

SAFETY WARNINGS

Spectacles are not intended for young children. Please visit support.spectacles.com for more information about Spectacles, including product support and returns.

WARNINGS – READ BEFORE USING

PAY ATTENTION

Using your Spectacles' camera may increase the time it takes to react to hazards. Spectacles also contain visible LED lights that may distract you. Disable notifications and don't use the Spectacles' camera in situations that require your full attention, or where distractions could put you or others in harm's way.

AVOID FACIAL INJURIES

Don't wear Spectacles while participating in activities with risk of fall or impact, such as high-impact sports and activities where you wouldn't normally wear sunglasses. If you're doing activities for which eye protection is advisable, use certified protective eyewear.

DRIVING AND OPERATING VEHICLES

Disable notifications and use caution while driving or operating a vehicle. Follow local laws and regulations applicable to wearing eyewear and using devices while operating vehicles.

MAGNETS AND MEDICAL DEVICES

Spectacles and the charging case contain magnets and components that emit radio waves, which could affect the operation of medical devices such as pacemakers and other implantable devices, hearing aids and insulin pumps. If you have an electronic medical device, consult your doctor or the device manufacturer before using Spectacles, and keep the Spectacles and charging case at an appropriate distance. Stop using Spectacles if you observe any interference with a medical device.

3D VIEWER

If you use the included 3D Viewer or other viewer/headset to view Spectacles content, be sure to read and follow safety warnings accompanying the viewer.

AIR TRAVEL

Check applicable aviation security administration restrictions on personal electronics before flying with Spectacles. Spectacles and the charging case contain lithium ion batteries, and should not be placed in checked luggage when flying.

CHARGING

Use only the provided charging cable (or an agency-approved USB-C cable) and an agency-approved power adapter to charge your charging case. Keep the charging areas on the Spectacles and charging case clear of debris and residue. To clean charging areas, wipe with the included cleaning cloth, mildly dampened if needed.

DAMAGED SPECTACLES

To avoid potential injury, don't wear or use damaged Spectacles. Don't try to repair your Spectacles yourself. If they're damaged, contact support.spectacles.com.

OVERHEATING

Your Spectacles shouldn't overheat or cause thermal discomfort during normal use. If they do, stop using them and contact support.spectacles.com.

ELECTRICAL COMPONENTS

Your Spectacles contain electrical components, so follow the same precautions you would for any electronic device. Don't expose them to water or other liquids, and don't use them near open flames or exposed electrical hazards, in extreme conditions, while the battery is charging, or if you see a leaking battery or battery damage. Don't try to modify any part of your Spectacles.

BATTERY REMOVAL

Don't attempt to remove or replace the battery in the Spectacles or charging case. Doing so can cause a safety hazard.
