

Platform Overview

Find out how your Safety & Compliance efforts can be modernized with our all-in-one, cloud-based solution.

The screenshot displays the SafetyAMP platform interface with several key components:

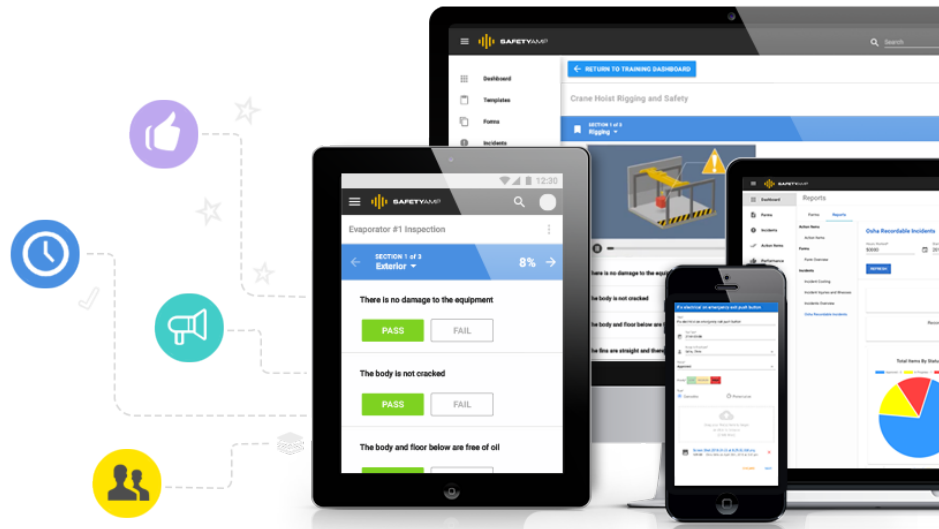

- Navigation Bar:** Includes icons for Incident, Audit, Observe, Actions, and Contractors, along with a "Schedule" button.
- Training Compliance:** A donut chart showing 82% compliance.
- Area Safety Audit Workflow:** A central panel titled "Area Safety Audit Workflow" (IN PROGRESS) with the following questions and options:
 - Are all hazardous waste containers properly identified and labeled? [View Example](#)
 - Yes (Green button)
 - No (White button)
 - Is the work area free and clear of hazards?
 - Yes (White button)
 - No (Red button)
 - Rate the cleanliness of the work area
 - Progress bar from 0 to 4, currently at 4.
- Automate:** A QR code and "Automate" button.
- Total Recordable Incident Rate:** A line chart titled "BY LOCATION".
- Bottom Navigation:** Includes icons for MOC, JSA / JHA, Hazards, SDS Docs, and App Builder.

TRUSTED BY LEADING COMPANIES

Product Overview

Transform your safety culture with powerful, easy-to-use software built to boost worker engagement.

KEY BENEFITS

Implementing a safety, quality, and compliance system can be a key driver of continuous improvement for many organizations. Our cloud-based EHS solution improves worker safety, standardizes processes and policies, increases participation, and automates time consuming tasks to allow your teams focus on higher value activities.

11 months

Return on Investment

Most customers see a payback on compliance software within the first year

70%

More Proactive

The average increase of proactive activities in the first year of implementation

60%

More Accurate

Increased recordkeeping accuracy for OSHA and other regulatory compliance requirements

20%

Wage Savings

Supervisors can focus on higher-level tasks that lead to large gains elsewhere

POWERFUL FEATURES

- ✔ Mobile Forms
- ✔ Incident Management
- ✔ Training Management
- ✔ Analytics
- ✔ API Integrations
- ✔ Dashboard
- ✔ Near Miss Reporting
- ✔ Hazards & Observations
- ✔ Custom Reports
- ✔ Employee Sync
- ✔ Audits & Inspections
- ✔ Corrective Action
- ✔ Automation Builder
- ✔ Data Security
- ✔ Roles & Permissions
- ✔ Checklists
- ✔ Asset Management
- ✔ Custom Look and Feel
- ✔ Offline Forms
- ✔ Data Import / Export

Build your best safety program - ever.

Our industry leading mobile safety platform helps today's workforces accelerate their EHS strategy, exceed their targets, and deliver dollars - not injuries. Enter the future of safety reporting - all within a budget suitable for organizations of any size.

Safety & Quality Mobility

On the floor or in the field, SafetyAmp is on any device, anywhere.

Automated Notifications

Spend more time focusing on your people and continuously improving.

Safety Your Way

SafetyAmp can be configured to fit your business processes, systems, and people.

