

Release Notes

TRIMBLE ELECTRICAL DESIGNER 2D

This short document summarises the latest improvements, bug fixes and new features that are included in the latest version of the Trimble Electrical Designer 2D Suite of products incorporating ProDesign, Protect, SingleCable and PowerNet.

ProDesign

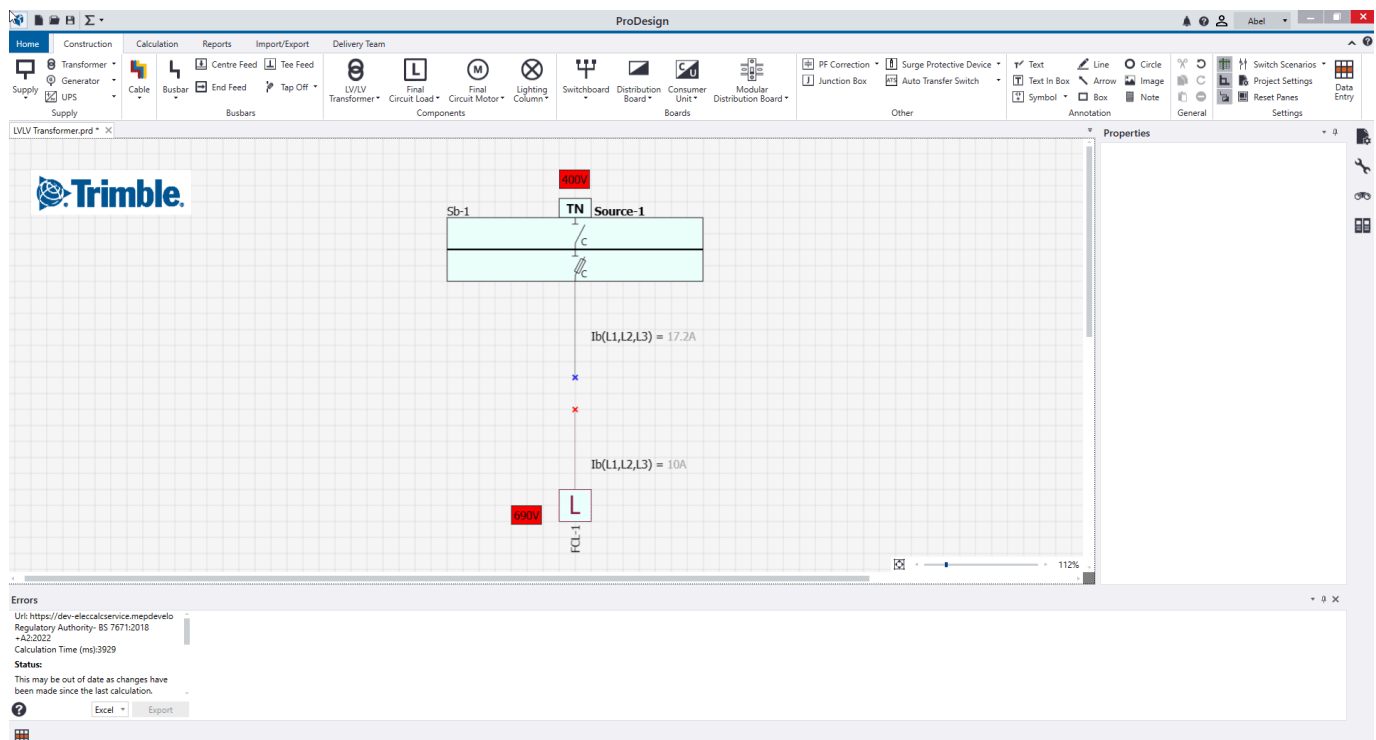

This release incorporates a number of behind-the-scenes performance, reliability and security improvements in addition to the following.

For more information on ProDesign, please go to:

<https://mep.trimble.com/en-GB/products/prodesign>.

New Feature

ProDesign now supports the LV/LV Transformer component which allows for 2-Winding transformer (Isolation transformer) calculations.

Resolved Bugs

- [MEPEL-8562] - Fixed an issue that caused an “unknown error” when calculating.
- [MEPEL-5181] - Updated the Voltage Drop-Circuits report to better identify the Voltage Drop of the Circuit and the Voltage Drop from Source.
- [MEPEL-8206] - Fixed a calculation issue where the incorrect current from the RCD curve was being picked up leading to a larger calculated Zs value.

Upgrade procedure

In order to upgrade your software to this new version, you need a Trimble ID as well as the Named User Licence. For further support, please see the following Technical Assistance section.

Software Update Notifications

The Trimble Electrical Designer suite of applications will notify you when an application update is available for download. You will be able to download the updates from the notification centre itself.

In case your software has received any calculation updates, you will be notified with a “Calculation Service Version Update” during the first instance of calculation.

Named User Licensing

All our products within the Trimble Electrical Designer Suite namely ProDesign, Protect, SingleCable and PowerNet are now powered through named user licensing. This means that a user of our products must have a named user licence assigned to their own Trimble ID and each licence is meant to be used by a single user.

Please contact our support team if you have any questions regarding the licence management and accessing the product. For further support, please see the following Technical Assistance section.

Technical Assistance

Our Technical Support team uses a support tool which allows them to view and control users' machines remotely. This is only ever undertaken with the user's permission – and while being supervised by the user.

Our applications have a menu option link to the [support web page](#) containing details of this assistance should it be required. For more information, please contact our support team via Amtech-Support@Trimble.com or call +44 (0)1908 608833 and then choose Option 1.

UK Customer Portal

If you are a registered customer, please login to the [Trimble community portal](#) for downloading the software and to access other related information. If you are not registered yet, please contact our support team as mentioned in the Technical Assistance section.
