GuocoLand-Hong Leong JV submit sole bid for Upper Thomson Road GLS site at \$905 psf ppr

该地块旨在为未来和现有居民提供一个交通便利、独具特色的枢纽，同时增强该地区现有零售设施，而不损害 Springleaf 的宁静、生物多样性和繁茂。

Springleaf Residence 是 Springleaf 地铁站周边三个未来改造地块中的首个住宅开发项目。作为这一新兴区域最早推出的项目，它为买家在这个充满潜力、蓬勃发展的社区中提供了难得的先发优势。

发展
SPRINGLEAF RESIDENCE

开发者：
国浩置地与丰隆控股有限公司

场地面积：
约344,700平方英尺

单位数量：
941个单元 (1-5间卧室)

地址：
汤姆森路上段第811、813、815、817、819、821号

任期：
99年租赁期限

预计竣工日期：
2029年下半年

SPRINGLEAF RESIDENCE

Springleaf Residence 独具特色，完美融合自然与便利。该开发项目拥有 941 个单元，坐落于 30 公顷的森林旁，享有中央集水区自然保护区 Springleaf 森林的壮丽景观，距离汤申-东海岸线上的 Springleaf 地铁站仅需 2 分钟步行。

该开发项目采用了自然敏感的设计理念，以保护和改善当地生态系统，同时保留了部分前实里达学院，以纪念新加坡的文化遗产。

2. Multi-Functional Green and Blue Spaces

Springleaf: Building Homes for People and Nature

The new mixed-use development will also be built to take into account its heritage and natural environment.

Buildings in the upcoming development will have small footprints to minimise habitat loss, and come with greener facades to minimise bird strikes.

There will be pedestrian-friendly developments with green public spaces too.

Finally, waterways and drainage infrastructure will integrate features from the Active, Beautiful, Clean Waters (ABC Waters) Programme to maintain hydrological integrity.

Conserving Biodiversity by Design

The upcoming buildings and developments will be on disturbed grounds and less sensitive areas. Development will also be carried out in phases to maintain ecological resilience and capitalise on new MRT infrastructure.

Developing with Sensitivity

There are plans to conserve parts of the former Seletar Institute and Nee Soon Post Office buildings, which can be integrated into future developments.

Conserving Heritage

- Safeguarded green area
- Disturbed ground area
- Tree retention site
- Heritage buildings to be integrated
- Significant Conservation Area

令人着迷且宁静的亭子设计仿佛轻松地漂浮在水面上，令人联想到睡莲叶的恬静。

该建筑与周围环境和谐融合，营造出一种身临其境的体验，使居民仿佛置身于茂密的森林树冠之中。

SPRINGLEAF RESIDENCE

绿意盎然，适合休闲放松~毗邻春叶森林，紧邻15公顷的上实里达水库公园。

住在公园附近有诸多优势：

身体健康：通过步道和开放空间促进锻炼。

心理健康：缓解压力，提升情绪。

更清洁的空气：改善空气质量，负离子

社区：促进社会联系。

财产价值：提升房屋价值。

娱乐：提供游戏、运动和休闲区域。

儿童成长：玩耍与学习的安全环境。

野生动物：领略当地的自然美景。

冷却：降低城市区域的热量。

美观：提升社区的美学价值。

2. Multi-Functional Green and Blue Spaces

2C

Springleaf: Building Homes for People and Nature

In response to findings from the baseline study, a larger green area in the Springleaf district will be safeguarded than originally planned for. This will protect its rich biodiversity and strengthen the ecological connectivity along the Khatib Nature Corridor.

The retained areas will be turned into the upcoming Nee Soon Nature Park to offer the public access to more nature-based recreation.

Introducing More Nature-Based Recreation

Significant Conservation Areas and their immediate surroundings will be kept to protect sensitive habitats. In addition, new habitats will be created and ecological connectivity between existing habitats will be enhanced through targeted tree planting.

