

## **AIFA Brings i-Ctrl Smart Remote Control Box to IFA Berlin 2019**

IFA Berlin 2019 is right around the corner!

AIFA will be attending IFA 2019 (September 6 to 11 in Berlin). AIFA sincerely welcomes you to visit them. Booth: Hall 25, Stand 415

Now it's time to enjoy the world of advanced technology by controlling all your remote devices via your smartphone from anywhere in the world.

i-Ctrl and its app runs on iOS and Android devices and controls TV, set-top boxes, air conditioners, DVD & blue ray players, AUX, fans, lights and more.

i-Ctrl enables home automation with smartphone or tablet and acts as the central hub of smart home products, allows you to manage and secure your home remotely via Wi-Fi and IR transmission. It enables a complete smart home ecosystem by turning the traditional home appliances into smart appliances.

The scheduling and macro is programmed and easy to adjust via the app.

Users can also create unlimited one-touch activities that group devices into customized experiences. For example, when you are away from home, you can easily turn off the TV, lights, air conditioners, etc...at the same time with one click.

i-Ctrl can also integrate with Alexa and Google home assistant. Making your home fully automated and controllable by your voice with i-Ctrl.

- Compatible with almost any infrared remote-controlled traditional home appliances
- Works with Amazon Alexa and Google Assistant to enable voice control
- Easy to setup. Upgrade home to smart home immediately.

AIFA i-Ctrl has been awarded 2018 Taiwan Excellence and 2019 Computex Best Choice award.

The simplicity in installation and daily use and an attractive price also makes it a highlight in the AIoT era. Last but not least, AIFA is also in the process of

developing different kinds of IoT products such as Wi-Fi lights.
