

Contents

From Dust Astrophysics Towards Dust Mineralogy – A Historical Review	
<i>Johann Dorschner</i>	1
Formation and Evolution of Minerals in Accretion Disks and Stellar Outflows	
<i>Hans-Peter Gail</i>	55
The Mineralogy of Interstellar and Circumstellar Dust	
<i>Frank J. Molster, Laurens B.F.M. Waters</i>	121
The Mineralogy of Cometary Dust	
<i>Martha S. Hanner</i>	171
The <i>In-situ</i> Study of Solid Particles in the Solar System	
<i>Ingrid Mann and Elmar K. Jessberger</i>	189
The Astromineralogy of Interplanetary Dust Particles	
<i>John Bradley</i>	217
The Most Primitive Material in Meteorites	
<i>Ulrich Ott</i>	236
Laboratory Astrophysics of Cosmic Dust Analogues	
<i>Thomas Henning</i>	266
