

Trimble Electrical Designer

TED v22.0.37 Release Notes

Release Date: September 3, 2025

TRIMBLE ELECTRICAL DESIGNER v22.0.37

This document summarises the latest improvements, bug fixes and new features that are included in the latest version of the Trimble Electrical Designer Suite of products incorporating ProDesign, ProDesign 3D, Protect, SingleCable and PowerNet.

Do you have an idea how to make Trimble Electrical Designer better? Join us in shaping the future of our products by visiting the TED Idea portal to vote and submit your innovative ideas! <https://ted.ideas.aha.io/>

ProDesign

This release incorporates a number of behind-the-scenes performance, reliability and security Improvements in addition to the following.

For more information on ProDesign, please go to:

<https://mep.trimble.com/en-GB/products/prodesign>.

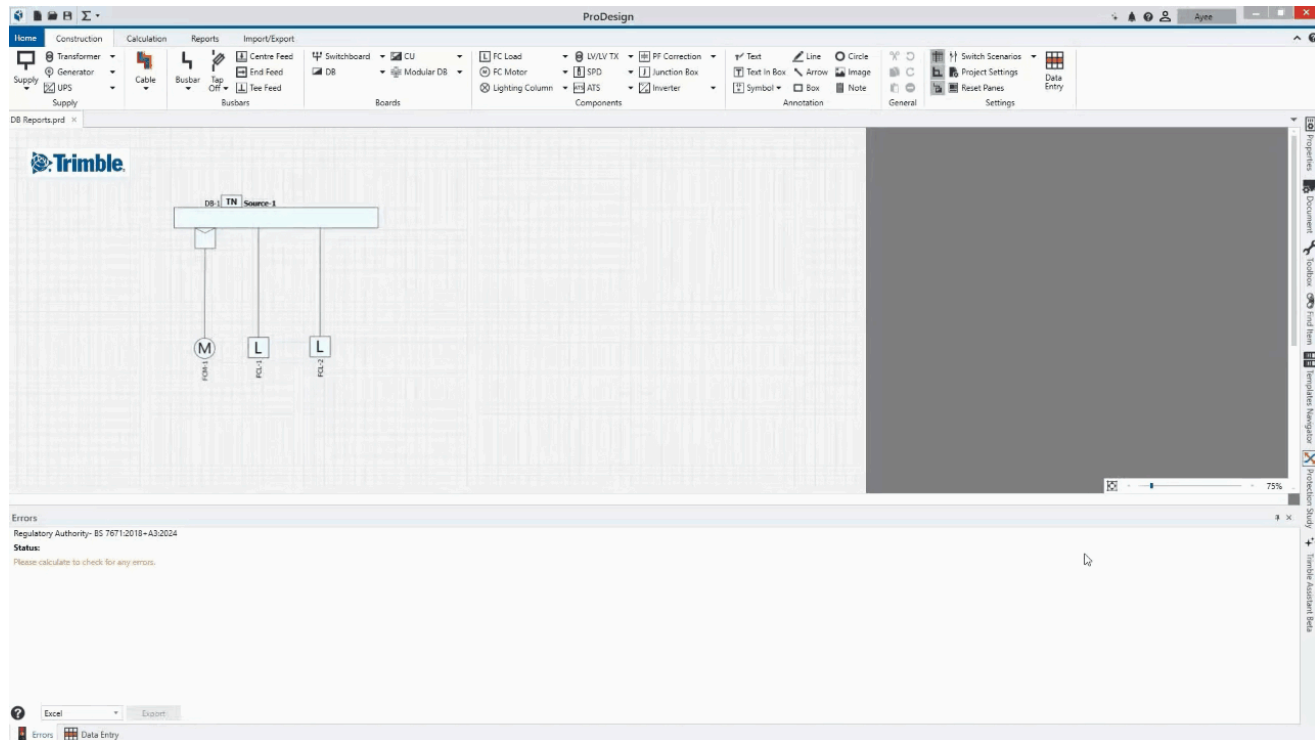

Trimble Assistant is here!

