

Contents

Chapter 1: Introduction.....	1
1.1. Conventional distinction between uncertainty and imprecision	3
1.2. Imprecise data representation: Preliminaries on Fuzzy set and genesis of Interval Numbers as imprecise data.....	4
1.3. Interval Numbers: A better tool to represent imprecision and uncertainty.....	10
1.4. Interval Arithmetic: Notation and relevant preliminaries	12
1.5. The motivation and organization of the book	16
1.6. References	19
Chapter 2: On Comparing Interval Numbers:A Study on Existing Ideas.....	25
2.1. Introduction	25
2.2. Criteria for comparing interval numbers	26
2.3. Interval comparing schemes	28
2.3.1. Set theoretic approaches.....	28
2.3.2. Probabilistic approaches.....	30
2.4. References.....	35
Chapter 3: Acceptability Index and Interval Linear Programming.....	39
3.1. Introduction	39
3.2. The Acceptability Index.....	41
3.2.1. Illustrative example.....	46
3.3. A satisfactory crisp equivalent system of $Ax \leq B$	48
3.3.1. Tong's approach.....	48
3.3.2. Discussion.....	49
3.3.3. A satisfactory crisp equivalent system of $Ax \leq B$ based on \mathcal{A} -index.....	50
3.4. An Interval Linear Programming Problem and its Solution	52
3.4.1. Solution to the problem stated in Section 3.1.....	55
3.5. Conclusion.....	56
3.6. References	57
Chapter 4: Fuzzy Preference ordering of Intervals.....	59
4.1. Introduction	59
4.2. The strength and weakness of \mathcal{A} -index.....	60

4.3. Preference ordering for a pessimistic DM for a maximization problem.....	61
4.4. Choice of the DMs with different degrees of pessimism.....	64
4.4.1. Illustrative example.....	69
4.5. Preference pattern for a minimization problem	72
4.6. Comparative advantage of the Fuzzy Preference Ordering over the other interval ordering schemes.....	75
4.6.1. A note on some recent ranking schemes.....	82
4.7. References	89
Chapter 5: Solving the Shortest Path Problem with Interval Arcs	91
5.1. Introduction	91
5.2. Choosing a preferred minimum from a set of intervals	92
5.2.1. Numerical illustration of the procedure.....	95
5.3. Shortest Path Problem	99
5.4. Large-Scale numerical example	103
5.5. Conclusion.....	105
5.6. References	109
Chapter 6: Travelling Salesman problem with Interval Cost Constraints.....	111
6.1. Introduction	111
6.1.1. The problem.....	112
6.2. Algorithm for Interval-valued Traveling Salesman Problem.....	112
6.3. Solution to the numerical example 6.1.1	114
6.4. Conclusion.....	118
6.5. References	119
Chapter 7: Interval Transportation Problem with Multiple Penalty Factors.....	121
7.1. Introduction	121
7.2. Problem formulation.....	122
7.3. The scope of an Interval-valued Objective Function in a real decision set up	123
7.3.1. A numerical example.....	127
7.3.2. A discussion on Chanas & Kuchta (1996b)'s approach and a comparative analysis with our approach.....	128
7.4. A numerical example of ITPMPF.....	132
7.5. Conclusion.....	135
7.6. References	135
Chapter 8: Fuzzy Preference based TOPSIS for Interval multi-criteria Decision Making.....	139
8.1. Introduction	139
8.2. Relevant preliminaries	141
8.2.1. The original TOPSIS.....	141
8.2.2. A note on Giove (2002)'s Bag based Interval-TOPSIS.....	142

8.3. Fuzzy Preference Ordering of Interval Attributes in I-TOPSIS.....	146
8.4. A numerical example.....	151
8.5. Conclusion.....	153
8.6. References	154
Chapter 9: Concluding Remarks and the Future Scope	155
9.1. Introduction	155
9.2. Chapter Summary and Conclusion	156
9.3. Future Research Agenda.....	158
Index.....	161
List of Figures.....	163
List of Tables.....	165

Fuzzy Preference Ordering of Interval Numbers in
Decision Problems

Sengupta, A.; Pal, T.K.

2009, XII, 166 p., Hardcover

ISBN: 978-3-540-89914-3
