

My Career Development after NordSecMob Graduation

Hello, my name is Dawin

Senior Product Security Engineer @ Argo AI

About Me:

I'm from Munich, Germany and an alumni of the NordSecMob program from which I graduated in 2016. Today I work as a Product Security Engineer at a start-up called Argo AI.

SECCLLO/NordSecMob Involvement:

I'm part of SECCLLO's industry advisory board to give feedback about industry needs and to learn about the latest security research topics.

Why I am here? I'm going to talk about my experiences and my view on the NSM program from an alumni perspective.

My NordSecMob Study Track

Career Development after NordSecMob

Landing my first job

- Moved back to Munich in Summer 2016
- Ended up in the Automotive Industry
- Finding a job was easy, but companies didn't know about NordSecMob or Erasmus Mundus degrees

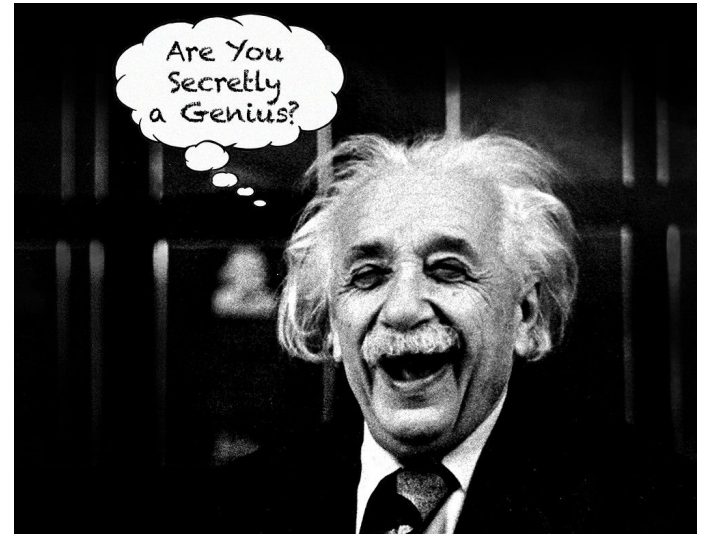

Current Job Market in Germany

- Many Opportunities (Cyber Cyber Cyber)
- Many US companies (Big Tech, FAANG)
- Big Startup culture in Berlin and Munich
- You can find a job without German skills
- Strong labour rights in Germany
- Most companies have a good work/life balance (of course depends on the job)
- You can find good salaries (in most cases US companies pay better)

NordSecMob's overall impact on my life and career

- Made friends / expanded my professional network
- Better Cyber Security knowledge and technical skills
- Better English language skills
- Gained overall life experiences by studying abroad
- Better social skills
- Better self-reflection and awareness
- Increased my own identification with Europe

Thank you NordSecMob!
