeycomb design, the WarmPlus lining absorbs your body heat as it escapes and transfers it back to you, enhancing protection against the cold.

Induradex®  Insulation 9  Durability 9  Dexterity 7

Pre-curved, ergonomic fit
There's only one original freezer suit and RefrigiWear® invented it. From the Alaska Pipeline to every step of getting food to America's tables, Iron-Tuff® has been there protecting workers since 1954. Our iconic line of garments provides protection down to -50°F as well as durability and reliability that you can count on for years to come. Extreme durability, legendary warmth – it's the original way to Master the Cold®.

**IRON-TUFF®**
**WARM | TOUGH | ICONIC**

OVERTIME COMING UP? BRING IT!

Our new VitaComfort® Bounce midsole in the Iron-Tuff® Hiker helps you keep that bounce in your step, even after a long shift. The advanced material absorbs the shock from your step, cushioning your foot as it makes contact with the floor.

**BRASS RIVETS AT HIGH-STRESS POINTS**

Brass rivets reinforce stress points to make these garments extra durable.

**HEEL REINFORCEMENT PATCHES**

Iron-Tuff® Bib Overalls and Coveralls have added protection at the heel to prevent fraying and tearing.
REFRIGIFILL™
Stay warm and comfortable with RefrigiFill®, our proprietary blend of insulation that has been perfected over our 65 years of insulating garments.

HEAVY-DUTY BRASS ZIPPERS
No frustrating fights to get out of this gear. Our brass zippers are easy to use and durable.

BOUND SEAMS TO PREVENT DRAFTS & INCREASE DURABILITY
Bound seams don’t just seal out the cold – they help Iron-Tuff® handle whatever you throw at it.

POLARFORCE®

Make the cold fear you with the lasting warmth and style of PolarForce®. If your gear doesn’t let you bend, reach and move, you won’t finish the job on time. PolarForce® with Performance-Flex – comfort rated down to -40°F – gives you freedom of movement to perform at the highest levels, earn the MVP award and get home safe – all while being protected from the cold and looking good to boot.
Many PolarForce® products feature Performance-Flex to help you get the job done without compromise. Performance-Flex innovates the way you move in insulated clothing with a ribbed fabric at key flex points that expands to help you move more freely.
8140
POLARFORCE® JACKET

- Over 500g of insulating power
- Soft 100% polyester shell
- Water-repellent, wind-tight finish
- Tricot laminated silver lining with polyester mesh cover
- YKK® zipper closure with storm flap
- 2 Zippered hand-warmer pockets
- 2 Chest pockets with waterproof zippers
- Inside zip pocket
- 2-Stall pencil pocket on left sleeve
- Inner draw cord at waist to seal out drafts
- Adjustable outer cuffs with inner cuff seal
- Performance-Flex on elbow, under arm and back for improved movement
- Grip Assist on sleeves
- Meets EN 342:2017 Protective Clothing - Protection Against Cold: 0.430(B) | 3 | X

SPECIAL FEATURES

Performance-Flex gives you unprecedented mobility at key flex points on your body, like at the elbows, the back/shoulders and underneath your arms.

Grip Assist on sleeves prevents objects from slipping as you handle them.

Tricot laminated lining provides additional warmth and durability.

- Brass rivets reinforce stress points
- Heel reinforcement patches
- Low front and high back makes bending easier

**IMPROVED DESIGN!**

Meet the New ErgoForce®! ErgoForce® just got a major upgrade. Get better fit and more comfort. The fabric treatment is softer but still extra tough. The bib overalls have a unique design that keeps the front low for bending but still tucks in those love handles. The new ErgoForce® gives you the same warmth with better functionality and more visibility.
## 10 Tips to Stay Warm and Safe

### For Indoor + Outdoor Workers

Our clothing keeps you warm, safe and productive in cold environments, but choosing the right clothing is only part of the process. To make it simple, here are 10 cold facts that can help you stay warm.

### Choose Clothes According to Your Activity Level.

- More active = less insulation
- Less active = more insulation

### Avoid Sweat Build up

Stay dry to maintain warmth. Moisture can prevent you from staying warm so look for moisture wicking layers.

