

# Contents

<b>Preface .....</b>	<b>IV</b>
<b>Overview .....</b>	<b>VI</b>
<b>Contents .....</b>	<b>XI</b>
<b>List of Contributors .....</b>	<b>XXXI</b>

**Part I:            Introduction to Management**

<b>1    Managing in an International Environment .....</b>	<b>3</b>
1.1    Introduction .....	4
1.2    Building a Global Talent Network .....	4
1.2.1    Globalization of Talent Management and Development .....	5
1.2.2    Global Leadership Development .....	6
1.2.3    Global Performance Management .....	6
1.2.4    How Can an Organization Overcome Cultural Differences to Maximize Collaboration and Productivity? .....	7
1.2.5    What Core Principles or Practices Can Be Used to Encourage a Global Workforce to Act in Concert Toward Common Objectives? .....	8
1.3    What Factors Contribute to an Optimal Climate for Coordinated Research and Development? .....	9
1.4    How Can External Areas of the Business – such as Partner Networks – Be Engaged to Support Globalization Efforts? .....	10
1.4.1    The Ecosystem Approach: Managing Business Networks in a Global Economy .....	10
1.4.2    Different Models for Different Markets .....	11
1.5    The Business Network Life Cycle .....	12
1.6    How Technology Can Support Business Network Transformation and Globalization .....	13
1.7    The Challenge for Management in the Era of Business Network Transformation .....	13

<b>2</b>	<b>Superior Performance Through Value-based Management .....</b>	<b>15</b>
2.1	Introduction .....	16
2.2	Concepts of Value-based Management .....	17
2.2.1	Overview of Different Concepts .....	17
2.2.2	Overview of Performance Measures Utilized by the DAX-23 Companies .....	19
2.2.3	Calculation and Interpretation of EVA and MVA .....	20
2.3	Applications and Techniques of Value-based Management .....	22
2.3.1	Overview .....	22
2.3.2	Strategy Development .....	23
2.3.3	Mergers & Acquisitions .....	25
2.3.4	Performance Measurement .....	27
2.4	Value Creation by Large German Firms .....	29
2.5	Value Creation by Large and Medium-sized German Utilities .....	32
<b>3</b>	<b>Ways to Corporate Growth .....</b>	<b>37</b>
3.1	Growth Is a Strategic Necessity .....	38
3.1.1	Five Reasons for a Growth Strategy .....	38
3.1.2	The End of the V-Curve .....	39
3.1.3	How Declining Transaction Costs Open up New Dimensions .....	39
3.1.4	Special Challenges to the Energy Sector .....	41
3.2	Ways to Growth .....	41
3.2.1	The Basic Building Blocks of a Growth Strategy for Utilities .....	41
3.2.2	Growth Must Add Value .....	43
3.3	Finding the Right Blend of External and Organic Growth .....	45
3.3.1	Organic Growth .....	46
3.3.2	External Growth .....	46
3.4	The Right Way to Organize Growth .....	49
3.4.1	Decentralization Keeps Companies Agile .....	49
3.4.2	The Human Factor .....	51
<b>4</b>	<b>Diversification and the Achievement of Scope Economies .....</b>	<b>55</b>
4.1	Introduction .....	56
4.2	Corporate Strategy and Diversification .....	56
4.2.1	Historical Patterns of Firm Diversification .....	57
4.2.2	Diversification Types and Their Implications for Corporate Management .....	58
4.2.3	The Performance Implications of Diversification .....	60

---

4.3	Economies of Scope as an Imperative for Diversification .....	62
4.3.1	Production Economics and the Relationship Between Economies of Scale and Scope .....	62
4.3.2	Economies of Scope in Management Research .....	64
4.3.3	Potential Sources of Economies of Scope .....	65
4.4	Diversification and the Achievement of Economies of Scope in the Utility Industry .....	66
4.4.1	The Utility Industry and Potential Directions of Diversification .....	66
4.4.2	Sources of Economies of Scope within the Utility Industry .....	67
4.5	Conclusion .....	68
<b>5</b>	<b>Innovation and Technology Management .....</b>	<b>73</b>
5.1	Innovation – The Key to our Future .....	74
5.1.1	Pioneers of Modern Life .....	74
5.1.2	Big Questions and Megatrends .....	74
5.1.3	Innovations for a Future Worth Living In .....	75
5.2	Innovation – an Essential Driver for Profitable Growth .....	76
5.2.1	The Changing Face of Industry .....	76
5.2.2	From Invention to Innovation .....	76
5.3	Elements of Innovation Management .....	77
5.3.1	Innovation as an Integral Part of a Company’s Strategy ...	77
5.3.2	Growth Clusters .....	78
5.3.3	Innovation Processes: PhaseGate™ .....	79
5.3.4	Success Criteria: Key Performance Indicators .....	80
5.3.5	Project Evaluation .....	81
5.3.6	Open Innovation Processes .....	81
5.3.7	Managing Complex, Multi-level Innovation Processes ....	82
5.3.8	Venture Capital .....	83
5.3.9	Intellectual Property Rights .....	84
5.3.10	Ensuring Sustainability .....	84
5.3.11	Integrating Customers into the Innovation Process .....	86
5.4	Innovation – a Cultural Issue .....	87
<b>6</b>	<b>Entrepreneurial Orientation .....</b>	<b>89</b>
6.1	Introduction .....	90
6.2	The Concept of Entrepreneurial Orientation .....	90
6.3	The Dimensionality of Entrepreneurial Orientation .....	91
6.4	Entrepreneurial Orientation and Firm Performance .....	92
6.5	Contingency Theories .....	92
6.6	Environmental Variables .....	92

