General Notes

- Total vote counts exclude invalid votes.
- All Thiessen polygons across countries use consistent country borders from geoBoundaries. In some rare cases, like Taiwan, where the geoBoundaries lack precise definition, dated OpenStreetMap boundaries are used instead.
- A single dash with a space on either side, " - ", in the party column indicates a coalition between two or more parties; an em-dash is used when either a dash or an em-dash is formally in the party's name.

76.1 Notes

- Votes are first-count (first-preference) votes under the Single Transferable Vote, summed from candidates to parties. Later-count transfers are not recorded.
- The 13 electoral divisions are the finest published grain. Ballot boxes are mixed within each division before counting, so no locality or polling-station results exist.
- Geometry is Missing for all years. Division boundaries are redrawn before each election and are published only as street-level descriptions, not as maps or polygons.
- total_votes is the division's published valid vote, and turnout_reg is valid votes over the revised electoral register, so it runs a few points below the official turnout, which counts all ballots cast.
- Smallest physical unit: Electoral Division
