

What's New March 2024

Contents

- Section 1. Summary
- Section 2. Detailed Content Changes

This document contains a full record of all content revisions contained within the March 2024 Design Suite content update. To apply content updates to your application follow the below instructions.

Automatic data updates are user defined within the 'Check for Updates' tab under 'Application Settings'. Once applied, a check will be made for a new package upon every launch of the application. If a new package is found, you will be prompted to install it now or later. Once installed, the application will be restarted.

Manual data updates are run at users' discretion. If your application is not set to automatically check for data updates, you can manually check by going to the 'Check for Updates' tab under 'Application Settings' and clicking 'Check Now'. If a new package is found, you will be prompted to install it now or later. Once installed, the application will be restarted.

Section 1	Summary
Modified Content	<p>Protective Devices: Legrand (MEPED-382) Schneider (MEPED-676) Siemens (MEPED-690)</p>

See Section 2 for details

Section 2

Detailed Content Changes

Protective Devices

Legrand

Modified content

- MEPED-382 – DPX3 MCCB update.

The DPX3 MCCB range has had the following updates;

- All 4 pole devices up to and including the 630A frame have the option of earth leakage protection. The earth leakage option is no longer available on the 3 pole devices.
- Time/current curves have been updated in accordance with Legrand's latest datasheets.

Schneider

Modified content

- MEPED-676 – MasterPact ACB range update.

The MasterPact ACB range has been updated to include all frame sizes, performance levels and number of poles. The following frames are now available;

- MTZ1 – H1/H2/H3/L1 - 3P/4P (400A-1600A)
- MTZ2 – H1/H2/H2V/H3/H10/L1/N1 - 3P/4P (400A-4000A)
- MTZ3 – H1/H2 - 3P/4P (2000A-6300A)

With the following trip units;

- Micrologic 2.0 X
- Micrologic 5.0 X
- Micrologic 6.0 X
- Micrologic 7.0 X

We are working closely with Schneider to include the Selectivity and Back Up data for the updated MasterPact MTZ ACB range in a future update.

Siemens

Modified content

- MEPED-690 – Sentron 3VA MCCB new rating

Addition of 160A rating on the 3VA12H/M/S Frames on the Sentron 3VA MCCB range.
