

CAUTION: KEEP OUT OF REACH OF CHILDREN

PERMEX Insect Dust

Active Ingredient 25g/kg permethrin in the form of dust.

PERMEX Insect Dust is a ready to use, residual insecticide, which controls and prevents infestations of: cockroaches, ants, silverfish, beetles and wasps.

It may be applied in commonly used powder sprinklers or powder blowers.

It may be used in presence of electric motors or switchgear.

For wasps nests, deposit at least 40g into the next entrance.

Apply dust to areas, leaving a visible deposit, where insects are most likely to crawl through it, i.e. skirting boards, cracks, crevices, nests, brickwork etc. Leave dust undisturbed as long as possible. Repeat application when and if necessary.

PRECAUTIONS

Do not breathe dust. Wear gloves when using. Wash hands and exposed skin before meals and after work. Do not allow to contact food, food preparation surfaces or equipment. Toxic to fish avoid contamination of any water supply with chemical or used containers. Do use in meat or dairy establishments
