support

Custom Button kit with
engraving available

DESCRIPTION

The Tunable-White Wallstation offers the ability to adjust intensity and color temperature from a single wallstation.

The scene buttons come engraved with Warm, Neutral, and Cool making them intuitive for use by occupants.

FEATURES

- High aesthetic finish with a sleek design
- Change the color temperature with a press of a single button on a wallstation
- User-programmable scenes with color temperature ranges of 2700 to 6500 K
- Dedicated raise/lower buttons enable finer adjustment for intensity and color temperature
- Can be assigned to a single or multiple zones in a space
- Available in both wired and wireless installations — both with simple installation