6.7	Organizational Variables .....	95
6.8	Combined Models of Venture Performance .....	96
6.9	Critique .....	97
6.10	Conclusions .....	98
<b>7</b>	<b>New Paradigms in Organizational Design .....</b>	<b>105</b>
7.1	Introduction: Main Drivers Influencing the Organizational Framework of European Utilities .....	106
7.1.1	Regulation as a Dominant Driver of Organizational Change in European Utilities in the Past 12 Years .....	106
7.1.2	Liberalization of Electricity and Natural Gas Markets ....	107
7.1.3	Privatization and Increased Financial Pressure .....	108
7.1.4	Organic and M&A Development and the Search for Growth Relays .....	108
7.2	Keys to Reading the Current Organizational Framework of European Utilities .....	109
7.2.1	Significant Remnants of the Pre-liberalization Organization of European Gas and Electricity Utilities ...	109
7.2.2	Current Organization of European Energy Utilities Can Be Read Along Three Dimensions .....	110
7.3	Challenges and Emerging Paradigms in Utilities Organizational Design .....	117
7.3.1	Performance and Speed: Leaner and Simpler Organizations to Enable Profitable Growth .....	118
7.3.2	Control and Standardization: The New Operational Steering Model .....	120
7.3.3	Integration: The Systematic Push Toward Realization of Group-wide Synergies .....	123
7.3.4	The Next Model: Value Chain-based Organization and Centralization .....	126
7.3.5	Empowerment: New, Customized Organizational Design for New Activities .....	130
7.4	An Overview of US Utilities Organizational Trends .....	132

## **Part II: Fundamentals in Utility Management**

<b>8</b>	<b>An Industry Overview – Strategic Groups and Critical Success Factors .....</b>	<b>137</b>
8.1	Preface .....	138
8.2	An Industry Overview – Segmenting European Power Utilities ...	138
8.2.1	Vertically Integrated Power Utilities .....	139

8.2.2	Power Generators .....	140
8.2.3	(Regional) Integrated Distribution & Supply Utilities ....	141
8.2.4	(Independent) Grid Operators .....	141
8.2.5	Retailers .....	142
8.3	Critical Success Factors of Top-performing Utilities .....	143
8.4	Conclusion .....	145
<b>9</b>	<b>The Utility Industry in 2020 .....</b>	<b>147</b>
9.1	Introduction .....	148
9.2	Stakeholders in Utilities .....	152
9.3	Basic Drivers and Business Models .....	156
9.4	Evolutionary Scenario in the Utility Industry in 2020 .....	160
9.5	Revolutionary Scenario in the Utility Industry in 2020 .....	165
9.6	Conclusion .....	166
<b>10</b>	<b>The Changing Structure of the Electric Utility Industry in Europe: Liberalisation, New Demands and Remaining Barriers .....</b>	<b>169</b>
10.1	Introduction .....	170
10.2	The European Electricity Supply Industry in Pre-liberalisation Days .....	170
10.3	Restructuring of the European Electricity Supply Industry .....	171
10.4	Price Formation in a Liberalised Competitive Electricity Market .....	174
10.5	Performance of the Wholesale and Retail Markets .....	177
10.6	Remaining Barriers to Effective Competition .....	184
10.6.1	Decreasing Excess Capacities .....	185
10.6.2	Lack of Players .....	187
10.6.3	Extending the Markets: a Solution? .....	188
10.7	Conclusions .....	190
<b>11</b>	<b>The Changing Structure of the Utility Industry from the Perspective of Regulation Authorities .....</b>	<b>193</b>
11.1	Introduction .....	194
11.2	Structural Changes in the Utility Landscape in Germany .....	196
11.2.1	Radical Legal Changes .....	196
11.2.2	The Utility Landscape in Germany at a Glance .....	198
11.3	Unbundling Integrated Utilities .....	199
11.3.1	Model of an Independent Network Company .....	199
11.3.2	Level of Implementation in Germany .....	199
11.3.3	Challenges Facing an Independent Network Company ..	199

