

# Contents

## Part I Basic Mechanisms

<b>The Genetics of Sphingolipid Hydrolases and Sphingolipid Storage Diseases . . . . .</b>	<b>3</b>
Edward H. Schuchman and Calogera M. Simonaro	
<b>Sphingolipids and Membrane Domains: Recent Advances . . . . .</b>	<b>33</b>
Salvatore Chiantia and Erwin London	
<b>Sphingolipid Metabolism and Neutral Sphingomyelinases . . . . .</b>	<b>57</b>
Michael V. Airola and Yusuf A. Hannun	
<b>Acid Sphingomyelinase . . . . .</b>	<b>77</b>
Brian Henry, Regan Ziobro, Katrin Anne Becker, Richard Kolesnick, and Erich Gulbins	
<b>Ceramide Synthases: Reexamining Longevity . . . . .</b>	<b>89</b>
Joo-Won Park and Yael Pewzner-Jung	
<b>Membrane Channels Formed by Ceramide . . . . .</b>	<b>109</b>
Marco Colombini	
<b>Genetic Disorders of Simple Sphingolipid Metabolism . . . . .</b>	<b>127</b>
Virginie Albinet, Marie-Lise Bats, Carmen Bedia, Frédérique Sabourdy, Virginie Garcia, Bruno Ségui, Nathalie Andrieu-Abadie, Thorsten Hornemann, and Thierry Levade	
<b>The Role of Ceramide-1-Phosphate in Biological Functions . . . . .</b>	<b>153</b>
L. Alexis Hoeflerlin, Dayanjan S. Wijesinghe, and Charles E. Chalfant	

## **Part II Drug Development**

<b>Functional Inhibitors of Acid Sphingomyelinase (FIASMs)</b> . . . . .	169
Johannes Kornhuber, Philipp Tripal, Erich Gulbins, and Markus Muehlbacher	
<b>Novel Drugs Targeting Sphingolipid Metabolism</b> . . . . .	187
Krishna P. Bhabak and Christoph Arenz	
<b>The Therapeutic Potential of Nanoscale Sphingolipid Technologies</b> . . . . .	197
Jody L. Hankins, Ushma A. Doshi, Jeremy K. Haakenson, Megan M. Young, Brian M. Barth, and Mark Kester	
<b>Novel Chemotherapeutic Drugs in Sphingolipid Cancer Research</b> . . . . .	211
Daniel Canals and Yusuf A. Hannun	
<b>Pharmacology of the Sphingosine-1-Phosphate Signalling System</b> . . . . .	239
Dagmar Meyer zu Heringdorf, Katja Ihlefeld, and Josef Pfeilschifter	
<b>Index</b> . . . . .	255

Sphingolipids: Basic Science and Drug Development

Gulbins, E.; Petrache, I. (Eds.)

2013, VIII, 259 p., Hardcover

ISBN: 978-3-7091-1367-7