市区重建局在 SPRINGLEAF 的方案

市区重建局计划在2021年春季叶地铁站开通后，利用该地区便利的交通，为公众提供约2,000套新住房以及更多以自然为基础的休闲机会。

市区重建局在 SPRINGLEAF 的方案

2. An Island of Green, Blue and Fun

Our network of nature parks and nature corridors are planned to be multi-functional. Beyond safeguarding our natural capital, many of these green spaces and corridors, like Chestnut Nature Park and the Rail Corridor, also allow us to enjoy outdoor activities such as running, hiking and mountain biking. We will continue to expand this network and establish more islandwide recreational opportunities for different users.

Growing the Green Network

- Nature Reserves
 - Nature Areas
 - Parks/Nature Parks
 - Marine Parks
 - Waterbodies
 - Park connectors & trails
 - Key recreational routes
 - - - Potential coastal parks/promenade
 - Future parks (selected for illustration)
- Map for illustrative purposes only

Find out more about our multi-functional green and blue spaces at [Steward: The Green and Blue](#)

2A

Expanding Our Nature-Based Recreation Network

Our green and blue spaces can be unlocked for recreational uses. It will bring us closer to nature and expand the options for leisure and play in our compact city.

通过公园连道增强绿化连通性

How do Singaporeans play?
A survey on the public's recreational preferences and aspirations found:

Top 5 recreational activities before COVID-19

Respondents did not anticipate significant changes in usage patterns for recreational facilities after the pandemic.

Top 5 factors for choosing a recreational facility

- 1 Free or low cost
- 2 Conveniently located near house or workplace
- 3 Conveniently located near transport node
- 4 Quality of facility
- 5 Availability of open spaces and lack of crowds

While accessibility is one of the most important factors, respondents were willing to travel further to large-scale national attractions.

More Recreation Closer to Homes

A well-connected network of recreational facilities in our towns ensures that we all have good access to places where we can relax and unwind daily.

By integrating a variety of recreational opportunities at one place, we can also offer residents more options while optimising land use.

1A Supporting Diverse Play in More Facilities

Everyone can play a part in designing and curating their own recreational spaces.

1B Co-creating Play Spaces with Residents

New types of green spaces bring respite to urban living and foster community bonding.

1C Bringing Nature to Our Doorsteps

Springleaf Residence 将为您提供休闲娱乐与自然美景。

1. More Recreation Closer to Homes

1C

Bringing Nature to Our Doorsteps

From waterways to parks, our living spaces offer many opportunities for residents to enjoy nature. New types of green spaces are also being developed for gardening hobbyists and to encourage bonding among residents and with nature.

To provide more opportunities for recreational activities amid nature, a hierarchy of green spaces, namely town parks, neighbourhood parks and common greens, will continue to be provided within our housing estates. More efforts will also be put into ensuring green and blue spaces are well integrated with our new housing projects.

Green Living

The upcoming community farmways in Tengah have been planned to provide residents with hobby farming and gardening opportunities. Upon completion, Tengah residents can grow their own plants or produce, and even sell their harvests at farmers' markets.

New Types of Green Spaces

Within housing estates, greenery can be introduced on different levels from the ground to middle level or rooftop sky gardens, with fitness and play facilities available close to homes. An example is the SkyVillage Dawson housing project located at the rejuvenated Dawson estate in Queenstown.

Housing in a Park

Why does Singapore need more housing?

Even if our population remains unchanged in the future, the land we need for housing may change in line with the following:

- Ageing population and specific requirements for senior-friendly housing.
- Changing household sizes, for example, increase in single-person or single-generation households would increase land needed for housing, and.
- Families' flat size preferences.

Past	Future (More singles, empty nesters households)
Population 10,000	Population 10,000

4 Persons per household 2 Persons per household

2x more housing required even for the same population numbers

Our living spaces and environment must also cater to other future trends, such as:

Legend:

- Existing housing areas
- Map for illustrative purposes only

More Homes for New Needs and Aspirations?

Providing inclusive and accessible homes for all continues to be central to Singapore's housing goals. We will need more land to build homes to cater for demographic changes and growing aspirations. In addition, we need to balance having enough homes with safeguarding sufficient land to meet unforeseen needs of the future.

