

SAFETY WARNING

Spectacles are not intended for young children. Please visit support.spectacles.com for more information about Spectacles, including product support and returns.

WARNINGS – READ BEFORE USING

Pay attention to your surroundings. Always use caution when wearing Spectacles for your safety and the safety of others. Spectacles' camera, display, AR effects, audio, notifications, LED lights and other features can distract you and increase the time it takes to react to hazards.

- Don't use the Spectacles' display, camera, audio or other features in situations that require your full attention or where distractions could put you or others in harm's way.
- Be aware of potential fall, trip and bump hazards as well as breakage risks around you when using Spectacles to avoid injury and property damage.
- Don't let children use Spectacles without adult supervision.
- Take care when using the Spectacles display and AR effects.
- Use the Spectacles display and AR effects only in a safe environment.
- Take regular breaks while using the Spectacles display and don't use the display for extended periods of time.
- Stop using Spectacles immediately if you experience dizziness, nausea, eye strain, motion sickness or any other discomfort.
- Consult your doctor before using Spectacles if you are pregnant, prone to seizures or have a serious medical, vision or psychiatric condition.

Driving vehicles and operating equipment

Don't use Spectacles while driving any vehicle or while operating equipment that requires your full attention.

Avoid facial injuries

Don't wear Spectacles while participating in activities with a risk of fall or impact, such as high impact sports and activities where you wouldn't normally wear sunglasses. If you're taking part in activities where eye protection is advisable, use certified protective eyewear.

Magnets and medical devices

Spectacles and the charging case contain magnets and components that emit radio waves, which could affect the operation of medical devices, such as pacemakers and other implantable devices, hearing aids and insulin pumps. If you have an electronic medical device, consult your doctor or the device manufacturer before using Spectacles and keep Spectacles and the charging case at an appropriate distance. Stop using Spectacles if you observe any interference with a medical device.

Air travel

Check the applicable aviation security administration's restrictions on personal electronics before flying with Spectacles. Spectacles and the charging case contain lithium ion batteries and should not be placed in hold luggage when flying.

Charging

Use only the provided charging cable (or agency-approved USB-C cable) and an agency-approved power adapter to charge your Spectacles and charging case. Keep the charging areas on Spectacles and the charging case clear of debris and residue. To clean the charging areas, wipe with the cleaning cloth provided, mildly dampened if needed.

Damaged Spectacles

To avoid potential injury, don't wear or use damaged Spectacles. Don't try to repair your Spectacles yourself. If they're damaged, contact support.spectacles.com.

Overheating

Your Spectacles shouldn't cause thermal discomfort during normal use. If they do, stop using them and contact support.spectacles.com.

Electrical components

Your Spectacles contain electrical components, so follow the same precautions you would for any electronic device. Don't expose them to water or other liquids. Don't use them near open flames or exposed electrical hazards, in extreme conditions or if you see a leaking battery or battery damage. Don't try to modify any part of your Spectacles.

Battery removal

Don't attempt to remove or replace the battery in Spectacles or the charging case. Doing so can result in a safety hazard.