Trimble Assistant has been added to ProDesign. This new feature improves user efficiency and productivity through quick access to information while providing personalized customer support and leveraging the Trimble Assistance AI technology. Trimble Assistant also has the ability to send queries on behalf of the user for errors & warnings.

Please note that this is a Beta feature, while ready for your use today, it will continue to learn and improve over time, becoming more accurate and efficient with every interaction. This is the first step toward a smarter, more powerful Trimble Assistant experience. Try it out now and help us make it even better!

Transparency Notice Regarding AI System Use - Trimble Assistant

We'd like to inform you that this service uses an AI-based system to support your experience and success with the service.

Provider: Trimble Inc., <https://www.trimble.com/en/legal>

Purpose: This AI system is designed to improve your user experience by answering your Trimble Electrical Designer product-related questions (Trimble Assistant).

How It Works: The assistant combines information retrieval from Trimble resources with a generative language model and it provides an answer to your questions (Trimble Assistant for ProDesign). It does not make any autonomous decisions.

Data Used: The system processes information such as your interaction with the service and content created by Trimble. All data is handled in accordance with our Privacy Notice.

Limitations: The AI system may not always suggest the most relevant answer or solution.

Improvements:

- [MEPEL-11938] The Actual Zs value can now be displayed in the Zs Measurement Report. In Project Settings > Reports, users can choose to enable or disable the Actual Zs.

Resolved Bugs:

- [MEPEL-11908] Resolved a bug where exported Custom Reports for a filtered component included all components instead of just the selected ones.

ProDesign 3D

This release incorporates a number of behind-the-scenes performance, reliability and security improvements.

To download ProDesign 3D, ensure you have a **TED 2D UK Pro+ license** and visit the [Trimble community portal](#).

Improvements:

- [MEPEL-11938] The Actual Zs value can now be displayed in the Zs Measurement Report. In Project Settings > Reports, users can choose to enable or disable the Actual Zs.

SingleCable

This release incorporates a number of behind-the-scenes performance, reliability and security improvements.

For more information on SingleCable, please go to:

<https://mep.trimble.com/en-GB/products/singlecable>

Protect

This release incorporates a number of behind-the-scenes performance, reliability and security improvements.

For more information on Protect, please go to:

<https://mep.trimble.com/en-GB/products/protect>.

Powernet

This release incorporates a number of behind-the-scenes performance, reliability and security improvements.

For more information on PowerNet, please go to:

<https://mep.trimble.com/en-GB/products/powernet>

Upgrade procedure

In order to upgrade your software to this new version, you need a Trimble ID as well as the Named User Licence. For further support, please see the following Technical Assistance section.

Software Update Notifications

The Trimble Electrical Designer suite of applications will notify you when an application update is available for download. You will be able to download the updates from the notification centre itself or from [Trimble Downloads](#).

In case your software has received any calculation updates, you will be notified with a "Calculation Service Version Update" during the first instance of calculation.

Named User Licensing

All our products within the Trimble Electrical Designer Suite namely ProDesign, ProDesign 3D, SingleCable, Protect and PowerNet are now powered through named user licensing. This means that a user of our products must have a named user licence assigned to their own Trimble ID and each licence is meant to be used by a single user.

Please contact our support team if you have any questions regarding the licence management and accessing the product. For further support, please see the following Technical Assistance section.

Technical Assistance

Our Technical Support team uses a support tool which allows them to view and control users' machines remotely. This is only ever undertaken with the user's permission – and while being supervised by the user.

Our applications have a menu option link to the [support web page](#) containing details of this assistance should it be required. For more information, please contact our support team via Amtech-Support@Trimble.com or call +44 (0)1908 608833 and then choose Option 1.

UK Customer Portal

If you are a registered customer, please login to the [Trimble Downloads](#) for downloading the software and to access other related information. If you are not registered yet, please contact our support team as mentioned in the Technical Assistance section.