### Drink More Water, Less Caffeine

Caffeine can cause dehydration, making you more vulnerable to the cold. Drink lots of water to stay hydrated & warm.

### Eat More

When working in cold temperatures, you should average at least 2,400 calories and up to 4,000 calories per day.

### Don’t Wear Clothing That Is Too Tight or Too Loose

Insulated clothing or layers should fit comfortably and also help seal out drafts.

### Layer Clothing

A good inner layer insulates and wicks moisture away from the skin. The outer layer continues the wicking process and insulates by preventing body heat from escaping.

### Protect Bare Skin

Cover all areas that will be exposed to cold temperatures or wind.

### Pay Attention to Your Body

Get out of the cold if you experience extreme drowsiness, loss of balance, extreme shivering or slower breathing.

### Drink More Water, Less Caffeine

Caffeine can cause dehydration, making you more vulnerable to the cold. Drink lots of water to stay hydrated & warm.

### Don’t Smoke or Drink Alcohol

Nicotine and alcohol affect the body’s ability to regulate and conserve heat, especially in your extremities.

### Wear RefrigiWear® Garments!

RefrigiWear® offers head-to-toe protection for a variety of temperatures and activity levels.

When workers aren’t weighed down, they accomplish amazing things. With our innovative AirBlaze™ insulation, we’ve created incredibly lightweight gear that is durable, flexible and crazy warm. With the durability of softshell, the warmth of a quilted design and the comfort and mobility of Performance-Flex, Frostline® is the future of protection from freezing temps.
There is nothing tougher, lighter or warmer than our AirBlaze™ insulation. This eco-friendly insulation, made from sustainable materials, provides all the warmth at half the weight – so you can work harder in colder conditions.

SOFTSHELL

You aren’t going to find toughness like this anywhere else. Get a modern athletic style and industrial strength protection with the RefrigiWear® Softshell Collection. Softshell is more flexible and less bulky than other materials – so you can get the job done in comfort. Our softshell garments offer protection that works as hard as you do, in modern designs with plenty of functional features.
There’s more to safety than just staying warm. Our high-visibility (HiVis) and enhanced-visibility softshell garments are just as tough, flexible and warm as our regular softshell, but they offer added safety in dim warehouses or on busy docks. With HiVis colors and reflective tape, these garments won’t just protect you from the cold – they’ll also keep you safe from the hazards of the job.

Above-zero freezing temps are still dang cold. You might not be working in negative temps, but the cold will still take a toll if you aren’t protected. Featuring our lightweight AirBlaze™ insulation, our new ChillShield™ line protects in temps from 10°F up to 40°F, so you can keep out the cold and get to work.

Tough days won’t wear this gear down. With added abrasion-resistant panels for high contact areas, ChillShield™ gear won’t snag or tear just because of a rough day at work. Long shifts don’t make you unravel. Get gear that won’t either.

All the warmth but 40% lighter. AirBlaze™ lets you work without the weight.

Not just lightweight! ChillShield™ is thin, so you aren’t hampered by bulk. And still keeps you warm down to 10°F.

THIS GEAR IS SO QUIET!

Nothing can grate on nerves quiet like a repeated sound as you work. The durable outershell of ChillShield™ is made of a soft material that won’t make as much noise when the fabric brushes against itself as you move. We still can’t do anything about Paul’s boring stories though.

Diamond Quilted jackets are a popular style, but many aren’t ideal for work because of their bulk and thin outershell. Not so with our Diamond Quilted products. More durable than standard quilted gear, these jackets aren’t just stylish – they’re hard workers. Our collection is fashionable AND tough.
Tell Mother Nature to take a hike. From working the docks to making deliveries, many jobs can take you out in the elements. Stay dry and warm with waterproof gear from RefrigiWear®.

RefrigiWear® offers a wide range of high-visibility (HiVis) garments as well as handwear, footwear and headwear with HiVis accents because we know that absolutely nothing comes before the safety of your workforce. Many stock garments can also be customized to include reflective tape. Please contact our Customer Service Team for customized garment requests at 800.645.3744.