11.4	Strategic Options for Utilities .....	202
11.4.1	Cooperative Activities, Mergers and Network Sales .....	202
11.4.2	Opening Up New Fields of Business or Concentration on Core Business .....	203
11.4.3	Regulatory Perspective .....	204
11.5	Outlook .....	205
<b>12</b>	<b>The Changing Structure of the Utility Industry from Its own Perspective .....</b>	<b>207</b>
12.1	The Importance of Regional Utilities – with EWE AG as an Example .....	208
12.1.1	EWE AG as Infrastructure and Energy Service Provider .....	208
12.1.2	Economic Significance of the EWE Group .....	209
12.2	EWE's Strategies for Growth and Competition .....	211
12.2.1	Influence of Liberalization and Regulation on EWE's Development .....	211
12.2.2	Positioning in the Competition for Electric and Natural Gas Customers .....	213
12.2.3	Growth in the Information and Telecommunications Markets .....	214
12.2.4	International Involvement .....	215
12.3	EWE Group's Strategy for Tomorrow's Energy Supply .....	216
12.3.1	Climate Protection – a Shared Responsibility .....	216
12.3.2	Renewable Energy and the Energy Mix of the Future .....	218
12.3.3	Investments in Innovative Technologies, Research, and Development .....	219
12.3.4	Outlook .....	221
<b>13</b>	<b>Mergers &amp; Acquisitions from a Strategic Perspective .....</b>	<b>223</b>
13.1	Introduction .....	224
13.2	The Need for Acquisitive Growth in the Utilities Industry .....	224
13.2.1	Limited Perspectives in European National Markets .....	224
13.2.2	The Requirement for Strong Positions along the Value Chain .....	225
13.2.3	Convergence of the Power and Gas Sectors .....	225
13.2.4	Integration of European Markets .....	226
13.3	M&A Patterns in the Utilities Industry .....	226
13.3.1	Privatization and Liberalization .....	226
13.3.2	National Consolidation and International Expansion .....	227
13.3.3	Continuous European Consolidation .....	227
13.4	E.ON's Development in the M&A Market .....	228

13.4.1	The Merger of VEBA and VIAG in Germany and the Transformation into a Focused Energy Company .....	228
13.4.2	Integration and Performance .....	229
13.4.3	Growth in the Energy Business .....	230
13.5	Success Factors and Organizational Line-up .....	231
13.5.1	Success Factors for Strategic Mergers .....	231
13.5.2	Conclusions for the Organizational Line-up .....	232
13.6	Conclusion .....	232
<b>14</b>	<b>What Next for European Power Utilities? .....</b>	<b>235</b>
14.1	Introduction .....	236
14.2	European Power Sector Key Drivers .....	238
14.2.1	Expensive Oil .....	238
14.2.2	Increasing Environmental Awareness .....	240
14.2.3	Unbundling .....	241
14.2.4	Financial Players .....	242
14.2.5	Nationalism .....	243
14.3	Value Creation Transactions .....	244
14.4	How the Sector Might Look in 10 Years' Time .....	245
<b>15</b>	<b>Unbundling – Strategic and Organisational Challenges for Power and Supply Companies .....</b>	<b>247</b>
15.1	Introduction .....	248
15.2	Transmission and Operation of the System in a Liberalised Environment .....	248
15.3	Vertical Unbundling Alternatives – Independent System Operator and Transmission System Operator Models .....	250
15.3.1	Transmission System Operator .....	251
15.3.2	Independent System Operator .....	251
15.3.3	Advantages of the Transmission System Operator Model .....	252
15.3.4	Disadvantages of the Transmission System Operator Model .....	254
15.3.5	Advantages of the Independent System Operator Model .....	255
15.3.6	Disadvantages of the Independent System Operator Model .....	255
15.4	International Experience .....	257
15.4.1	The United States .....	257
15.4.2	Latin America .....	258
15.4.3	The European Union .....	259