EASY TO USE MODULES

 **Audits & Inspections**

 **Incident Management**

 **Training Tracking**

 **Document Control**

 **Observations**

 **Action Items**

 **Contractors**

 **Analytics**

 **Configurable Apps**

CONFIGURE APPS FOR:

- Near Miss Reporting
- Hazards & Risk
- JHA / JSA
- Employee Recognition
- Safety Committee Meetings
- Quality Non-Conformance
- Management of Change
- Environmental Compliance

Mobile Auditing

Go paperless by creating and scheduling drag-and-drop forms for inspections, audits, observations, and more.

CREATE INSPECTIONS IN MINUTES

Use our drag-and-drop form builder to create powerful inspection and observation forms.

NO WIFI NO PROBLEM

Inspections can be completed even if you're experiencing loss of network connectivity.

AUDIT ANALYTICS

Understand your data and discover new insight from data being collected from inspections.

SCHEDULE AND ASSIGN

Audits can be dispatched, scheduled, or completed ad-hoc for your workforce.

EASILY HANDLE DEFECTS

Take photos, add notes, or suggest corrective action when non-conformances are discovered.

USE ANY DEVICE

Audits can be completed whether you're using a smartphone, tablet, or desktop.

KEY BENEFITS

- ✓ Create a proactive safety culture and complete more proactive activities in half the amount of time.
- ✓ Get away from paper and external systems to consolidate your audit processes into one standard system.
- ✓ Foster more collaboration across auditors with risk and compliance personnel.
- ✓ Give your team higher visibility into risks and controls that aren't being mitigated effectively.
- ✓ React more quickly to risks to prevent future incidents from occurring.

Incident Management

From initial report to investigation and real-time reporting, our customizable Incident module helps your teams identify, correct, and mitigate hazards and risk.

INCIDENT REPORTING

Simplify, standardize, and control your incident reporting processes.

TAKE ACTION

Select configurable root causes, store 5-why analysis, and schedule corrective actions.

PREDICTIVE ANALYTICS

Identify trends, patterns, metrics, and indicators with the included analytics suite.

MANAGE INCIDENTS YOUR WAY

From injury types to incident classifications, re-label, re-organize, and customize as needed.

AUTOMATION AND ALERTS

Trigger forms, notifications, and even automate your 300A summary reporting.

USE ANY DEVICE

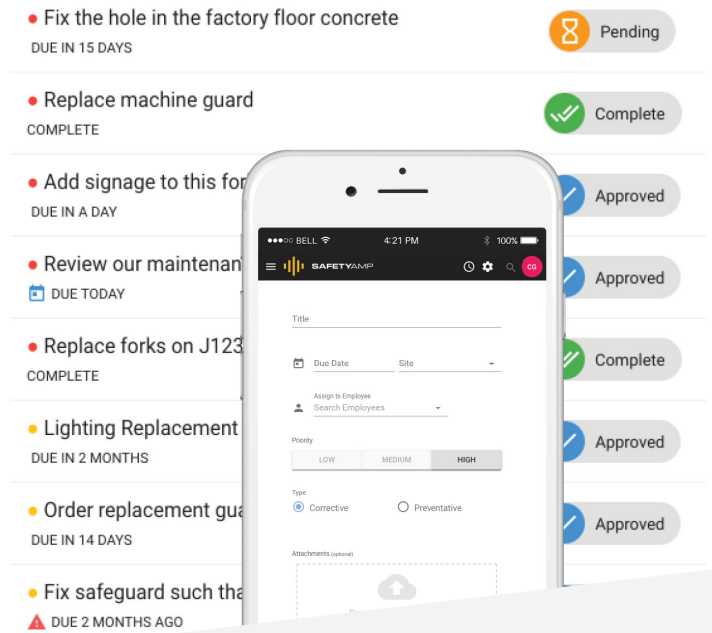

Incidents can be reported whether you're using a smartphone, tablet, or desktop.

KEY BENEFITS

- ✔ Standardize incident reporting procedures and remove communication barriers.
- ✔ Increase reporting access and collect more accurate data quickly.
- ✔ Ensure that incident and hazard data is shared and your recordkeeping is compliant.
- ✔ Identify trends and patterns of incident data to add predictability and prevent future issues.
- ✔ Configure Incident reporting to align with your organization's policies and procedures.

Corrective Action

Streamline, prioritize, and schedule your corrective and preventative action workflows end-to-end and quickly mitigate hazards.

INCREASE ENGAGEMENT

Boost feedback and collaboration with action item capture from audits and observations.

ATTACHMENTS

Take photos or upload any other kind of proof-of-work or documentation.

REPORTING

Realtime reports provide new visibility into action items by location, severity, and more.

NOTIFICATIONS

Keep workers up-to-date and informed of priority with overdue and expiring soon alerts.

