Appen Limited (Appen) (ASX: APX) is pleased to provide this activity report and Appendix 4C for the quarter ended 30 June 2024. All figures are presented in US\$ and January 2024 to June 2024 are based on unaudited management accounts.

There were no material changes to Appen's principal activities during the quarter.

¹ Underlying EBITDA excludes impairment loss, earn-out adjustment, restructure costs, transaction costs, and acquisition-related and one-time share-based payment expense.

² Underlying cash EBITDA is underlying EBITDA less capitalised software development expenses plus non acquisition-related share-based payment expenses.

Commenting on the performance for the quarter, Appen's CEO & Managing Director Ryan Kolln said, "Q2 FY24 was promising as the early positive indicators of LLM-related growth have started to develop into significant opportunities."

"Generative AI development depends on vast amounts of high-quality data. The competitive edge for model builders is largely based on accessing unique and superior data. Appen's expertise, platform, and global crowd workforce are becoming crucial sources of data for many leading model builders."

"Appen's success in generative AI is resulting in a positive revenue trajectory in Q2. The growth in revenue has largely offset the loss of the Google account, with June revenue reaching \$21.1m."

"Profitability remains a key focus for Appen. Underlying cash EBITDA loss before the impact of FX has improved month-on-month as we continue to manage costs in line with the revenue opportunity. Appen continues to target reaching cash EBITDA positive on a run-rate basis in early H2 2024."