15.5	Upcoming Developments in the European Union – the Third Package .....	261
<b>16</b>	<b>Convergence of Gas and Electricity Markets: Economic and Technological Drivers .....</b>	<b>263</b>
16.1	Introduction .....	264
16.2	Characterizing the Gas and Electricity Sectors .....	265
16.2.1	The Gas Sector .....	265
16.2.2	The Electricity Sector .....	266
16.3	Categorizing Market Convergence .....	267
16.4	Drivers for Convergence of Gas and Electricity Markets .....	268
16.4.1	Convergence of Products and Services .....	269
16.4.2	Regulatory Convergence .....	269
16.4.3	Business Convergence .....	271
16.4.4	Technological Convergence .....	273
16.5	Conclusions .....	276
 <b>Part III: Power Generation</b>		
<b>17</b>	<b>Investing in Power Generation .....</b>	<b>281</b>
17.1	Introduction .....	282
17.2	Investment in Risky Assets .....	284
17.2.1	Methods for Assessing Investment Projects Under Uncertainty .....	284
17.2.2	Risk Management Strategies .....	287
17.2.3	Investment Timing and Policy Impacts .....	288
17.3	Changing Paradigms? .....	288
17.3.1	Historical Overview .....	289
17.3.2	Paradigm Shift During Electrification of the US .....	290
17.3.3	Distributed Generation .....	292
17.3.4	Economies of Scale and Technological Lock-in .....	293
17.3.5	Safety Considerations .....	294
17.3.6	The Power Electronics Revolution .....	295
17.4	Selected Examples .....	301
17.4.1	Smart Metering .....	301
17.4.2	Variable Speed Mini-turbines with 'Electronic Gearbox' .....	302
17.5	Conclusions .....	303

---

<b>18</b>	<b>Perspectives on Capacity Investment in Germany and Europe – The Future of Power-Mix Optimization .....</b>	<b>311</b>
18.1	The Underlying Conditions Have Changed Dramatically .....	312
18.2	The Power Plant Age Structure Needs Investment Running into Billions .....	312
18.3	The Risks in Power Plant Investment Have Definitely Increased .....	314
18.4	Lack of Investment Means Higher Power Prices .....	317
18.5	Investment Program for Environmentally Sound Power Plant Capacities .....	317
18.6	Market Intervention by Energy Policy Slows Down Necessary Investment .....	318
18.7	Summary .....	320
<b>19</b>	<b>Renewable Resources for Electric Power: Prospects and Challenges .....</b>	<b>323</b>
19.1	Driving Forces Behind the Rethink in Energy Policy .....	324
19.2	Renewables in the National and International Settings .....	325
19.3	Limited Potential of Geothermal Energy, Solar Power and Biomass .....	326
19.4	Wind Power is the Most Promising Growth Segment .....	327
19.5	The Offshore Mega-trend: Prospects and Challenges .....	329
19.6	Integration into a National Energy Supply Concept .....	330
19.7	Outlook: The Right Social Framework Is Crucial .....	332
<b>20</b>	<b>Emission Allowances – a New Production Factor in the Power Sector .....</b>	<b>335</b>
20.1	Introduction .....	336
20.2	Characterisation of the New Input Factor Emission Allowances .....	336
20.3	Emission Trading .....	338
20.3.1	The Theory of Emission Trading .....	338
20.3.2	The Theory of Allowance Allocation .....	339
20.3.3	Allocation of Allowances According to the National Allocation Plans .....	340
20.4	Effects of Emission Trading .....	341
20.4.1	Theoretical Effects of Emission Trading .....	341
20.4.2	Effects of the European Emission Trading Scheme and the Corresponding National Allocation Plans .....	342
20.5	Consistent Strategies Under an Emission Trading Scheme .....	343
20.6	Summary .....	345

## **Part IV: Energy Trading and Wholesale**

<b>21</b>	<b>Energy Trading, Emission Certificates and Risk Management .....</b>	<b>349</b>
21.1	Different Roles of Energy Utility Companies in the Energy Markets .....	350
21.2	Overview of Energy Markets and the Contracts Being Traded .....	351
21.2.1	Day-ahead (Spot) Market .....	352
21.2.2	Forward and Futures Contracts .....	354
21.2.3	The Forward Price versus the Day-ahead Price .....	356
21.3	Trading From a Risk Management Perspective .....	357
21.4	Concluding Remarks .....	359
<b>22</b>	<b>The Future of Liquefied Natural Gas Trade .....</b>	<b>361</b>
22.1	Introduction .....	362
22.2	Liquefied Natural Gas .....	364
22.2.1	Some Background .....	364
22.2.2	Regional Developments .....	365
22.3	Drivers of Current and Future Liquefied Natural Gas Market Development .....	367
22.3.1	Demand Growth .....	367
22.3.2	Resource Rents, Transport Costs, Diversion Capability, and Seasonal Trends .....	369
22.3.3	Transit-country Issues .....	372
22.4	The Rice World Gas Trade Model Reference Case – One Possible Future .....	373
22.5	Various Risks to Liquefied Natural Gas Market Development .....	378
22.5.1	High Prices, Alternative Supplies and First-mover Advantage .....	378
22.5.2	Market Structure .....	381
22.5.3	Geopolitical Forces .....	382
22.6	Concluding Remarks .....	383
<b>23</b>	<b>Cross-border Trading .....</b>	<b>385</b>
23.1	Introduction .....	386
23.2	The Nordic Power Exchange – The Nord Pool Group .....	386
23.3	The Common Nordic Power Market .....	387
23.3.1	Auction Trading .....	388
23.3.2	Bidding Areas .....	388
23.3.3	Implicit Auctioning of Trading Capacity .....	388
23.3.4	Area Prices .....	388
23.3.5	System Price .....	389

