## WHY POLOSTONE?

## POLOSTONE SLABS

ENSURING FINESSE FROM  
QUARRY TO CUSTOMER

Our slabs are crafted from 100% natural raw materials and minerals —essentially the same fundamental elements found in granite. Through sintering at a temperature of 1230°C, these elements fuse to form a new, dense material boasting unparalleled technical capabilities. We meticulously source, select, and extract the finest raw materials from certified quarries, ensuring a resilient product without the need for adhesives or resins.

Quartz, feldspar, clay, and kaolin undergo purification, atomization, pressing, and high-temperature heating to constitute the body of our product. This intricate process allows for the integration of multiple layers of colored powders within the slab's body, achieving a meticulously detailed appearance according to the desired specifications.

# INSPIRATIONAL INNOVATION

At PoloStone, innovation means being bold, being different and pushing the limits of materials and machinery to create grandeur and sophisticated surfaces unparalleled in appearance, versatility and longevity while keeping in mind a greener and a cleaner tomorrow.

PoloStone was conceived to empower architects and interior designers to envision spaces aligned with their unique visions, transcending the constraints of conventional formats. That's why we consistently invest in pioneering technical prowess, enabling ceramics to embody a fresh identity —not merely a replication, but a material boasting its own, authentic, and remarkable aesthetic essence.

# WHEN POLOSTONE?

# TECHNOLOGICAL SUPREMACY

State of the Art Machinery, carefully curated raw materials and glazes amalgamated with a passion to create visionary surfaces makes PoloStone a recognition in the Industry.
