What's New October 2023

Contents

This document contains a full record of all content revisions contained within the October 2023 Design Suite content update. To apply content updates to your application follow the below instructions.

Automatic data updates are user defined within the 'Check for Updates' tab under 'Application Settings'. Once applied, a check will be made for a new package upon every launch of the application. If a new package is found, you will be prompted to install it now or later. Once installed, the application will be restarted.

Manual data updates are run at users' discretion. If your application is not set to automatically check for data updates, you can manually check by going to the 'Check for Updates' tab under 'Application Settings' and clicking 'Check Now'. If a new package is found, you will be prompted to install it now or later. Once installed, the application will be restarted.

Section 1	Summary
New Content	Circuit Protective Devices: ABB (MEPED-686/702) Eaton (MEPED-701) Schneider (MEPED-699) *See Section 2 for details*

Section 2	Detailed Content Changes
