APPEARANCES ★ '81, '82 NATIONAL CHAMPIONSHIPS**

INCLEMENT WEATHER POLICY

Every effort will be made to start and/or complete a scheduled softball game. If there is adverse or severe weather prior to the start of the game, the decision to play or delay will rest with input from the Head Coaches (both teams), the Administrator in Charge of Soccer/Softball Operations and the Head Umpire. Once the game has started, the Head Umpire will make the decision to suspend, postpone or cancel play. If the two schools cannot agree, the matter will be referred to the conference office. In the case of tournament play the Tournament Director and Head Umpire will make the decision, prior to game time, to suspend, postpone or cancel play. If the game cannot be rescheduled, it will be eliminated. If the game is halted and cannot be resumed that day, the Administrators of the two schools will make every effort to reschedule the game (the next day, if possible).

The game day event manager will alert the head umpire and head coach when a **lightning advisory** is put into effect. Once a **lightning warning** goes into effect the game day event manager will inform the head umpire, and the game will be suspended for a minimum of 30 minutes, or until given the “All Clear”. If put into a lightning warning, teams must evacuate to either the team administration building, or to the batting cages. However, once a person evacuates to one or the other, they **ARE NOT ALLOWED** to move from one to the other. They must wait the entirety of the lightning warning to leave the premise.

Indoor Hitting Cages: The indoor hitting cages provide an ideal inclement weather location for batting practice during rain condition and when the infield is being otherwise used. Players, coaches and staff movement to and from the hitting cages poses an unacceptable risk as these personnel are fully exposed to possible lightning strikes. Accordingly, during a Weather Warning all personnel in the baseball and softball hitting cages are to remain in the hitting cages, and personnel not in the hitting cages will not attempt to enter the hitting cages, until such time as the warning has been canceled or until 30 minutes after the last strike has occurred within the 8 mile circle as shown on Telvent DTN MxVision Weather Sentry Online.
