Stimulating Innovation eXperiments in Food prOcessing Live Demonstrators

Goal

Overall goal of SIXFOLD is to facilitate implementation of deep tech within the agri-food sector, by building a robust network of Living Labs across the EU. This network will facilitate collaborative knowledge exchange, allowing for the co-creation and validation of solutions that cater real-world societal needs.

Consortium

SIXFOLD consortium brings together a strong mix of different typer of 4H actors originated from SS4AF partnership. SIXFOLD consortium is embedded in a strong work of agri-food and technology focused Living Labs, companies, regional authorities, regulators and other 4H actors.

Key objectives

- In depth analysis and inventory of the state of play of the Living Labs.
- Develop the SIXFOLD co-creative methodology.
- Develop a updated version of the Operational Handbook of the network of Living Labs.
- Create SIXFOLD Action Plan.
- Raise awerness and enhance knowledge on the existing Living Labs for testing deep tech innovations in the agri-food industry.

Target groups

PRIMARY
Companies & Living Labs from the agri-food industry.
Deep tech solution providers.
Innovation intermediaries, networks, partnerships & EDIHs, european funding agencies.

SECONDARY
Universities, RTOs, research & knowledge community.
Consumers & civil society.
Media.
