

NARA BLOCKS

THE FIRST ALLERGEN FREE, NON-TOXIC RODENT MONITOR

Allergen-management has become a major topic in many food product companies. NARA is especially designed for this specific purpose. Regulations as well as many food standards now prohibit the use of anticoagulants for monitoring purposes.

Only after the determination of rodent activity anticoagulants may be used subject to stringent restrictions. Food-based monitoring blocks have a critical disadvantage as they serve as food for rodents, helping them to survive and increase the risk of rising reproduction. Moreover, most are prone to mould formation in damp areas. In other areas they are often infested by non-target organisms, e.g. flour beetles, cockroaches, ants and snails.

NARA BLOCKS KEY FEATURES

- ✓ **Identify the species;** With NARA Bloc you can tell by the visible bite marks in the material what species are present.
- ✓ **The go-to solution for food or pharma sites;** But also for any outdoor environment, in which rodenticide monitoring is a concern due to secondary poisoning, restrictions by regulations or standards.
- ✓ **Lasts 3 to 12 months in any environment;** Indoors and outdoors and therefore beats the features of any organic monitor.
- ✓ **The worlds biggest wildlife sanctuaries;** Rely upon NARA for professional monitoring in the toughest rain forest conditions.

NARA BLOCKS PRODUCT DETAILS

NARA Bloc Fish	RDTF1006
NARA Bloc Meat	RDTF1007
NARA Bloc Vanilla	RDTF1008
NARA Bloc Chocolate	RDTF1009

PERFORMANCE

The safest most effective options for the food industry.

NARA SPRAY

ATTRACTIVE SPRAY-MONITORING FOR RATS AND MICE

Spray NARA Spray onto your stations and lay a trail towards them in order to improve your results.

NARA SPRAY KEY FEATURES

- ✓ **Supports non-toxic monitoring;** By allowing you to leave a trail to lure rodents to traps and mask the smell of plastic stations.
- ✓ **Beneficial monitor;** Can be used to spray any station to mask smells of plastic or human odours and make the stations more attractive.
- ✓ **Highly attractive;** For all commensal rodents.
- ✓ **With handy holster and belt;** So you can always have it with you when doing rodent work.

NARA SPRAY PRODUCT DETAILS

NARA Spray Meat flavour aerosol	500 g (RDTF1001)
NARA Spray Chocolate flavour aerosol	500 g (RDTF1002)

PERFORMANCE

Rodent stations and traps are made of plastic. Plastic has its own chemical smell. If you hold a lighter to anything plastic it smells extremely toxic. This can be compared to what rodents smell when entering a rodent station. Rodents sense of smell is many times better than humans.

NARA Spray seals away the plastic smell, making stations attractive to rodents. The scent lasts around 2-3 months and needs to be renewed, but after repeated application it will slowly soak into stations. Renewing the scent every few months adds fresh attraction to stations luring in new generations of pests.

NARA Spray can also be used to spray a bait-line towards stations, to lure rodents from the bushes or holes into the station. The theory comes from hunting, where hunters drag a dead rabbit to a trap to catch foxes. Scientific trials showed that rodents are curious and follow the smell over large distances, even up to 40 m, with their sensitive noses - like an irresistible cookie trail.

The spray is not only an aroma scent, but it also feeds them with a nutritious vegetable oil, so they feel the desire for more. It consists of 100% vegetable rapeseed oil which is super nutritious for rats and mice and has its own natural scent that is refined with an added meat/beef aroma mixture.

Secure Gel Pads

Secure Stations quickly, but also remove them without damage if necessary. Clients and auditors see them as a hygienic to alternative.

- Reusable up to 50 times - Leave no residue or stains - Best for insect monitors or bait boxes
- IFS and AIB approved - For permanent or temporary control points - Sticks to most surfaces
- Holds up to 1.5 kg.
