intimate part protection

PAMPER VERGINALE WOMEN

# TIMES & STAGE

The No.1 brand in professional  
female intimate part  
protection

## The women's health cannot be ignored

As time changes, people are encountering great changes in lifestyles, which brings embarrassing worries and health threats to women today. According to the investigation conducted by Aboluowang news website, a higher occurrence of gynecological problems for women is found in younger age groups in the past ten years. A closer look shows over 60% of women have sought for medical treatment due to gynecological trouble.

The concept of female intimate-part care has developed in the West for a long time. Royal College of Physician and King' s College London –College of Obstetricians and Gynecologists Professor Dr. Janice Rymer suggests that women need to carry out correct cleaning and are for their intimate parts, which should be listed in the daily basic care steps. Women today should not only care for areas visible but should also value the health issues of the intimate part.

PAMPER VERGINALE WOMEN

## LEGEND & DISCOVERY

### About VERGINALE

On a primitive island in the Mediterranean Seas, there is one legend about the ancestors of the natives migrated from Mesopotamia over four thousand years ago. A popular ancient formula mixed of multiple natural plants among the local women was said to promote growth in young girls and moderating female diseases. The local women were said to be charming, curvy and appeared to be perma-youth.

The ancient formula has been passed on for thousands of years and was traditionally prepared by the mothers. The mothers will pass on the formula to their daughter before their marriage, to symbolize the valuable dowry of a lifetime happiness given from the mother to the daughter. Such tradition has been passed on for thousands of years.

Nine Taiwanese medical doctors have formed a research team and spent 3 years of research on this mysterious ancient formula. Now the formula is presented to the world through the simplest method, so this valuable ancient formula originated from a primitive island could benefit the women all over the world. The ancient passed on for thousands of years has turned into the female product, VERGINALE, after high-tech extraction today, so that women today can enjoy this previous formula from Mediterranean Seas, using the most natural and purest plant ingredients to carefully pamper and take care of women' s health.

## International Certification

Different from the average over-the-counter products, VERGINALE gathers the wisdom from top doctors and experts in 9 fields, including phytology, biology and medical science. The products undergo years of research and the highest standard of processing to pamper and care for the health of females through natural plant ingredients. VERGINALE event passed the largest inspection and certification institute, SGS, MSDS test of Industrial Technology Research Institute (ITRI), Halal certificate, and was even awarded with the National Quality Gold Brand Award as recognition, VERGINALE is committed to professionalism and offers the best intimate-part care products for women today.

## Certified by multiple SGS tests.

## Approved by Ministries of Health worldwide.

VERGINALE

PAMPER VERGINALE WOMEN

The intimate part of female is very tender, where high temperature and humid environment could easily turn it into the breeding bed for bacteria. Fortunately the bacillus acidilactici can decomposesaccharide into lactate, so that the intimate part of women stays at a weak-acid environment and forms a natural immune protection. Nonetheless such natural protection will gradually decline year by year when one reaches the age of 30. Particularly before and after the menstruation and during the pregnancy, there is opening to the cervix that allows easy entrance for bacteria Moreover, the average base soap and medical cleaning products also damage the weak-acid environment of the intimate -part of women, which needs to be used with special care.

VERGINALE is not only the top selling product of Alpsface but brings female users worldwide with refreshing and sweet life, which even brings the concept of VERGINALE love to the users.

## Gynecologist-Dr.Qi-Fong Su Say :

The intimate part of women is very delicate and could easily become the breeding bed for bacteria under high temperature and humid environment. The natural immune barrier for the weak acidic environment of women's intimate part declines annually after 30 years, particularly before and after the menstruation period and maternity, where the opening of cervix makes it easy for bacteria to enter. Moreover, the average alkaline soap and medical cleansing products will also destroy the weak acidic environment of women's intimate part, deteriorating the immune system, which requires precaution for use.

Kuang Tien General Hospital Department of Gynecology Chief Physician Qi-Fong Su mentioned: To keep the intimate part of women healthy, choose intimate-part products made of mild and nonirritating herbal formula. Women should start from the basic daily cleaning care to keep the intimate part young and healthy over the long run.

## Taiwan gynecology expert -Dr. Mei-Fei Chen

Women today often have problems with itchiness in intimate parts due to overtime or lack of sleep. Hence is it important to choose a intimate-area cleansing product that inhibits bad bacteria but produces good bacteria in order to restore the health of the intimate area, thereby to lower the probability of infection. Choose mild and non-irritating cleaning products to keep the health of the intimate area by balancing the pH value. Choose products with plant formula made from extracts of plant essence to fully pamper the intimate area. Use the product daily to keep the intimate part of women in a healthy balance.

VERGINALE -The No.1 brand in professional female intimate part protection

POWER. & TECHNOLOGY

## VERGINALE Purification

- The pH value of women's V part differs from other body parts while the pH value between the inner lips and outer lips also varies. In general, the pH value of inner lips falls between 3 and 4 while the pH value of outer lips fall between 4 and 6. The women's V part is very tender while the reproductive system is open and susceptible to invasion of microorganisms. The improper use of cleaning products may destroy the weakly acidic environment of women's intimate part, causing itchiness and lack of water, losing resilience and nourishment that could eventually even lead to vaginitis and cervicitis.
- Water do not thorough cleanse the special stains from the intimate part and it is simply not nourishing enough. Soap could destroy the weakly acidic environment of the intimate part due to base while medical solution tends to skill all probiotics that require prudent use.

### Powerful VERGINALE that takes care of women's V part.

VERGINALE feminine intimate part care is a daily care product that is 100% soap-free and does not contain medicine. The product undergoes rigorous medical testing and low-sensitivity testing to effectively maintain the health and increase immunity of women's intimate part.

V part: V is the first letter of Vagina and means female intimate part.

The Betain essence is extracted from natural plants to provide the activation energy for women's V part, to activate lactobacillin and other probiotics for ameboid movement, balancing the pH value inside the intimate part and enhance the immunity of women's intimate part. The Betaine essence contains activating protein that undergoes biological transformation at ovary to make the ovary release androgen, restoring the plumpness, resilience and tightness of the intimate part while nourishing the skin with pink, glossy and flawless look.

## Small Expectation and Big Future

In a survey conducted on the beauty expenses in urban female aged between 25 to 50 years old, the facial care accounts for the highest expense, the monthly per capital expense is USD\$80 and the expense on intimate part is only USD\$2.5, ranking this expense at the very end list of body parts. Women with monthly income over USD\$1,500 spend 50 times more of costs on the face care than on the intimate part care.

The intimate part is the second face to a women so that we should not only work on the surface but also inside. What an amazing demand it will be when intimate part care is as widely accepted as facial care !

## Are you **still** doing surface work?

All VERGINALE women are highly potential.

VERGINALE goes deep into the problem cause and solves problems with one formula.

It is the true problem-solver.

Solve problems with one formula and become VERGINALE women immediately.

## The lower body of women determines the rest of their life.

Women today have higher demand for their look and health while paying more attention on skin and body care.

All women long for beautiful look but aging look, lower immunity, out-of-shape body, and disharmony in couple's life, still increase each year.

Experts say that women need to be pampered for beauty, particularly the inner beauty. Many women only pay attention to external cosmetics but neglect inner care. It is noted in the Internal Classic (Neiching) about the theory on "inner care and outer beauty." Hence the essence to become a truly healthy beauty is to start with the internal conditioning. Owning a clean and healthy inner beauty is the key to maintain youth and beauty.

The concept of intimate area care will provide a brand-new field for women.

VERGINALE
