

AIFA i-Ctrl Enables Smart Control for All Traditional Devices.

With i-Ctrl and your smartphone download the app, you can turn your home into a smart home immediately. i-Ctrl enables you to control infrared home appliances such as TV, AC, DVD, STB, Light, Fan...via your smartphone remotely. The scheduling and macro is programmed and easy to adjust via the app.

i-Ctrl makes traditional home appliances smart without adding any sensors to them. The simplicity in installation/daily use and an attractive price also makes it a highlight in this AIoT era.

AIFA design and manufacture i-Ctrl's software and hardware purely in house, including Wi-Fi module, database IC, cloud service, iOS and Android app. i-Ctrl now supports voice control via Alexa and Google home assistant.

Users can integrate many i-Ctrls with one Amazon echo or google home enable multiple scenarios including saying "Alexa, turn off the home AC." "Hey Google, turn on the office AC." to turn off home AC and turn on office AC before heading work.

AIFA i-Ctrl has been awarded 2018 Taiwan Excellence and 2019 Computex Best Choice award.

Company background

AIFA is an infrared signal database owner which is the heart of i-Ctrl and keeps it always updated. Due to our 26 year experiences in manufacturing universal remotes worldwide, the database covers global markets including Europe, USA, Japan and Asia.