23.4	Price Formation at Nord Pool Spot .....	389
23.5	Handling of Internal Grid Limitations .....	393
23.6	Cross-border Optimization Between Denmark West and Germany .....	395
23.7	Financial Products Related to Cross-border Trading .....	395
23.8	The Intraday Market – Elbas .....	399
<b>24</b>	<b>The Future of Gas Supply in Europe .....</b>	<b>401</b>
24.1	Introduction .....	402
24.2	Supply Outlook to 2015 .....	402
24.2.1	Indigenous Production .....	402
24.2.2	Supplies in 2006 .....	403
24.2.3	Future Supplies .....	405
24.3	Security of Supply .....	407
24.3.1	Russia .....	408
24.3.2	A Worsening Geopolitical Environment .....	410
24.3.3	Security and Import Dependence – Empirical Evidence and Legislation .....	411
24.4	Conclusions: a Constrained Future for Gas in Europe? .....	413
<b>25</b>	<b>Strategic Use of Gas Storage Facilities .....</b>	<b>417</b>
25.1	Introduction and Fundamentals of Storage .....	418
25.1.1	The European Gas Market and the Role of Flexibility ...	418
25.1.2	Use of Storage .....	420
25.1.3	Storage Facilities in Europe .....	422
25.1.4	Value of Storage .....	425
25.2	Current Gas Market Development and Implications for Gas Storage .....	426
25.3	Strategic Use of Storage for a Gas Market Player .....	428
25.3.1	Access to Storage Facilities .....	428
25.3.2	Investment in Storage Facilities .....	429
25.4	Conclusion .....	430

## **Part V: Transmission and Distribution**

<b>26</b>	<b>Regulation of Network Charges .....</b>	<b>435</b>
26.1	Introduction .....	436
26.2	Cost-based Regulation .....	437
26.3	Price-based Regulation .....	440

26.3.1	Price and Revenue Caps .....	441
26.3.2	Yardstick Regulation .....	443
26.3.3	The Investment Incentives .....	445
26.4	Further Developments in Network Pricing – a Menu of Sliding Scales .....	449
26.5	Concluding Remarks .....	453
<b>27</b>	<b>Transmission Management and Pricing .....</b>	<b>457</b>
27.1	Introduction – the Tasks of Transmission System Operators .....	458
27.2	Value Drivers and External Influences .....	459
27.2.1	External Environment .....	459
27.2.2	Value Drivers .....	462
27.3	Management .....	463
27.3.1	Mapping of Activities and Capabilities to Value Drivers .....	463
27.3.2	Prioritisation Among Value Levers .....	463
27.3.3	Tensions Between Value Levers .....	464
27.4	Organisation of Transmission Operations .....	465
27.4.1	What is in an Independent System Operator? .....	465
27.4.2	Geographic Footprints .....	467
27.4.3	The Road to Mergers and Acquisitions? .....	469
27.5	Transmission System Operator Revenues and Pricing .....	470
27.5.1	Revenue Streams .....	470
27.5.2	Use of System Tariffs .....	471
27.5.3	Capacity Auctions .....	472
27.6	Management Information .....	473
27.6.1	New Challenges for Information Systems .....	473
27.6.2	A Possible Approach to the Challenge .....	474
27.7	Summary .....	475
<b>28</b>	<b>The New Entry-exit Model in the EU and Its Consequences for Gas Supply Companies .....</b>	<b>477</b>
28.1	Introduction .....	478
28.2	Network Access in the Liberalized Gas Market .....	478
28.2.1	Structure of the Liberalized Gas Market .....	478
28.2.2	Components of a Network Access Regime .....	479
28.3	Network Access Models in the Gas Market .....	481
28.3.1	Overview .....	481
28.3.2	Point-to-point Model .....	482
28.3.3	Entry-exit Model .....	482
28.3.4	Postage Stamp Method .....	484

