

Contents

1	Introduction	1
1.1	Definition of Water Shortage	1
1.2	Causes	2
1.2.1	Urbanization	2
1.2.2	Water Pollution	11
1.2.3	Climate Change	20
1.2.4	Mismanagement of Available Water Resources	27
1.3	Objective of the Present Study	28
1.3.1	To Develop a Weighted Cognitive Indicator for Representing Status of the Water Shortage	29
1.3.2	To Identify the Priorities of the Related Parameters of Water Availability	30
1.4	Brief Methodology	30
1.4.1	MCDM	31
1.4.2	Artificial Neural Network	32
1.4.3	Validation of the Indicators by Sensitivity Analysis	32
1.4.4	Application and Validation of the Indicator with Respect to Climate Change Scenarios in Three Different Study Areas	32
	References	33
2	Multi Criteria Decision Making	35
2.1	Definition	35
2.2	Steps of Decision Making	36
2.3	Working Principle	36
2.4	Types of MCDM	37
2.4.1	Compensatory Method	37
2.4.2	Outranking Methods	37
2.5	Examples	38
2.5.1	Analytical Hierarchal Process (AHP)	38
2.5.2	Fuzzy Logic Decision Making (FLDM)	42

2.6	Limitations	46
	References	46
3	Artificial Neural Network	49
3.1	Definition	49
3.2	Limitations	50
3.3	Working Principle	51
3.4	Types of ANN	51
3.5	Applications	52
3.5.1	Drought Management.	52
3.5.2	Water Supply System.	52
3.5.3	Landuse and Landcover Change	53
3.5.4	Groundwater Quality	53
	References	54
4	Climate Change and Climate Models	55
4.1	Climate Change	55
4.1.1	Causes	56
4.1.2	Impacts	57
4.2	Climate Models	61
4.2.1	Definition	61
4.2.2	Types.	61
4.2.3	Intergovernmental Panel on Climate Change	64
	References	66
5	Detail Methodology	67
5.1	MCDM	67
5.1.1	Selection of Criteria	68
5.1.2	Selection of Alternative	70
5.1.3	Aggregation Methods.	70
5.1.4	Determination of Priority Values	71
5.2	Water Limitation Index.	72
5.3	ANN	72
5.3.1	Input and Output	72
5.3.2	Topology	73
5.3.3	Training	73
5.3.4	Performance Metrics	73
5.4	Sensitivity Analysis	74
5.5	Scenario Analysis	74
5.5.1	Farakka Township	74
5.5.2	Mahi Dam	76
5.5.3	Vaigai Dam	77

- 6 Results and Discussions 79**
 - 6.1 Results from MCDM Applications 80
 - 6.2 Results from ANN Applications 80
 - 6.3 Results from the Sensitivity Analysis 84
 - 6.4 Scenario Analysis 85
 - 6.5 Discussions 92

- 7 Conclusion 95**
 - 7.1 Summary 96
 - 7.2 Drawbacks 97
 - 7.2.1 Source of Abstraction. 97
 - 7.2.2 Location Specific. 97
 - 7.2.3 Estimation Based on Extreme Condition. 97
 - 7.3 Future Scope 98

Impact of Urbanization on Water Shortage in Face of
Climatic Aberrations

Majumder, M.

2015, IX, 98 p. 16 illus., 15 illus. in color., Softcover

ISBN: 978-981-4560-72-6