由于家庭规模的变化，预计住房需求将上升。

1. More Homes for New Needs and Aspirations

Developing Sensitively for the Future

As sites with existing uses get phased out, we will prioritise these brownfield areas for redevelopment including for new housing. Upcoming opportunities include the Greater Southern Waterfront when the port moves out, and Paya Lebar Air Base when the air base moves out. When redeveloping, we will consider the heritage significance of these sites.

But the scarcity of land in Singapore means there will also be a need to build on undeveloped sites (greenfield). When there is a need to do so, we will develop sensitively in areas with significant greenery.

Springleaf 和 Tagore 已被确认为未来的新住宅区，在该地区建设新住宅时将充分考虑遗产价值和绿化环境。

Sim Lian sets new high for EC land with \$S768 psf ppr top bid for Tampines site

By Samuel Oh
samueloh@sph.com.sg

Provisional tender results for Tampines Street 95 EC plot

BIDDERS	BID PRICE (\$S)	PRICE IN \$S PSF PPR
1 Sim Lian Land and Sim Lian Development	465,000,000	768

5 Intrapid Investments and TID Residential	425,700,000	703

SOURCE: HOH, ACR, GRAPHIC, ESSIE LAM, BT

AN EXECUTIVE condominium (EC) site in Tampines Street 95 drew strong participation from developers, with the top bidder Sim Lian setting a new record for EC land with its offer of \$S768 per square foot per plot ratio (psf ppr).

The Housing and Development Board (HDB) tender that closed on Thursday (Oct 24) attracted five bids. Market watchers had expected bids to come in at between \$S650 and \$S730 psf ppr.

While the strong showing did not surprise market watchers too much, the latest result showed that developers see EC projects as a "sure thing" in an uncertain market, said Nicholas Mak, Mogul's chief research officer.

Eugene Lim, ERA Singapore's key executive officer, made a similar point: "EC sites generally translate to lower risks for developers due to the lower development cost and higher demand from buyers who are drawn in by the affordable prices, relative to those of new private home launches."

Sim Lian's \$S465 million bid at \$S768 psf ppr was 1.6 per cent higher than the next highest offer of \$S756 psf ppr (\$S457.5 million) from a consortium comprising Santarli Construction, Apex Asia, construction group Kay Lim Realty and Heeton Holdings.

This was followed by Sing Holdings, with its bid of \$S439.6 million

or \$S726 psf ppr; Chinese developer CSC Land put in an offer of \$S438.8 million or \$S703 psf ppr. The lowest bid came from Hong Leong Holdings' intrepid Investments and TID Residential, at \$S425.7 million or \$S703 psf ppr.

If Sim Lian wins this tender for the Tampines Street 95 plot (as is likely), it would count as the developer's third EC project in Tampines.

Last October, it acquired an EC site in Tampines Street 62, where it is now building the 760-unit Aurette of Tampines, slated to hit the market in the first half of 2025.

Sim Lian is also behind The Tampines Trilliant in Tampines Central, completed in 2015. Sim Lian also has completed EC projects in Choa Chu Kang and Anchorvale.

Propnex head of research and content Wong Sing Yiew described

Sim Lian's "bolster bid" to secure the site as a strategic move to defend its market position.

Mogul's Mak added: "This land bidding strategy not only reduces competition for Sim Lian in the Tampines area, but also empowers the developer to set pricing for their two EC projects without their risk of being undercut by other developers."

"As a result, it can effectively corner the EC market in Tampines for the next two to three years, enhancing its influence and profitability before the government sells another EC site in Tampines," he said.

Pricing

At the top bid of \$S768 psf ppr, analysts said that the latest EC project in Tampines could be priced at between \$S1,500 and \$S1,750 psf. Given the 15-month waiting pe-

riod from the time of land acquisition to the launch of the EC, this project will be launched only sometime in 2026, noted Justin Quek, Orange Tee & Tie's chief executive officer.

There will not be too much competing demand to divert buyers' attention away, so the gap between launches may help to ensure sufficient demand, he added.