28.4	Decision for the Entry-exit Model .....	485
28.5	Consequences for Gas Supply Companies .....	487
28.5.1	Capacity .....	487
28.5.2	Tariffs .....	488
28.5.3	Is Entry-exit a Universal Remedy? .....	489
28.6	Conclusion .....	490
<b>29</b>	<b>Implementation of the EU Unbundling Guidelines in Germany – a Legal Perspective .....</b>	<b>493</b>
29.1	Community Law Bases .....	494
29.2	Current Community Law Development .....	496
29.3	Overview of the Systematic of the Unbundling Requirements in Germany .....	497
29.3.1	Scope of Application .....	498
29.3.2	Legal Unbundling .....	499
29.3.3	Operational Unbundling .....	499
29.3.4	Taxation Law Aspects .....	501
29.3.5	Informational Unbundling .....	501
29.3.6	Accounting Unbundling .....	502
29.4	Unbundling Targets .....	502
<b>30</b>	<b>The Energy Arteries of a Continent – Natural Gas Networks Secure Europe’s Energy Supply .....</b>	<b>507</b>
30.1	Introduction .....	508
30.2	Declining Domestic Production in the EU .....	508
30.3	The EU Expects Natural Gas Imports to Increase .....	509
30.3.1	Insufficient Energy Efficiency .....	510
30.3.2	New Natural Gas Pipelines for Europe .....	510
30.4	The Nord Stream Project Is of Interest to Europe .....	511
30.5	Economic Benefits from New Natural Gas Networks .....	512
30.5.1	Russia Is a Reliable Natural Gas Supplier .....	512
30.5.2	Natural Gas Fulfils Climate Requirements .....	513
30.5.3	Producing and Transporting Natural Gas Is Capital Intensive .....	514
30.6	Pipeline Across the Baltic Sea – Europe’s Energy Artery .....	515
30.6.1	Planning of the Pipeline Across the Baltic Sea .....	515
30.6.2	Offshore Pipelines Are Secure .....	515
30.7	Investments Are Profitable .....	516
30.8	No Growth without Secure Energy Supplies .....	517

<b>31</b>	<b>Dispatching in Unbundled Electricity Markets .....</b>	<b>521</b>
31.1	Operation of Restructured Power Systems .....	522
31.1.1	System Operation in a Competitive Environment .....	522
31.1.2	Effects of Restructuring the Industry on System Reliability .....	524
31.1.3	New Requirement for Computation Tools and Software Systems in Electricity Markets .....	525
31.2	Coordinated Real-time Dispatch of Unbundled Electricity Markets .....	527
31.2.1	Power System Operation .....	528
31.2.2	Coordinated Real-time Dispatch Through a Balancing Mechanism .....	529
31.3	Several Major Operational Issues in Unbundled Electricity Markets .....	531
31.3.1	Modelling and Analysis of Electricity Markets .....	531
31.3.2	Pricing of Electricity .....	531
31.3.3	Evaluation of Available Transfer Capability .....	532
31.3.4	Transmission Congestion Management .....	532
31.3.5	Financial Instruments and Their Role in Market Dispatch and Congestion Management .....	533
31.3.6	Ancillary Services .....	534
31.3.7	Load and Price Forecasting .....	534
31.3.8	Analysis of Generating Companies' Strategic Behaviour .....	535
31.3.9	Bidding Problems in Electricity Generation Markets – Decision-Making in Electricity Markets .....	535
31.3.10	Improvement of Transmission Services by FACTS Control .....	536
31.4	Conclusions .....	537

## **Part VI: Retail**

<b>32</b>	<b>The Retail Electricity Service Business in a Competitive Environment .....</b>	<b>545</b>
32.1	Enter Competition .....	546
32.2	Branding .....	546
32.2.1	Price Discounts and Innovative Pricing .....	547
32.2.2	Enhanced Customer Service .....	548
32.2.3	Value-based Service Bundling .....	548
32.3	Attitude and Image Research .....	549
32.4	Customer Preference and Behavior .....	550

