

(Green) Erasmus 2021-2027

A more environmental friendly
EU Programme for education,
training, youth and sport

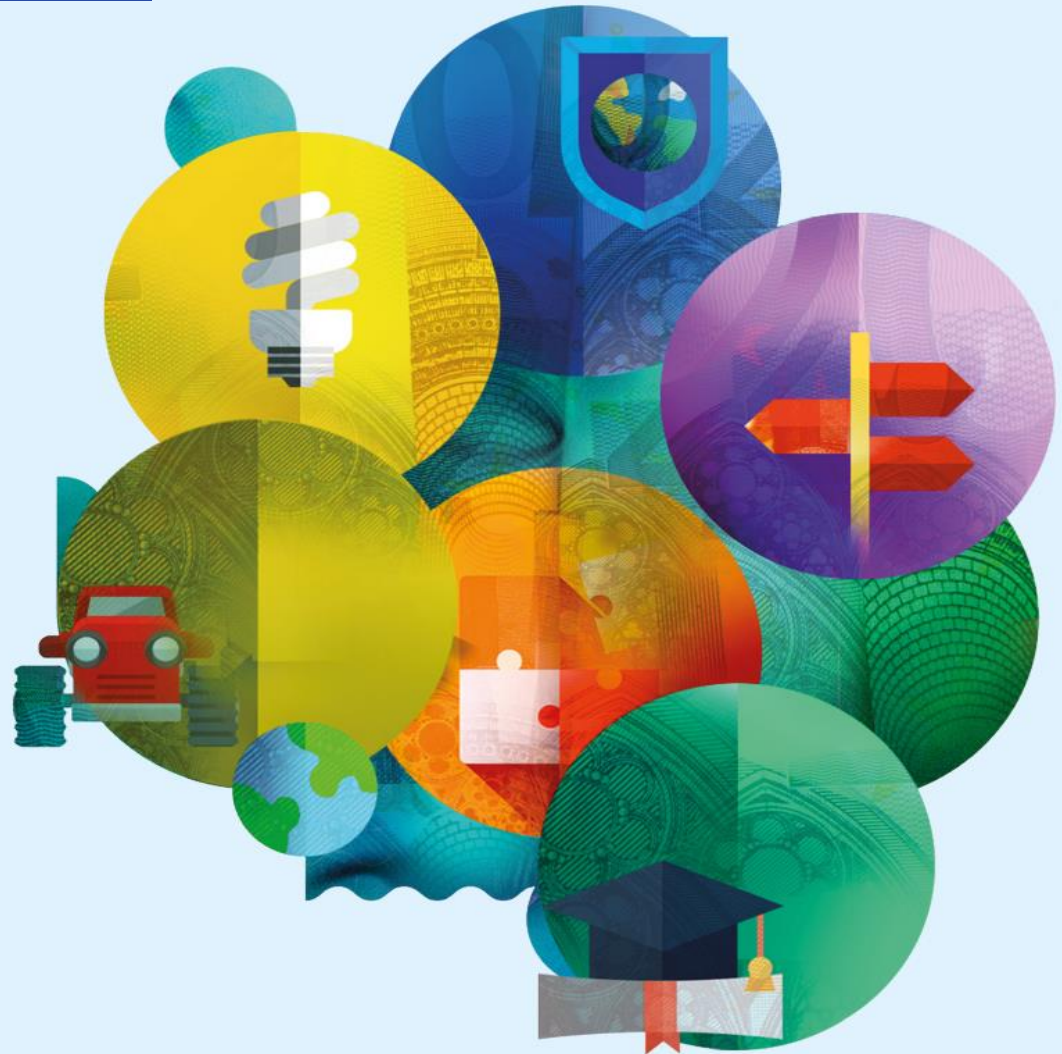

SeAMK International Virtual Week

José Manuel Fernández Arroyo

Head of Sector – Erasmus+ Programme Implementation

Unit B4 – Erasmus+ Coordination - DG EAC

Highlights – Erasmus 2021 - 2027

Evolution not revolution

...while making the programme...

- ❑ more inclusive and accessible
- ❑ broader and forward-looking
- ❑ more participatory and focussed on developing EU awareness
- ❑ more green
- ❑ more international
- ❑ more digital
- ❑ in synergy with other EU instruments
- ❑ simpler

A greener Erasmus+ (I)

A strategy towards a more environmental friendly EU Programme for education, training, youth and sport

- **Direct actions to lower the Erasmus Programme carbon footprint**
- **Use the new programme to raise more environmental and climate change awareness in participants across the different actions.**

A greener Erasmus+ (II)

- **More projects:**
 - addressing "environment and climate action" as a thematic topic
 - adopting practices and working methods that reduce the environmental impact of implemented activities
- **Provide guidance and training, facilitate exchange of good practices and experiences**
- **Be part of it!: go further and apply the environmental-friendly approach in the daily work of National Agencies, National Authorities, Commission and organisations**

*Thank you for
your attention*

Merci beaucoup

Kiitos!

Gracias!!
