- **Strong gold production:** of 20,541oz, including third party ounces (17,787oz, excluding third party ounces) and sales of 16,400oz at an average realised price of \$5,227/oz for \$86M of revenue¹. Production was higher than gold sold with an increase in bullion to 5,104oz (\$29.6M¹ @ \$5,777/oz) held at 30 September 2025².
- **Paulsens gold production:** increased ~68% quarter on quarter to 7,744oz as mining continues to ramp up and higher-grade stopes come online as planned.
- **New high-grade zones discovered at Paulsens:** from ongoing diamond drilling focussed on both operational readiness and growth³.
- **Lakewood gold production:** increased ~30% quarter on quarter to 10,043oz from the Myhree and Boundary open pits. Mining was impacted by rain events; however, the Boundary pit was completed and Myhree remains on track for completion in the December 2025 quarter, closing out the profit share arrangement.
- **Grade control results at Fingals:** reinforce this open pit as one of the main production centres of Kal East⁴.
- **New mines at Kal East:** Mining commenced at both the Majestic underground and Fingals open pit⁵. Once ramped up, Ore from these mines will form a baseload feed to Lakewood for years to come.
- **Group mining:** totalled ~340kt @ 2.0g/t Au for 21,786oz. Stockpiles at the end of the quarter totalled ~118,000t containing 5,661oz.
- **Big Sarah:** first ever drilling was undertaken at Big Sarah⁶, 90km from Paulsens. Encouraging results showed well mineralised structures in 10 of the initial 14 holes with follow up drilling a priority.
- **Strengthening production outlook⁷:** Production is expected to strengthen during the December 2025 quarter with 23,000-28,500oz planned, including third-party Ore, and inclusive of scheduled maintenance.
- **Antimony growth:** An extensive diamond drill program commenced at Mt Clement, which currently hosts one of Australia’s largest and highest-grade antimony deposits. Visible antimony has been intersected in the first 4 holes completed, with assays expected during the December 2025 quarter⁸.
- **Board changes:** Les Davis, after 8 years as a founding director and instrumental in the Company’s transformation from explorer to producer, announced his retirement from the Company. Separately, experienced director, Amber Rivamonte, was appointed as a non-executive director, as the Company continues to accelerate production⁹.
- **Company growth:** Black Cat was added to the S&P / ASX 300 Index¹⁰.

COYOTE GOLD OPERATION 100%

Coyote comprises 1,050km² of prospective tenements, located ~20km on the WA side of the WA/NT border and on the Tanami Highway. Coyote has substantial infrastructure including an airstrip, underground mine, 300ktpa processing facility, +180-person camp and other related infrastructure. The operation has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area.

Care and maintenance activities continued safely throughout the quarter.

Planning for drilling is underway.

MT CLEMENT ANTIMONY PROJECT 100%

Mt Clement hosts one of Australia's largest and highest-grade antimony deposits, with a current Resource of 13.2kt @ 1.7% Sb (with Au-Ag-Pb credits) and an Exploration Target of 47-103kt @ 1.2-1.9% Sb¹⁸ (*note that the potential quality and grade of the Exploration Target is conceptual in nature, there has been insufficient exploration in which to estimate a Resource, and it is uncertain if further exploration will result in the estimation of a Resource*). Activities included¹⁹:

- The first 4 diamond holes (727m) were drilled of a ~6,000m program. All 4 holes intersected visible antimony mineralisation, with 1 hole drilled outside the current Resource.
- The program has two main objectives, first, to infill and extend the current Resource which is modelled on one of six mapped outcropping mineralised veins and secondly, to obtain drill core to be used for metallurgical test work.
- Additionally, two ~800m diamond holes, have been designed to transect the full extent of the mapped antimony mineralised zone, testing down dip from known surface mineralisation by up to ~400m. These holes are co-funded by a competitive Exploration Incentive Scheme grant of \$175,000²⁰.
- A ~41 line-km magnetotelluric survey between Paulsens and Mt Clement commenced and was completed in October 2025. This program is co-funded up to \$129,000 by the Western Australia Department of Mines, Petroleum and Exploration Co-Funded Geophysics Program²¹.
- Two additional diamond rigs have been mobilised to accelerate the above drilling²².
- John Burgess has been appointed Project Manager for Mt Clement. John brings >45 years of experience across base and precious metals in operations, design, and construction. He has extensive expertise in project management, statutory approvals, design, marketing and commissioning. John will provide strong leadership and focus to Mt Clement.