---

32.4.1	Are all Customers Alike? .....	550
32.4.2	The Challenge .....	550
32.4.3	Using a Segmentation System .....	551
32.5	Understanding Residential Customer Needs .....	551
32.5.1	Defining Residential Customer Needs .....	552
32.5.2	Today's Residential Energy Needs .....	552
32.5.3	Customer Needs Segmentation .....	553
32.5.4	Using Customer Needs Segmentation .....	553
32.5.5	Commercial and Industrial Customer Needs .....	554
32.5.6	CLASSIFY Needs Profiles .....	555
32.6	Commercial and Industrial Needs-based Customer Segments .....	556
32.7	Conclusion .....	557
<b>33</b>	<b>Customer Segmentation in the Utility Industry .....</b>	<b>559</b>
33.1	Introduction .....	560
33.2	Conceptual and Contextual Background .....	561
33.2.1	Segmentation .....	561
33.2.2	The European Energy Market .....	562
33.2.3	The Dutch Energy Market for Retail Customers .....	563
33.3	Segmentation and Strategy Formation within Essent .....	564
33.3.1	Introduction .....	564
33.3.2	Customer Value Management .....	565
33.3.3	Customer Value .....	566
33.3.4	Customer Value Segmentation .....	568
33.3.5	Strategy Formation .....	570
33.4	Conclusion and Outlook .....	573
<b>34</b>	<b>Current Trends in Serving Industrial Customers .....</b>	<b>575</b>
34.1	Macro- and Micro-trends in Serving Industrial Customers .....	576
34.1.1	Macro-trends Framing Industrial Customers' Attitudes to Energy Supply .....	576
34.1.2	Micro-drivers of Industrial Energy Consumer Market Competition and Service Innovation .....	579
34.1.3	Conclusions .....	582
34.2	Cases and Trends in 'Best Practice' .....	583
34.2.1	From Trading to Structured Portfolio Management .....	583
34.2.2	Consumer-owned Power Generation Revisited .....	585
34.2.3	Intensive Energy Utility and Industrial Customer Cooperation .....	589
34.2.4	Conclusions .....	590

<b>35</b>	<b>The Energy Retail Market from a Customer Perspective .....</b>	<b>591</b>
35.1	Industrial Energy Consumption – with the Nonferrous Metals Industry as an Example .....	592
35.2	Basic Energy Management Conditions for Energy-intensive Industrial Companies in Germany .....	593
35.3	Adaptability of Energy-intensive Industrial Enterprises – with Norddeutsche Affinerie AG as an Example .....	598
35.4	Petition for German Energy Policy .....	602

## **Part VII: Regional Peculiarities in the Utility Markets**

<b>36</b>	<b>Options for and Regional Peculiarities of Investment Funding in Energy Markets .....</b>	<b>607</b>
36.1	Introduction .....	608
36.2	Main Characteristics of the Energy Markets .....	608
36.3	Barriers to Investment .....	610
36.3.1	Investment Climate .....	611
36.3.2	Regulatory Framework .....	612
36.3.3	Predictability of Revenues .....	614
36.3.4	Specificity for Emerging Countries .....	618
36.4	Financing Considerations .....	619
36.4.1	Financing Sources .....	621
36.4.2	Specificity for Funding of Renewable Energy Projects ...	627
36.5	Conclusion .....	628
<b>37</b>	<b>A Comparison of Market Structure and Regulation Between US and European Utility Markets .....</b>	<b>629</b>
37.1	Introduction .....	630
37.2	Why Regulate? A Short Survey .....	633
37.2.1	Infrastructure Arguments .....	633
37.2.2	Control of Monopolistic Bottlenecks .....	633
37.2.3	Environmental Concerns .....	634
37.3	Regulatory Approaches in the US .....	635
37.3.1	Who's Who in the US Power Sector? .....	635
37.3.2	Brief Regulatory Overview of US Wholesale Markets ....	637
37.3.3	Brief Regulatory Overview of US Retail Markets .....	639
37.3.4	Why the Disillusionment with Markets? .....	643
37.3.5	Expectations vs Reality .....	645
37.3.6	Are We Better off Now? .....	647

37.4	Regulation of the Electricity Industry in Europe .....	649
37.4.1	Electricity Market Directive .....	651
37.4.2	Environmental Regulation .....	655
37.4.3	Promotion of Renewables .....	657
37.5	Conclusions .....	660
<b>38</b>	<b>Investment Opportunities in South America .....</b>	<b>665</b>
38.1	Investment Wave in the Region: The Privatization Process of the 1990s .....	666
38.2	Future Investment Requirements .....	668
38.3	Latin America's Macroeconomic Situation .....	670
38.4	Regulatory Framework .....	673
38.5	Generation and Energy Mix .....	674
38.5.1	Hydroelectric Power .....	674
38.5.2	Natural Gas .....	676
38.5.3	Coal Power Plants .....	677
38.5.4	Nonconventional Renewable Energy .....	678
38.6	The Distribution Business .....	679
38.7	Sustainability – an Unavoidable Choice .....	680
<b>39</b>	<b>Final Stages in the Reform of RAO UES of Russia – Future Developments in the Russian Energy Market .....</b>	<b>683</b>
39.1	Introduction .....	684
39.2	Progress .....	684
39.3	Finance .....	687
39.4	Market Creation .....	689
39.5	Commissioning Energy .....	692

