General Notes

- Total vote counts exclude invalid votes.
- All Thiessen polygons across countries use consistent country borders from geoBoundaries. In some rare cases, like Taiwan, where the geoBoundaries lack precise definition, dated OpenStreetMap boundaries are used instead.
- A single dash with a space on either side, " - ", in the party column indicates a coalition between two or more parties; an em-dash is used when either a dash or an em-dash is formally in the party's name.

104.1 Notes

- Results are reported at the polling-box level (boxes A1(a), A1(b), etc.) within each constituency. Polling boxes are not individually geolocated, so each box is assigned its constituency's polygon and centroid and is therefore flagged as a geocode duplicate.
- Constituency polygons are constructed from OCHA cod-ab settlement boundaries: each settlement is assigned to a constituency by matching its name to voter addresses in the electoral register and taking the majority registered constituency, unmatched settlements are filled by the nearest matched settlement within the same quarter, and settlements are then unioned per constituency. The split-quarter seats (the five Castries constituencies and the Gros Islet/Babonneau, Vieux Fort, Micoud, and Dennery pairs) carry some boundary-reconstruction uncertainty because their settlement-to-seat assignment is inferred from voter registrations rather than an official schedule.
