

# LIBERATORMAX TEAM COMMUNICATIONS SYSTEM

Introducing LiberatorMAX, the most advanced system for team communications. Multi-person intercom system that is versatile and simple to use, making it a great solution for communication needs in many applications. Turn the headset on to be instantly connected with other headsets. No installation or base station is required, giving you the freedom to move around without worry.

- Up to 8 intercom (unlimited amount of listen-only headsets).
- 8 talk group channels.
- Ability to integrate portable radio into the headset allowing the user to simultaneously communicate over the portable radio and intercom.
- Range: Up to 1,500 feet (line of sight).
- Premium dual-speaker headset with noise reduction rating of 23dB.
- “Instant On” Advanced motion sensor technology is integrated into the headset. The headset shuts down after 15 minutes of inactivity and will automatically turn back on when the user picks up the headset.
- Full duplex intercom communications without any push-to-talk (PTT) required.
- Available in Behind-the-Head Style.
- 15 hours battery life.
- Different charging options available.
- Charge anywhere with either a 120V or 12V/24V power source.
- Heavy-duty and durable design to extend life in a demanding environment. Perfect for rugged industrial situations.
- No installation or base station required – Just turn on your headset and start talking.
- Carrying case available.