AUTOMATION AND ALERTS

Trigger action items when other events occur, such as hazard and incident reports.

USE ANY DEVICE

Action items can be completed whether you're using a smartphone, tablet, or desktop.

KEY BENEFITS

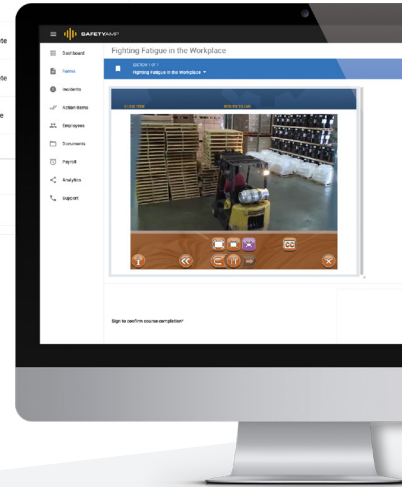

- ✓ Streamline your CAPA workflows from initial report through completion.
- ✓ Automate action item workflows and trigger new items when certain conditions are met.
- ✓ Automated reminders help get corrective action communicated, scheduled, and completed.
- ✓ Corrective action can be suggested and scheduled as soon as non-conformances are identified.
- ✓ Workers in the field or in a facility can complete corrective action on-the-go without any paperwork.

Employee Training

Deliver online training easily, track certificates, and simplify your training compliance reporting.

Cameron Brown Plant Manager (Engineering) Full Time			
Training Requirements			
COURSE	EXPIRES	STATUS	
Fighting Fatigue in the Workplace <small>OFFICE EMPLOYEES</small>	—	Incomplete	
GHS Safety Data Sheets <small>OFFICE EMPLOYEES</small>	—	Incomplete	
Welding Certification Upload	October 1st, 2021	Complete	
Certifications			
NAME	COMPLETED	EXPIRES	
Welding Certification Upload	October 8th, 2018	October 1st, 2021	

ONLINE TRAINING

Courses can be linked to online training and are fully customizable with your content.

MANAGE REQUIREMENTS

Assign and schedule training requirements individually or by role.

TRAINING COMPLIANCE REPORTS

Visualize course performance, track expiring or past due certificates, and more.

ONLINE OR OFFSITE

Train users onsite, offsite, online, or offline. All courses and certificates can be managed.

SCORM CAPABLE

Our learning management system is capable of delivering your SCORM content to learners.

USE ANY DEVICE

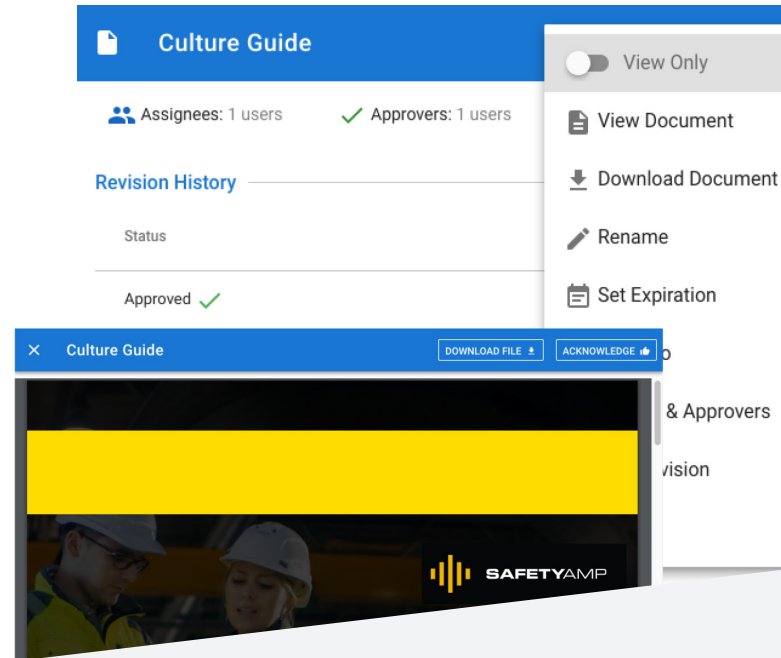

Training can be taken and tracked using your laptop, smartphone, or tablet.

KEY BENEFITS

- ✔ Quickly set employee training requirements and know exactly where employees stand.
- ✔ Boost the overall training compliance of your organization across multiple locations.
- ✔ Utilize online training where it most effective to reduce competence gaps.
- ✔ Avoid lost certificates and keep everything in one central, secure location
- ✔ Eliminate excel and simplify training compliance reporting for upcoming training, past due certificates, and approvals.

Document Control

Centralize your policies and procedures and boost worker engagement by tracking document-related activity.