**ANSI CLASS RATINGS**

**CLASS 1 | LOWEST RISK CONDITIONS**
- Workers away from road traffic, like in warehouses or on loading docks
- Traffic traveling less than 25 mph
- Requires the minimum amount of background HiVis (217in) and reflective tape (155in) materials
- Requires the minimum amount of background HiVis (217in) and reflective tape (155in) materials

**CLASS 2 | MODERATE RISK CONDITIONS**
- Workers are on or near roadway, like construction workers or drivers in distribution yards
- Traffic traveling less than 50 mph
- Requires more background HiVis (755in) and reflective (201in) materials

**CLASS 3 | HIGHEST RISK CONDITIONS**
- Workers in high-traffic areas, like road crews or drivers on the side of roadways
- Traffic is traveling more than 50 mph or possibly less if low visibility conditions are probable, such as at night or in bad weather
- Requires most background HiVis (1,240in) and retroreflective (310in) materials

**CLASS E**
- Class E (“Ensemble”) garments don’t meet ANSI guidelines when worn alone but increase visibility when paired with other ANSI certified items. Class E garments are generally shorts, pants and bibs. Pairing a Class E garment with a Class 2 garment makes the entire ensemble Class 3.

**HIGH-VISIBILITY**

**0399 IRON-TUFF® VEST**
- 11.25 oz. RefrigiFill® polyester insulation
- Tear and abrasion-resistant 300 denier polyester outershell
- Water-repellent, wind-tight finish
- ANSI Class 2 compliant
- Bound seams seal out drafts
- 2 Insulated front pockets
- Extended length back
- Stretch knit side gussets for comfort
- Insulated knit collar
- 2” 3M® Scotchlite® reflective tape
- Reflective X on back

**0399R S-5XL**
Orange | Lime

The ANSI classification of a garment is determined by:
The amount of background material (HiVis Orange or Lime) plus the amount of reflective material and its placement.

SWEATSHIRTS THAT WORK HARD

Our sweatshirts come in different styles and materials, some up to 3 layers, so you have choices for your job and temperature range.

OUTERSHELL, INSULATION & LINING

You do tough work so our sweatshirts are made to withstand all-day wear on the hardest jobs. You get more than off-the-shelf insulation packages with our sweatshirts, which can have enough insulating power to protect well below freezing. Our 2- and 3-layer styles offer more warmth and comfort with soft inner linings.

VERSATILITY

Under a jacket, paired with bib overalls, or just with pants – sweatshirts are the most versatile layer you can use to get your comfort level and warmth just right.

PREMIUM SWEATSHIRT FEATURES

With us, it is never just about warmth. We want to help you get the job done better. That’s why we offer premium sweatshirts with additional functionality like Performance-Flex, waterproof zippers and Grip Assist (features will vary by style).

BENEFITS OF EMBROIDERY

Stay Professional with Custom Embroidery
RefrigiWear® has an in-house team at our Dahlonega, GA location to help you customize any of your RefrigiWear® products. We offer direct embroidery, patches and heat-seal. Best of all, we deliver high-quality products because we control every stage of the process.

WHY CHOOSE EMBROIDERY?
• Create strong first impressions
• Create advertising with every employee
• Customize multiple products
• Create a sense of team unity
• It makes our products yours

ADD EMBROIDERY TO MOST PRODUCTS.
SEE PAGE 138 FOR MORE INFO.
Anything they can do, you can do warmer. We know how hard you work every day in the cold. We wanted to give you gear designed to fit right, so you can focus on the job, not discomfort. That’s why we now offer more women’s products than ever before.
These products are built for women. Whether you’re on a jobsite or in a freezer, the cold doesn’t mean you get a day off. Poorly fitting gear doesn’t protect and it distracts from the job at hand. Skip the frustration with protection and fit designed just for you.

WOMEN’S GLOVES

Whether handling product boxes in a warehouse or machinery on the jobsite, keep your most important tools protected. With your hands safe and warm, you’ll get every job done.
GLOVE ANATOMY

Below are features to consider when selecting your next pair of gloves. These features can help you find the ideal glove for your environment.

