Re: Positive Test Results

As of this evening, nine additional team members have tested positive for COVID-19. The following are as specific of an overview of the individuals involved as we are able to provide without identifying and violating their privacy.

- Two team members tested positive that work in housekeeping services for the Villas. The individual residents impacted have since been contacted.
- One team member works in dining services, but has not been at work since the 17th and tested upon arrival to campus therefore there was no exposure to the community based on this test.
- One team member works on Bennett Place in the nursing department.
- One team member works on Lancaster in the nursing department.
- One team member works in nursing in Assisted Living.
- One team member works in nursing in Memory Support.

Please trust that we do a thorough contact tracing and personally contact anyone that has been identified as someone that was within 6 feet of the positive individual for more than 10 minutes. If you were not contacted, you have not been identified.

Active cases indicate individuals that are still within their initial 10 days of testing positive. Once the individual is more than 10 days since diagnosis, they are no longer considered contagious and therefore not active.
