

Contents

- 1 Introduction 1**
 - 1.1 Energetic Use of the Subsurface..... 1
 - 1.2 Geotechnical Use of Rock Salt 2
 - 1.3 Gas Storage in Salt Caverns 3
 - 1.4 Scope and Structure of This Tutorial 5
- 2 Basics of Thermomechanics and Inelasticity..... 7**
 - 2.1 Governing Equations..... 7
 - 2.2 Finite Element Implementation and the Kelvin Mapping 10
 - 2.3 Integration of Inelastic Constitutive Models 13
 - 2.4 Thermo-Mechanical Coupling in OGS 16
 - 2.5 Constitutive Models..... 17
- 3 Simulation of Laboratory Tests 23**
 - 3.1 Non-isothermal Triaxial Creep Test 23
 - 3.2 Triaxial Test with Plasticity..... 35
- 4 Simulating Gas Storage in Salt Caverns..... 45**
 - 4.1 Scenario 45
 - 4.2 General Set-Up 47
 - 4.3 Isothermal Model Set-Up 53
 - 4.4 Non-isothermal Model Set-Up 56
 - 4.5 Comparison of Results 57
- 5 Closing Remarks 63**
- References..... 65**
- Index..... 69**

Computational Geotechnics

Storage of Energy Carriers

Nagel, Th.; Böttcher, N.; Görke, U.-J.; Kolditz, O.

2017, XII, 70 p. 29 illus., 26 illus. in color., Softcover

ISBN: 978-3-319-56960-4