ABRASION PADS AND REINFORCED THUMB CROTCH

Abrasion pads cover frequently used areas with an extra layer for comfort and durability. Reinforced thumb crotches are an extra layer between the thumb and forefinger, providing toughness where you need it most.

CUFFS

There are many different types of cuffs, each with their own benefits, so think about what you will need most: protection, comfort, easy on/off or warmth.

LEATHER GLOVES

Leather provides the most durability for tough jobs with heavy abrasion.

GRIPS OR DIPPED

If you have to pick up or handle items all day, a glove with a coating or extra grip will be ideal. The extra grip patterns will prevent slipping and hand fatigue, while coated or dipped gloves will also provide these benefits and may add some water resistance.

CUT RESISTANT

We offer several cut resistant gloves so you can safely use knives, box cutters and more. Cut resistance level, rated A1 through A9, is determined by how much weight is required for a straight blade to cut through the material. The more weight it takes, the higher the rating.

- **ASTM ANSI CUT LEVEL**
  - A3
    - 1000-1499 grams to cut
    - Light/medium cut hazards: Assembly, packaging and general warehouse.
  - A4
    - 1500-2199 grams to cut
    - Medium cut hazards: Canning, food preparation and general warehouse.
  - A5
    - 2200-2999 grams to cut
    - Medium/heavy cut hazards: Metal fabrication, heavy food preparation and processing, heavy-use warehouse/packaging.
**INSULATION**

Insulation is based on weight as well as layers of insulation. Multiple layers, including outershell and lining, can significantly increase warmth.

**IMPACT PROTECTION**

Impact protection gloves feature dense pads on the back of the hand, knuckles or fingers to help protect you from day-to-day bangs and pinches.

**ERGO FIT**

An ergonomic fit means that the glove is pre-curved so you don’t have to work as hard to bend the glove.

**INDURADEX® RATING**

<table>
<thead>
<tr>
<th>Induradex®</th>
<th>Insulation</th>
<th>Durability</th>
<th>Dexterity</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

When choosing a glove, you need to know if it has the features you need for work. Our Induradex® ratings let you know how a glove compares to other gloves we offer in terms of insulation, durability and dexterity. Higher numbers mean better performance in those areas.

**DIPPED/COATED GLOVES**

RefrigiWear® offers a number of different dips and coatings on gloves to help you tackle a range of jobs and conditions.

**PERFORMANCE-FLEX**

Insulation adds bulk to gloves, which can sometimes get in the way of work. Performance-Flex is a special ribbed design over the knuckles that makes it easier to grab, bend and work while keeping your hands protected.
INNOVATIVE SOLUTIONS

Keypads and touchscreens are all too common now, but when you have to remove your gloves to use them, it defeats the purpose of even wearing them. RefrigiWear® offers two solutions:

TOUCHSCREEN SOLUTION

TOUCH-RITE NIB

RefrigiWear’s® exclusive Touch-Rite Nib works on both touchscreens and keypads, allowing employees to remain productive without removing their gloves.

Available in styles:

T679 (Page 97)  T282 (Page 101)

Located on the right index finger. Easy to unscrew and replace.

A pocket on the left glove allows for secure storage and easy access to replacement nibs.

KEYPAD SOLUTION

KEY-RITE NIB

RefrigiWear’s® exclusive Key-Rite Nib works on keypads and pressure sensitive screens to help employees stay productive and protected while they work. Can be placed on any and as many fingers as needed.

Available in styles:

K679 (Page 97)  K353 (Page 100)
K319 (Page 100)  K282 (Page 101)
K379 (Page 102)  K279 (Page 103)

WHY USE A LINER?
Boost the warmth of other gloves, add another layer of protection and soak up sweat when you use a liner. Wear them alone in moderate temps for added padding and protection. You want them snug but not tight for maximum dexterity when working.
Most work boots are not engineered to keep you warm when you’re walking on cold floors for hours or in -20°F freezers. At RefrigiWear®, we design all of our footwear for maximum comfort, durability, safety and especially warmth when you really need it. We also make sure that the materials can stand up to extreme conditions.

