Are you taking full advantage of Section 179 deductions? These deductions can provide significant tax savings for your business.

Now could be the perfect opportunity for your company to invest in equipment and benefit from the increased limits of the Section 179 deduction as outlined in the One Big Beautiful Bill Act (OBBBA).

Section 179

Section 179 permits businesses to deduct the full cost of qualifying new and used equipment from 2026 taxes, up to $2.56 million. Deductions begin to phase out for total equipment purchases exceeding $4.09 million, reducing dollar-for-dollar as purchases increase.

Bonus depreciation

The OBBA also enhances the advantages of bonus depreciation, enabling businesses of all sizes to deduct the entire cost of qualifying new and used equipment that is purchased and put into service.

What does this mean for your company?

- Upgrading equipment may prove to be more cost-effective.
- A reduced tax liability for the year helps preserve working capital for other pressing business requirements.
- Numerous leasing or financing options are available, allowing you to benefit from tax incentives.

Equipment that may qualify

- Agricultural
- Commercial trucks & trailers
- Construction
- Corporate Aircraft
- Manufacturing & Material handling

2026 Example Calculation

Total 2026 equipment investment:	$3,000,000
Section 179 deduction limit:	$2,560,000
100% bonus depreciation available for excess:	$440,000
Total 2026 tax deduction:	$2,560,000 + $444,000 = $3,000,000
Potential tax savings on the first year (assuming 21% tax rate):	$630,000
