Version 1.3

134 countries

November 5, 2026

General Notes

- Total vote counts exclude invalid votes.
- All Thiessen polygons across countries use consistent country borders from geoBoundaries. In some rare cases, like Taiwan, where the geoBoundaries lack precise definition, dated OpenStreetMap boundaries are used instead.
- A single dash with a space on either side, " - ", in the party column indicates a coalition between two or more parties; an em-dash is used when either a dash or an em-dash is formally in the party's name.

82.1 Notes

- Results are for the 92 local constituencies of the House of Representatives, with the same boundaries and seat counts in 2016, 2021 and 2026. The regional and national lists are reported only at region or national level and are not included.
- Vote figures come from the Hespress election portal, which republishes the Ministry of the Interior's final results. The 2021 figures match the Ministry's own results file list for list, and the 2016 figures match Tafra's compilation. Hespress has no 2016 page for El Hajeb, so its 2016 lists come from Tafra.
- total_votes is the sum of valid list votes in the constituency. Registered voters and invalid ballots are not published by constituency.
- The 65 constituencies that are a whole province or prefecture use geoBoundaries ADM2 polygons. 23 split constituencies are unions of the OpenStreetMap communes and arrondissements named in Décret n° 2-11-603 (2011). Four split constituencies (Rabat-Océan, Rabat-Chellah, Marrakech-Ménara and Marrakech-Guéliz-Ennakhil) have Missing geometry because the decree divides them by units with no published boundaries.
- Constituencies in Western Sahara are included. Laâyoune, Boujdour, Es-Semara, Oued Ed-Dahab and Aousserd lie wholly or almost wholly in the territory, and Tarfaya and Assa-Zag straddle its northern limit.
- Smallest physical unit: Local Constituency (circonscription électorale locale)