RefrigiWear® developed our temperature Comfort Ranges to help guide you to the right level of insulation for your activity level and environment.

OUTSOLES
All of our outsoles, including the RefrigiWear® Anti-Slip and Hybrid Traction outsoles, are designed to handle contact with cold floors and not break down when exposed to different temps throughout the day. We also partnered with Vibram®, the world’s premier outsole manufacturer, to design outsoles that won’t crack, slip or let you down while working in the cold.

Learn more about our outsoles at refrigiwear.com/outsoles

INDURASAFE®
InduraSafe® Ratings indicate the level of Insulation, Durability and Slip Resistance a boot provides. Higher numbers mean better ratings. The material, construction and the anticipated lifespan of the boot help indicate durability. Slip resistance relies on the outsole and Mark II Slip Resistance Testing.
VitaComfort® takes care of your feet so you can concentrate on what’s most important—your work and safety.

**VITACOMFORT® SYSTEM**

VitaComfort® provides needed relief from foot fatigue, pain and injury so you can stay on your feet all day and get the job done.

1. **OUTSOLE**
   - Slip resistant and durable
   - Athletic and streamlined

2. **MIDSOLE**
   - Lightweight and superior support
   - Shock absorbing

3. **COMFORT GEL LAYER**
   - Max comfort and breathable
   - Moisture wicking for dryer feet

4. **PREMIUM INSOLE**
   - Added cushioning arch support
   - Stability and pull moisture away

5. **360 DEGREE PADDING**
   - Extra comfort

If your feet aren’t happy, no part of you is. Footwear plays a key role in safety and comfort. That’s why footwear from RefrigiWear® features a variety of temperature ratings and protective components for your complete safety.

Some the features to consider when choosing the right boot for the job are **Insulation Package**, **Toe Design**, **Slip Resistance**, and **Ankle Support & Protection**.

**BOOT ANATOMY**

An ankle support + protection

A higher boot with a snug fit provides more support for your ankles and helps reduce fatigue by adding stability. By providing more coverage, a higher boot helps protect the critical ankle area from light scrapes and impacts. A padded ankle collar will also add comfort.

**Toe Design**

Choose between boots with reinforced steel or composite toes. While both offer superb protection, composite toes are lighter for less foot fatigue and also conduct less cold in low temperatures.

**Slip Resistance**

Slip-resistant soles are an important part of any safety considerations. All of our boots go through Mark II slip resistance testing and are given a score with our InduraSafe® Rating.

**Insulation Package**

We offer boots with a range of insulation packages, including many with Thinsulate® insulation and DRI-BLAZE® linings. Check the comfort rating and insulation package closely— you don’t want too much or too little. We have boots that protect down to -60°F and others that'll keep you comfortable when the temps are hovering around freezing. Make sure it matches the conditions you’ll be working in. And don’t forget RefrigiWear® socks add more warmth and comfort too.
The BOA® Fit System gives you a fast, effortless, snug fit all day, all at the turn of a dial. Once you’ve dialed it in for your preferred tightness, it won’t come loose.

**HOW IT WORKS**

Perfect for cold environments because you don’t have to remove your gloves if you need to make adjustments. Get the perfect fit at the turn of a dial.

- **PUSH TO ENGAGE**
- **TURN TO TIGHTEN**
- **PULL OUT FOR QUICK RELEASE**

**THE BOA® GUARANTEE**

FIT FOR LIFE WITH BOA® — The BOA® Fit System dials and laces are guaranteed for the lifetime of the product on which they are integrated.

TO FIND YOUR PERFECT REFRIGIWEAR FIT, TAKE ALL MEASUREMENTS OVER THE CLOTHES YOU WILL BE WEARING.

• For help finding your size, view our full sizing chart online at Refrigiwear.com/customer-service/sizing-chart
• RefrigiWear garments should fit loosely.
• If your size is borderline, choose the larger size.
• Sizing chart is based on Regulars [5’7”-6’].

