Meet Setmore.

Setmore offers a free, online scheduling platform for you to connect with your customers. Manage all your appointments through one simple, sleek calendar system and give your business the freedom to grow.

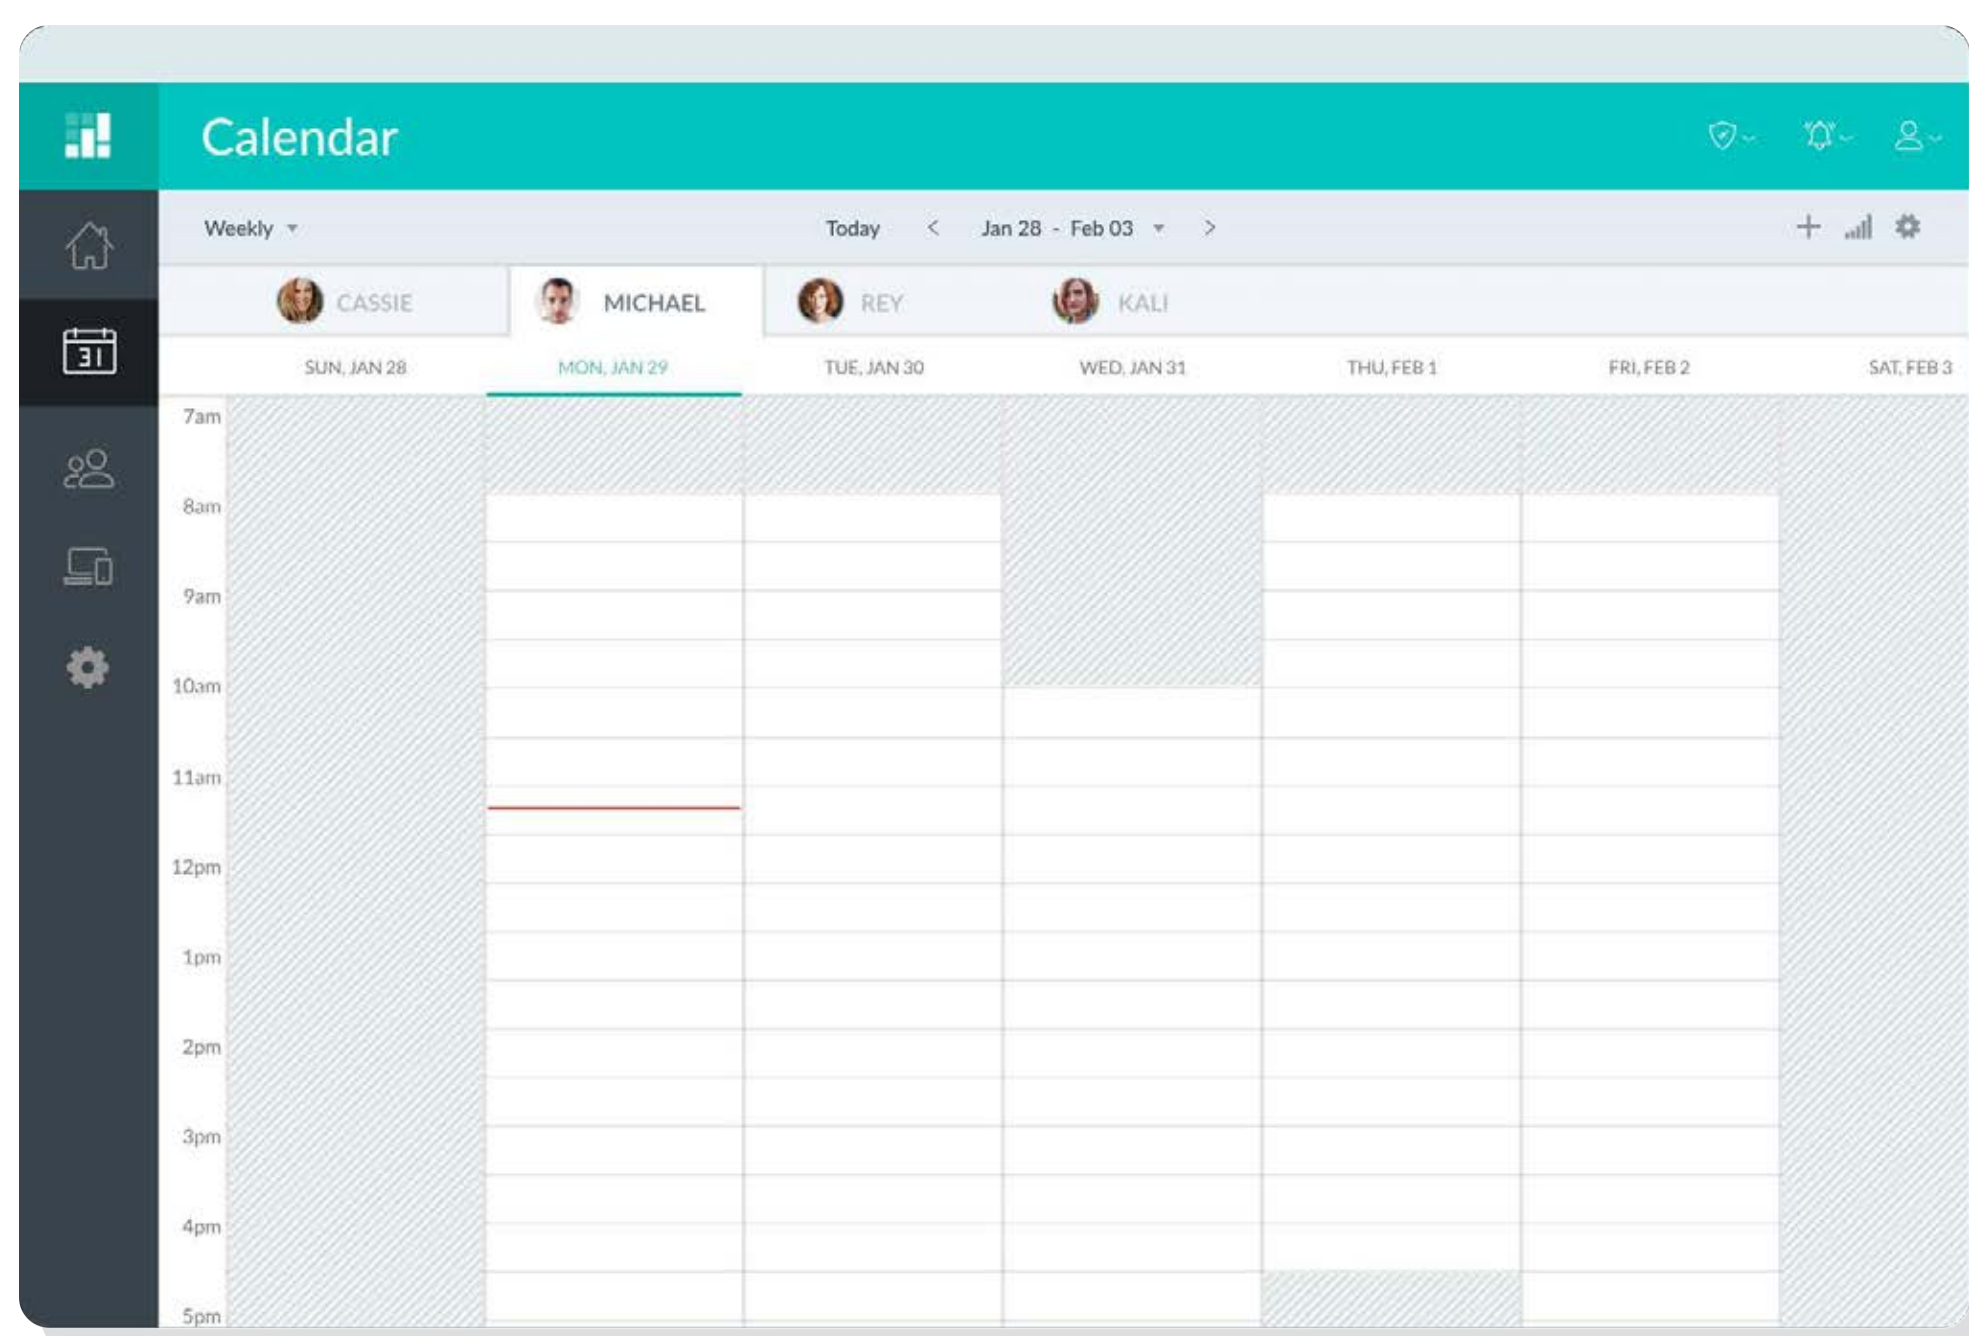

Bring on more customers and sharpen your brand image, while taking charge of your working hours. By listing your availability online, your customers can self-book their desired services. Focus on providing an excellent customer experience and let Setmore handle the paperwork.

