As part of our commitment to the ongoing evolution of ProDesign, we have also included a number of behind-the-scenes performance, reliability and security improvements.

Protect

This latest version 22.0.2 does not include any specific improvements or bug fixes specific to Protect.

For more information on Protect, please go to:

<https://mep.trimble.com/en-GB/products/protect>.

SingleCable

This release notes section describes the features and enhancements that are new in version 2022.0.2 of the SingleCable.

For more information on SingleCable, please go to:

<https://mep.trimble.com/en-GB/products/singlecable>.

Resolved Bugs

- [MEPEL-7065] - Resolved issues that appeared with cancelling the legacy conversion

PowerNet

This latest version 22.0.2 does not include any improvements or bug fixes specific to PowerNet.

For more information on PowerNet, please go to:

<https://mep.trimble.com/en-GB/products/powernet>

Upgrade procedure

In order to upgrade your software to this new version, you need a Trimble ID as well as the Named User Licence. For further support, please see the following Technical Assistance section.

Software Update Notifications

The ProDesign suite of applications will notify you when an application update is available for download.

In case your software has received any calculation updates, you will be notified with a "Calculation Service Version Update" during the first instance of calculation.

Named User Licensing

All our products within the Trimble Electrical Designer Suite namely ProDesign, Protect, SingleCable and PowerNet are now powered through named user licensing. This means that a user of our products must have a named user licence assigned to their own Trimble ID and each licence is meant to be used by a single user.

Please contact our support team if you have any questions regarding the licence management and accessing the product. For further support, please see the following Technical Assistance section.

Technical Assistance

Our Technical Support team uses a support tool which allows them to view and control users' machines remotely. This is only ever undertaken with the user's permission – and while being supervised by the user.

Our applications have a menu option link to the [support web page](#) containing details of this assistance should it be required. For more information, please contact our support team via Amtech-Support@Trimble.com or call 01908 608833 and then choose Option 1.

UK Customer Portal

If you are a registered customer, please login to the [Trimble community portal](#) for downloading the software and to access other related information. If you are not registered yet, please contact our support team as mentioned in the Technical Assistance section.