• Tall sizes are approximately 2” longer in sleeves, inseam and torso [6’1”-6’5”]. Tall is not available in size small.
• Short sizes are approximately 2” shorter in sleeves, inseam and torso [5’-5’6”].
• Custom Sizes Are Available! Contact Customer Service for assistance at 800-645-3744.

HOW TO TAKE YOUR MEASUREMENTS

MEASURE OVER CLOTHING TO BE WORN.

CHEST
Measure around fullest part of chest or bust, underarms, and around shoulder blades. Keep tape straight and level.

WAIST
Measure around natural waistline below last rib and above hip bones. Don’t hold your breath.

TORSO
Measure from the top of the collar to the crotch seam.

SLEEVE LENGTH
Extend your arm straight out to the side. Measure from the center of the back to the wrist. For best comfort, round up to find total inches.

INSEAM
Measure from base of crotch seam to top of shoe to be worn.

ALTERATIONS, CUSTOM & SPECIAL SERVICES

RefrigiWear® garments can be customized to your exact specifications. You must contact Customer Service to request customization of your garment. Please allow two weeks for delivery.

Alterations
- Shortening sleeves or trousers
- Adding pockets, leather patches and radio straps
- Add fleece patches to inside of garment
- Add removable patches
- Safety harness access point

Custom and Special Services
- Non-stock sizes, made to measure
- Custom Colors and HiVis™ colors by request
- Add 3M® Scotchlite® Reflective Tape in silver, orange, yellow with silver stripe, white or yellow

RETURNS, REPAIRS & LAUNDRY

RETURNS
To return any product, call our Customer Service Team at 800-645-3744.
To read more about our return process, visit www.refrigiwear.com/returns

REPAIRS
Nothing is more frustrating than an issue with your favorite gear. That is why we offer in-house repair services to get your gear back in action. Please allow two weeks (not including shipping) for your repair to be completed.

Please contact Customer Service at 800.645.3744 or email keepmewarm@refrigiwear.com to process your repair. You will be given an RMA number and form to use for shipping. The RMA number and form (showing bar code) MUST be attached to the outside of the box for your repair to be processed. Boxes without RMA form attached will not be processed.

LAUNDRY
Have a big pile of dirty protective gear and nowhere to wash it? Let us handle it for you! RefrigiWear offers laundering services for garments. Cleaning services usually take 3 days, not including shipping time.
IN-HOUSE EMBROIDERY

All embroidery is done at our factory in Dahlonega, GA. We control the entire embroidery process—from digitizing all the way through packaging—to ensure superior quality and timeliness of your order. Depending on the garment, you can apply embroidery to: right or left chest, right or left sleeve, back and leg.

DIRECT EMBROIDERY

COMPANY LOGOS | JOB TITLES | NAMES | NUMBERS | SPECIAL EVENTS OR AWARDS

Direct embroidery provides a premium appearance and the most professional look. This is our most requested option. With Pantone® color matching, there are thousands of colors to choose so your embroidery will match your logo and brand exactly.

Direct embroidery remains intact for the life of the garment, and threads are color-fast for a significant length of time with typical wash and wear.
EMBROIDERY ADDS A PROFESSIONAL LOOK

With our embroidery, screen printing, patch and woven emblem technology, you can add logos, names and numbers to multiple locations on almost every RefrigiWear® garment.

HEAT TRANSFERS

Heat transfers impact only the exterior of the garment and allows you to use intricate, picture quality images.

- Low cost alternative to embroidery
- Great for large graphics on back of garments
- Must be a minimum order of 50 units
- Allow 7-10 days for production

SELF-PATCH EMBLEM

Self-patch utilizes a swatch of the same material as your garment for an embroidering patch. This ensures a match to your garment, but it can still be easily removed and replaced.

WOVEN EMBLEM

Woven designs give you greater flexibility on a patch that is sewn onto the garment. It also makes replacement easy.

Woven Label Emblems are manufactured using high-speed automatic weaving looms. Unlike embroidered emblems which are produced on twill materials, the interlaced weaving process creates the entire emblem and design at the same time, in two or more colors.

WARNING: This product may contain chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.