The Calendar.

This is where you'll book appointments. Your availability is represented by white space (grey space represents time outside your working hours). The floating red line indicates the current day and time.

Each staff member gets their own calendar, and you can tab through to see each one. The free version of Setmore supports up to 4 staff calendars, but you can add more staff members with Setmore's Premium or Pro subscription.

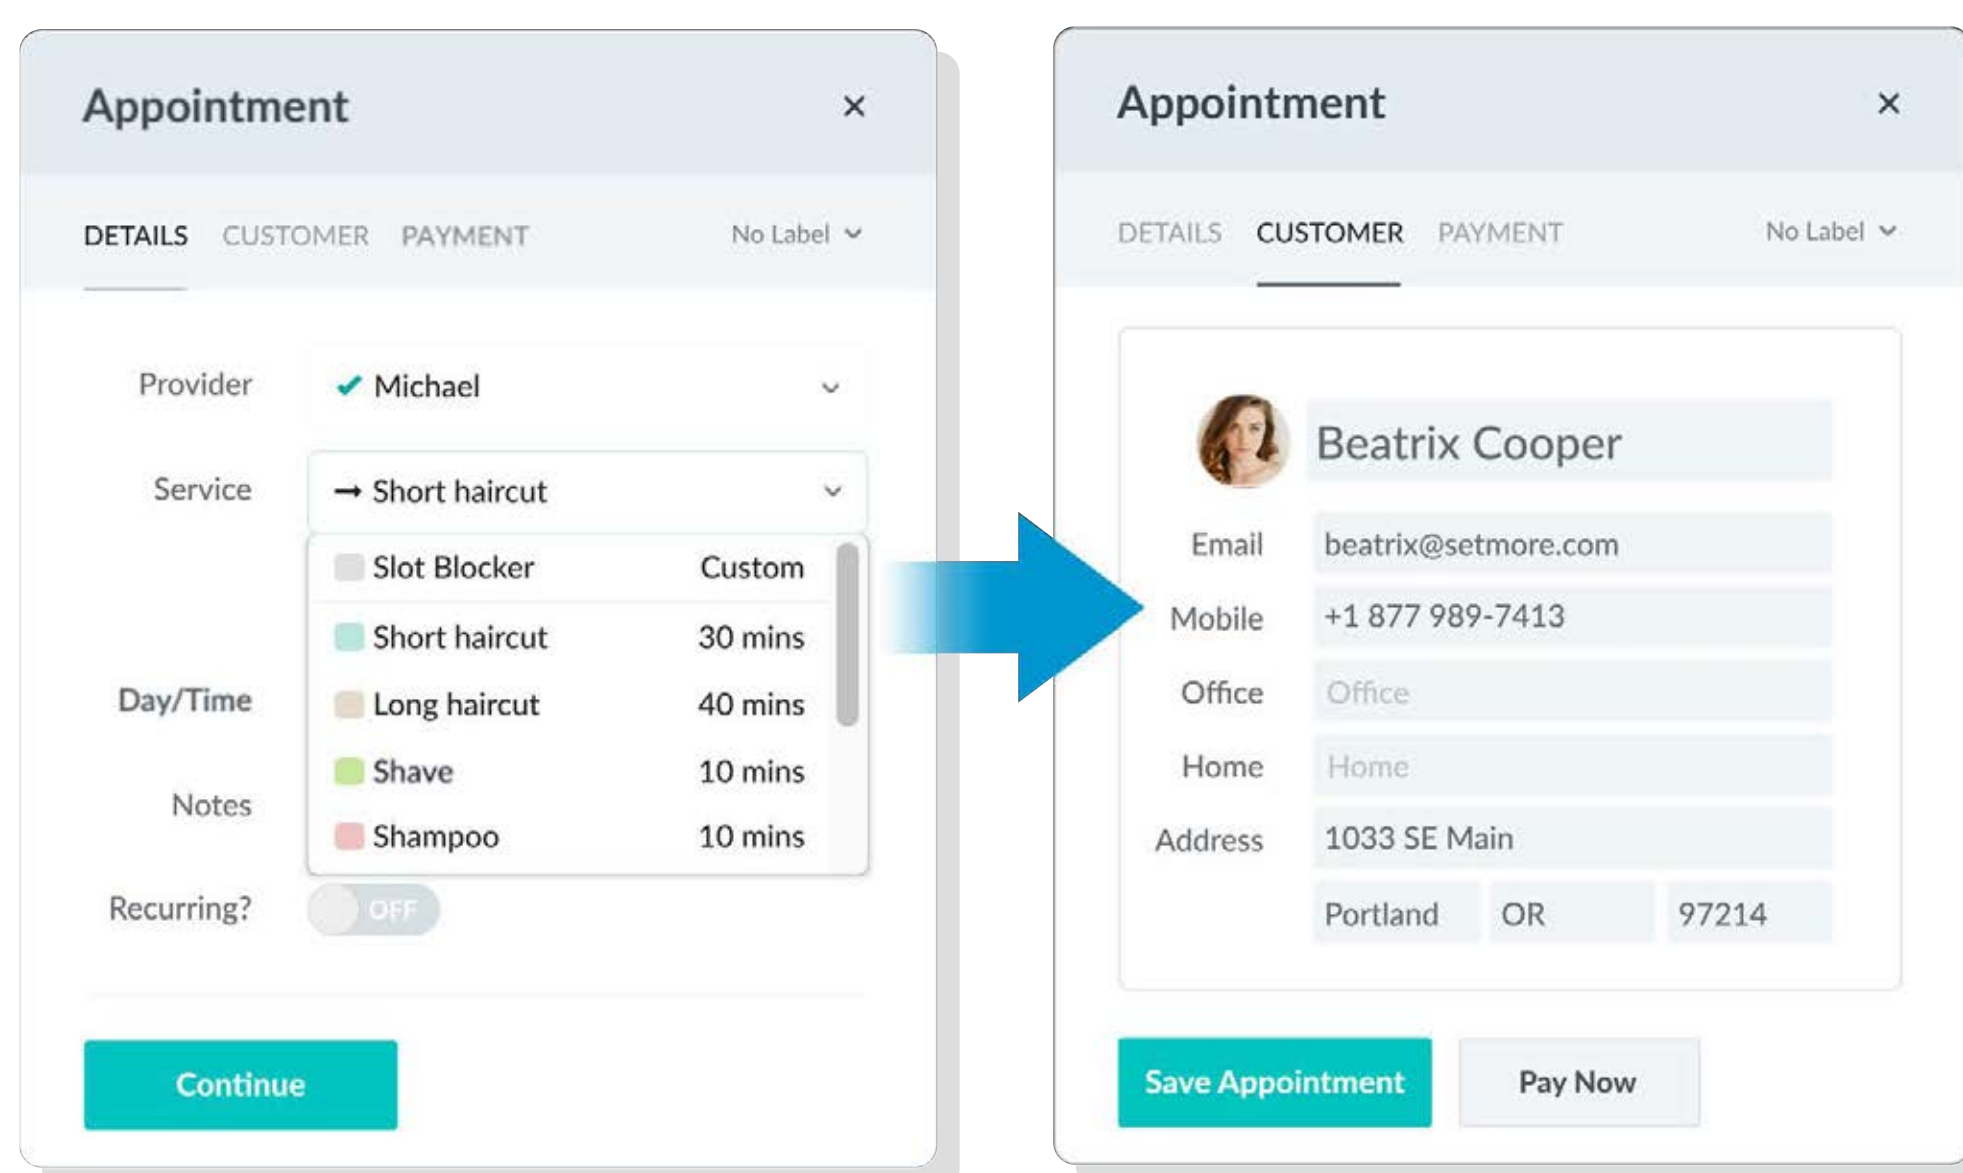

Weekly calendar views for every staff member.

Booking an appointment

Click anywhere on the calendar to start a new appointment. The Appointment window includes dropdown menus for Provider, Service, Day/Time, and space for additional notes.

Click “Continue” to add a customer. You can either add a new customer, or search from existing customers.

Click Save, and the appointment will show up on your calendar.

The image displays two sequential screenshots of the Setmore 'Appointment' window, connected by a blue arrow indicating the flow of the booking process.
