Version 1.3

134 countries

General Notes

- Total vote counts exclude invalid votes.
- All Thiessen polygons across countries use consistent country borders from geoBoundaries. In some rare cases, like Taiwan, where the geoBoundaries lack precise definition, dated OpenStreetMap boundaries are used instead.
- A single dash with a space on either side, " - ", in the party column indicates a coalition between two or more parties; an em-dash is used when either a dash or an em-dash is formally in the party's name.

52 Indonesia

52.1 Notes

- Villages are matched to boundaries via a two-step process, whereby the name of the village is geocoded and the resulting latitude-longitude are matched to village boundaries.
- Identifier code NAME columns (i.e., NAME1_b, NAME2_b, etc.) change between 2019 and 2024 election, but the names of places themselves (provinsi, kota, kecamatan, kelurahan) are largely consistent across years.
- Supplementary shapefiles for Indonesia are provided at the NAME4 (village) level.
- Smallest physical unit: Polling Station