There will not be too much competing demand to divert buyers' attention away, so the gap between launches may help to ensure sufficient demand, he added.

Sim Lian's \$S768 psf ppr bid was also 5.1 per cent higher than the winning bid at the last EC tender. A site in Jalan Loyang Besar in Pasir Ris was awarded in August to a joint venture between CNQC International the parent company of Qinglian Realty, China Communications Construction Company, and ZACD at \$S557 million or \$S729 psf ppr.

Lower financing costs with recent interest rate cuts could also have given developers more confidence, ERA's Lim suggested.

EC land rates have been steadily rising over the past few tenders. Qinglian's bid of \$S729 psf ppr for

Project at Tampines Street 95

The last EC project launched for sale in Tampines was Tenet, jointly developed by Qinglian Realty, Santarli and Heeton. Launched in December 2022, the project is almost sold out, with one unit left as of October.

The last EC project launched for sale in Tampines was Tenet, jointly developed by Qinglian Realty, Santarli and Heeton. Launched in December 2022, the project is almost sold out, with one unit left as of October.

Based on URA's monthly sales data, there were only 171 unsold new EC units on the market as at the end of September, the bulk of these units being in Bukit Batok and Yishun, she noted.

The Tampines Street 95 plot

measures 22,488.9 square metres (sq m), and has a maximum gross floor area of 56,223 sq m.

A total of some 560 housing units can be built in the project, which is near the Tampines West MRT station.

The site is also near an upcoming 23,510.7 sq m mixed-use site for up to 585 new residential units and commercial space.

That plot was awarded to the Hoi Hup-Sunway entity at \$S668.3 million or \$S1,004 psf ppr earlier this month.

The last EC project launched for sale in Tampines was Tenet, jointly developed by Qinglian Realty, Santarli and Heeton. Launched in December 2022, the project is almost sold out, with one unit left as of October.

Another EC project in Bukit Batok, City Developments' Lumina Grand, was marketed in January this year and has sold 83 per cent out of its 512 units, said Wong.

The next EC to be launched will likely be Novo Place in Tengah, which could yield 504 units.

A joint venture between Hoi Hup Realty and Sunway Developments won the site at \$S423.2 million, or \$S701 psf ppr, in February.

政府将增强我们门户的竞争力，并拓展其与外部市场的联系。

互补产业、创新区域和高等教育机构将汇聚一堂，推动产业、创新与人才发展的协作。

1. Attractive Job Nodes

Developing Bustling Ecosystems

碧山区域中心

碧山发展成小型区域中心 让民众就近办公

Woodlands Gateway is poised as a vibrant employment and manufacturing hub. Beyond providing new workplaces, the precinct provides a lush and vibrant public realm with public spaces and seamless connectivity for residents, employees, students and visitors.

Woodlands Gateway will feature a Multi-Modal Transport Hub (MMTH), as part of a larger mixed-use Business-White development. It will be:

- An integrated hub designed to facilitate seamless transfers across public transport modes. It will connect MRT and bus services with the upcoming Johor-Bahru Singapore Rapid Transit System (J-B-SG RTS) Link.
- A vibrant business hub with flexible spaces for the community commuters and workers.
- A welcoming arrival node with public spaces, creating a gateway experience for visitors to Singapore.

Woodlands Waterfront is a live-play precinct offering unique park and waterfront living with views of the Straits of Johor.

Housing by the Woods will have the green spaces and exciting play elements of Admiralty Park at residents' doorsteps, through seamless pedestrian connectivity.

Woodlands Central will continue to be the main commercial hub of the North, centred around Woodlands MRT station and bus interchange. More office and retail spaces will be developed in the future to cater to the needs of businesses and residents.

New generation mixed-use industrial spaces in Woodlands Gateway will:

- Support manufacturing firms with operations in both Singapore and Johor.
- Offer greater flexibility for industrial spaces to co-locate synergistic knowledge-intensive and service-oriented activities alongside manufacturing operations.
- Provide workers with a pleasant experience, away from goods vehicles which will use a dedicated underground vehicular network.
