Preface	ix
Real Group Orbits on Flag Manifolds	1
Dmitri Akhiezer	
1 Introduction	1
2 Finiteness Theorem	3
3 Embedding a Subgroup into a Parabolic One	5
4 Factorizations of Reductive Groups.....	6
5 Real Forms of Inner Type	9
6 Matsuki Correspondence	14
7 Cycle Spaces	15
8 Complex Geometric Properties of the Crown	17
9 The Schubert Domain.....	19
10 Complex Geometric Properties of Flag Domains	21
References	23
Complex Connections with Trivial Holonomy	25
Adrian Andrada, Maria Laura Barberis, and Isabel Dotti	
1 Introduction	25
2 Preliminaries	27
3 Complex Connections with Trivial Holonomy	29
4 Complete Complex Connections with Parallel Torsion and Trivial Holonomy	33
References	38
Indefinite Harmonic Theory and Harmonic Spinors	41
Leticia Barchini and Roger Zierau	
1 Introduction	41
2 Comments on Indefinite Harmonic Theory	43
3 Harmonic Spinors	47
4 The L_2 -Theory	49
References	56

Twistor Theory and the Harmonic Hull	59
Michael Eastwood and Feng Xu	
1 Introduction	59
2 Harmonic Hull in Dimension 2	62
3 Harmonic Hull in Dimension 4	62
4 Generalities on Double Fibrations	70
5 Harmonic Hull in Higher Even Dimensions	73
6 Harmonic Hull in Odd Dimensions	77
References	79
 Nilpotent Gelfand Pairs and Spherical Transforms of Schwartz	
Functions II: Taylor Expansions on Singular Sets	81
Véronique Fischer, Fulvio Ricci, and Oksana Yakimova	
1 Outline and Formulation of the Problem	82
2 Proof of Theorem 1.1 for \check{N} Abelian	87
3 \check{N} Nonabelian: Structure of K -Invariant Polynomials on $\mathfrak{v} \oplus \mathfrak{z}_0$	89
4 Fourier Analysis of K -Equivariant Functions on \check{N}	94
5 Proof of Proposition 4.3	105
6 Conclusion	111
References	112
 Propagation of Multiplicity-Freeness Property for	
Holomorphic Vector Bundles	113
Toshiyuki Kobayashi	
1 Introduction	114
2 Complex Geometry and Multiplicity-Free Theorem	115
3 Proof of Theorem 2.2	118
4 Visible Actions on Complex Manifolds	124
5 Multiplicity-Free Theorem for Associated Bundles	128
6 Proof of Proposition 5.2	133
7 Concluding Remarks	135
References	138
 Poisson Transforms for Line Bundles from the Shilov	
Boundary to Bounded Symmetric Domains	141
Adam Korányi	
1 Introduction	141
2 General Poisson Transforms	142
3 Preliminaries on Symmetric Domains	144
4 Poisson Transforms Between Line Bundles over S and D	150
5 Trivializations and Explicit Poisson Kernels	151
6 The Casimir Operator	154
7 Remarks on Hua-Type Equations	159
References	162

Center $U(n)$, Cascade of Orthogonal Roots, and a Construction of Lipsman–Wolf	163
Bertram Kostant	
1 Introduction	164
2 Lipsman–Wolf Construction	164
References	173
Weak Harmonic Maaß Forms and the Principal Series for $SL(2, \mathbb{R})$	175
Peter Kostelec, Stephanie Treneer, and Dorothy Wallace	
1 Introduction	176
2 Preliminaries	176
3 Some Examples of Functions Constructed from the Raising and Lowering Operators	178
4 Constructing Weak Harmonic Maaß Forms from the Principal Series	179
5 E_n , F_n and G_n	181
6 Concluding Remarks	183
References	184
Holomorphic Realization of Unitary Representations of Banach–Lie Groups	185
Karl-Hermann Neeb	
1 Introduction	186
2 Holomorphic Banach Bundles	189
3 Hilbert Spaces of Holomorphic Sections	195
4 Realizing Positive Energy Representations	207
A Equicontinuous Representations	215
References	221
The Segal–Bargmann Transform on Compact Symmetric Spaces and Their Direct Limits	225
Gestur Ólafsson and Keng Wiboonton	
1 Introduction	226
2 Basic Notations	228
3 L^2 Fourier Analysis	229
4 The Fock Space $\mathcal{H}_t(M_{\mathbb{C}})$	234
5 Segal–Bargmann Transforms on $L^2(M)$ and $L^2(M)^K$	242
6 Propagations of Compact Symmetric Spaces	244
7 The Segal–Bargman Transform on the Direct Limit of $\{L^2(M_n)\}_n$	247
8 The Segal–Bargman Transform on the Direct Limit of $\{L^2(M_n)^{K_n}\}_n$	249
References	251
Analysis on Flag Manifolds and Sobolev Inequalities	255
Bent Ørsted	
1 Introduction	255
2 Geometry of the Rank-1 Principal Series	256
3 Logarithmic Sobolev Inequalities for Rank-1 Groups	261

4	Inequalities in the Noncompact Picture	263
	References	270
Boundary Value Problems on Riemannian Symmetric Spaces of the Noncompact Type		273
Toshio Oshima and Nobukazu Shimeno		
1	Introduction	273
2	Representations on Symmetric Spaces	276
3	Construction of the Hua Type Operators	287
4	Examples	294
	References	306
One-Step Spherical Functions of the Pair $(\mathrm{SU}(n+1), \mathrm{U}(n))$		309
Inés Pacharoni and Juan Tirao		
1	Spherical Functions	310
2	The Differential Operators D and E	314
3	Hypergeometrization	328
4	The Eigenvalues of D and E	333
5	The One-Step Spherical Functions	336
6	Matrix Orthogonal Polynomials	345
	References	353
Chern–Weil Theory for Certain Infinite-Dimensional Lie Groups		355
Steven Rosenberg		
1	Introduction	355
2	General Comments on Chern–Weil Theory	358
3	Mapping Spaces and Their Characteristic Classes	361
4	Secondary Classes on Ψ_0^* -Bundles	368
5	Characteristic Classes for Diffeomorphism Groups	371
6	Characteristic Classes and the Families Index Theorem	373
	References	379
On the Structure of Finite Groups with Periodic Cohomology		381
C.T.C. Wall		
1	Introduction	382
2	Notation and Preliminaries	384
3	Structure of \mathcal{P}' -Groups	387
4	Presentations of \mathcal{P} -Groups	389
5	Subgroups and Refinement of Type Classification	392
6	Free Orthogonal Actions	397
7	The Finiteness Obstruction	401
8	Application to the Space-Form Problem	407
9	Space-Forms: Classification	409
	References	411

Lie Groups: Structure, Actions, and Representations
In Honor of Joseph A. Wolf on the Occasion of his 75th
Birthday

Huckleberry, A.; Penkov, I.; Zuckerman, G. (Eds.)

2013, XIV, 413 p., Hardcover

ISBN: 978-1-4614-7192-9

A product of Birkhäuser Basel
