

WHAT'S THE BRIGHT IDEA?

WHITE CABLE MANAGEMENT FROM LEGRAND®

The Mighty Mo® 20 offers a comprehensive line of all white cable management solutions. The importance of getting cables through the network safely and securely is paramount to the design of the accessories contained within the Mighty Mo 20 product line. Legrand's bright white solution aids in visibility to important punch down and port locations. The cable management supports the cables for proper signal integrity, future expansion, and promotes proper airflow. The clean look of white and the infinite cable routing capabilities, make the Legrand white cable management lineup an easy choice.

BENEFITS

- Complete network cabling solution
- Creates a uniform white infrastructure when used with white Mighty Mo 20 and white patch panels.
- Infinite cable routing options
- Reduces assembly time
- Maintains signal integrity and reduces loss
