Note : these images are examples using "Copay" wallet.

HOW TO PRCHACE SEN TOKEN

STEP 3-5 BY XLM - 2

In your Stellar wallet, input address, amount, and **memo** in sending form, and click "Send" to submit your transaction.

STEP 4-2 CONFIRM TOKENS

Now you can see "SNC" which represents "SEN TOKEN" in your wallet which is equivalent to your funds.

Note : SEN TOKEN's minimum unit is 0.0000001. Thus 0.0000001 SNC is equivalent to 0.04USD in 1st period.(2nd period 0.05USD)

Chapter 5 FAQ

How much is your SEN TOKEN? How Q1 can I calculate amount of token by BTC or XLM.

SEN TOKEN's minimum unit is 0.0000001.

This 0.0000001 SNC is equivalent to 0.04USD in 1st period. 0.05 USD in 2nd period. And we fix the value of BTC as 8000USD and XLM as 0.28USD throughout this token sale period.

So, if you pay 1XLM,

then we will treat you're paying 0.28 USD.

Thus we will send 7 Tokens(0.28 divided by 0.04).

On the other hand, our minimum unit of token is 0.0000001, therefore we will send 0.0000007 SNS to your wallet.

Is there any minimum purchase Q2 amount?

Slf you send amount of BTC or XLM whose value is less than 1 Tokens(0.04USD or 0.05USD), then we won't send you any token.It will ends up with error(insufficient fund status)...

I payed BTC to designated address, but Q3 nothing happens.

It will take $5 \sim 15$ minutes to detect your funds after you made a send transaction.

And if you payed in Bitcoin, it will take $30 \sim 60$ minutes to approve payment.

So it will take $40 \sim 75$ minutes to send our SEN TOKEN to your wallet.