DOCUMENT ACTIVITY METRICS

Understand document performance as a leading indicator by tracking access statistics.

DOCUMENT VIEWER

Most file types can be viewed directly in the application without external programs

DOCUMENT REPORTS

Identify acknowledgements, accesses, and more with our built-in document reports.

REVISION AND APPROVALS

Add revisions to documents and manage the document approval process end-to-end.

INSTANT, ACCURATE SEARCH

Engagement and document usage increases when procedures are easy to find

USE ANY DEVICE

Documents can be accessed whether you're using a smartphone, tablet, or desktop.

KEY BENEFITS

- ✓ Keep all policies and procedures in one central, secure location.
- ✓ Increase engagement and participation when procedures are easily found and viewed
- ✓ Turn document access metrics into leading indicators that help identify problem areas
- ✓ Workers can acknowledge changes to policies and procedures instantly
- ✓ Reduce need for managing access to external document viewing programs

Asset Management

Track and barcode machines, equipment, and other assets with scannable inspection forms, histories and linked documents.

Asset

Name: Conveyor

Serial: 012345

Status: Active

 Inspect

BARCODING

Generate asset barcodes for easier access to inspection forms, history, and documents.

CUSTOM ATTRIBUTES

Model your asset data with as many custom attributes as needed.

PREDICTIVE ANALYTICS

Gain realtime insight into asset non-conformance patterns and trends.

ASSET INSPECTIONS

Create inspections and checklists for all machinery and equipment.

ASSET AUTOMATION

Automate asset inspection schedules, action items, and more.

USE ANY DEVICE

Assets can be managed whether you're using a smartphone, tablet, or desktop.

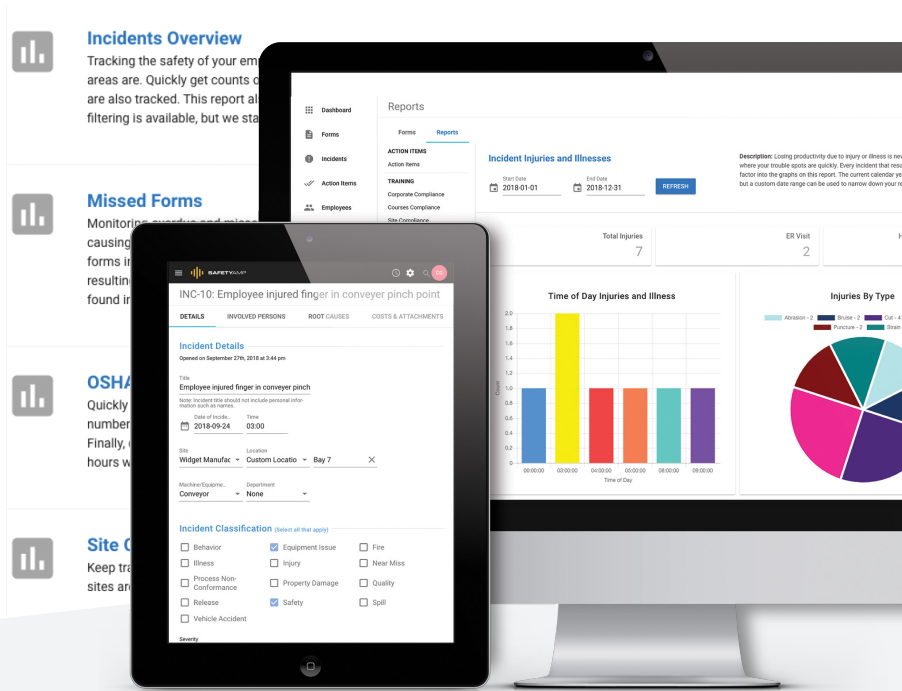

KEY BENEFITS

- ✓ Increase visibility of inspection history and equipment documentation
- ✓ Configurable asset attributes and types
- ✓ Scannable equipment barcodes launch the app and reduce time needed to complete inspections
- ✓ Asset reporting can track equipment failure and other non-conformances

Analytics & Reporting

Track leading indicators, KPI's, lagging indicators, and identify critical patterns and trends developing in your data.

FORM ANALYTICS

Complete visibility into safety data like audit scores, frequency, failures, and missed audits.

REPORT LIBRARY

Built-in reporting for forms, incidents, action items, documents, training, and more.

PREDICTIVE ANALYTICS

Realtime analytics adds predictability to your reporting and helps prevent future incidents.

BEAUTIFUL CHARTING

Our analytics suite comes pre-loaded with easy-to-read tables and bar/line/pie charts

CUSTOM REPORTS

Custom reports can be created to satisfy any reporting requirement

USE ANY DEVICE

Check out any report while on-the-go, anytime or anywhere.