## **Part VIII: Special Issues in Utility Management**

<b>40</b>	<b>Creating Competitive Advantages Through Co-operations Between Municipal Utility Companies .....</b>	<b>697</b>
40.1	Introduction .....	698
40.2	Development of New Profit Potentials by Entering the Market of Electricity Generation, and Importation, Production and Trading of Gas .....	698
40.2.1	Electricity Generation .....	698
40.2.2	Importation, Production and Trading of Gas .....	700

40.3	Co-operation in the Field of Supply Network Systems as an Answer to Cost Pressure and Unbundling .....	702
40.4	Nationwide Distribution to Standard Customers to Compensate for Customer Losses and Development of further Market Potential .....	705
40.5	Successful Change Management .....	707
40.6	Summary .....	708
<b>41</b>	<b>Growth Options for Regional Utilities .....</b>	<b>709</b>
41.1	What Is Growth? .....	710
41.2	German Municipal and Regional Utility Sector Structure .....	711
41.3	Market Changes and Competition Despite Saturated Markets .....	713
41.3.1	Energy Sector in Constant Change .....	713
41.3.2	Regulation of Natural Monopolies .....	714
41.3.3	Energy Policy Decisions .....	715
41.4	Challenges and Options for Regional Utilities .....	716
41.5	Strategy of MVV Energy .....	718
41.5.1	Costs and Price Leadership in the Traditional Business Segments Power, Gas, Water, and District Heating .....	718
41.5.2	Adapting the Company Structure .....	718
41.5.3	Internal Implementation Program .....	719
41.5.4	Expansion of the Municipal Utility Network Despite Market Consolidation .....	721
41.5.5	Expansion of the Growth Segments .....	722
41.6	Conclusion and Outlook .....	722
<b>42</b>	<b>Climate Protection Requirements – the Economic Impact of Climate Change .....</b>	<b>725</b>
42.1	Climate Change – Why Do We Bother? .....	726
42.2	Economic Impacts of Climate Change .....	727
42.3	Climate Protection Requirements .....	730
42.4	Climate Protection: What Next? .....	733
42.5	Final Remarks .....	736
<b>43</b>	<b>European Energy Policy on the Basis of the New Provisions in the Treaty of Lisbon .....</b>	<b>741</b>
43.1	Introduction .....	742
43.1.1	Basis for Current European Energy Policy .....	742
43.1.2	Development of the Energy Competence Provision .....	742

43.1.3	Reorganization of the European Competence Provisions .....	743
43.1.4	The Future of European Energy Policy .....	744
43.2	The Elements of Art. 194(1) TFEU .....	744
43.2.1	The Energy Policy of the Union .....	744
43.2.2	The Regulatory Mechanism of Art. 194(1) TFEU .....	745
43.2.3	The Goals Defined in Art. 194(1)(a-d) TFEU .....	746
43.2.4	The Guiding Principles of the Energy Policy .....	750
43.2.5	Goal Conflicts and Hierarchies .....	754
43.3	Legislative Procedures, Art. 194(2) TFEU .....	754
43.4	The Limits of the EU's Energy Competence .....	754
43.4.1	Subsidiarity and Proportionality .....	755
43.4.2	The Restrictions in Art. 194(2)(2) TFEU .....	755
<b>44</b>	<b>The Role of Energy Efficiency in Electric Power Systems: Lessons from Experiments in the US .....</b>	<b>761</b>
44.1	Introduction .....	762
44.2	Background .....	763
44.3	Demand-side Management – a Brief History .....	764
44.4	Energy Efficiency vs Energy Conservation .....	765
44.5	The Energy Efficiency Paradox .....	767
44.6	The Nature and Value of Energy-efficiency Techniques .....	767
44.7	Elasticity of Demand .....	768
44.8	The Relationship of Power Systems and Use Sectors .....	769
44.9	Demand-side Management in Practice .....	771
44.9.1	Technology Behavior .....	772
44.9.2	Market Transformation .....	772
44.10	Effectiveness .....	772
44.11	Going Forward .....	773
44.12	Conclusion .....	775
<b>45</b>	<b>Private Water and Economic Regulation in the United States .....</b>	<b>779</b>
45.1	Introduction .....	780
45.2	Market Structure of the US Water Industry .....	781
45.3	Privatization .....	784
45.3.1	Ownership and Rates .....	788
45.3.2	Ownership and Performance .....	790
45.4	Regulatory Structure .....	790
45.4.1	The Role of Economic Regulation .....	791
45.4.2	Regulatory Jurisdiction .....	792

---

45.4.3	Regulatory Authority .....	793
45.5	Regulation and Utility Ownership .....	794
45.5.1	Expanding Regulatory Oversight .....	795
45.5.2	Regulation and Privatization .....	797
45.6	Conclusion .....	798
