## Acknowledgement of Country

We would like to acknowledge the traditional custodians on whose land we meet today. We would like to pay respect to their Elders: past and present; and further extend that respect to all Aboriginal and Torres Strait Islanders present here today.

We celebrate the continuing contribution of their food culture, connection to, and custodianship of, this country.

# Group Summary Result

*Solid half with double-digit revenue growth*

AUDm	1H25	1H24	% Growth
Revenue	997.5	905.8	10.1%
Gross Profit	366.3	332.0	10.3%
Gross margin (%)	36.7%	36.7%	
EBITDA	177.6	159.2	11.5%
EBIT	144.8	131.0	10.5%
EBIT margin (%)	14.5%	14.5%	
NPAT	97.5	84.0	16.1%
Basic EPS (cents)	67.8	58.6	15.7%
Dividend per share (cents)	18.0	16.0	12.5%
Franked (%)	100%	100%	
ROE <sup>1</sup> (%)	14.7%	14.8%	
Net (debt) / cash (\$m)	(55.1)	(97.5)	

## Commentary

- Solid 10.1% revenue growth against backdrop of resilient consumer demand
- Overall GM% held steady, growing Gross Profit by 10.3%
- Expenses aligned to Gross profit growth yielding an on-target EBIT growth of 10.5%
- NPAT growth of 16.1% with lower interest cost arising from strong FY24 cash generation
- Net Debt of \$55.1m an improvement over pcp balance of \$97.5m due to strong underlying cash generation
- Tactical call to pull 2H25 inventory into US early, as a hedge against potential tariffs

<sup>1</sup> ROE is calculated based on NPAT for the 12 months ended 31 December 2024 (1H24: 12 months ended 31 December 2023) divided by the average of shareholders' equity in December each year and 12 months earlier.

<sup>1</sup>CC – Constant Currency

## Commentary

### Global Product Segment:

- Solid double-digit sales growth of 13.0% in constant currency, continuing the momentum seen in 2H24
- Coffee delivered strong double-digit growth, Cooking high single-digit growth and Food Preparation a small single-digit decline
- New Products (NPD) delivered with the *Oracle Jet* beating expectations; New Geographies (entered during and since Covid) continued to outperform at over 36% growth
- GM% in Global segment slightly dampened by elevated shipping costs into EMEA as well as the weaker AUD

### Distribution Segment:

- Healthy double-digit Gross Profit growth of 14.7% achieved

# Global Product Segment by Theatre

*All Theatres in double digit revenue growth in constant currency*

AUDm	GLOBAL PRODUCT SEGMENT REVENUE			
	1H25	1H24	% Growth	% Growth CC*
Americas	492.4	450.3	9.4%	10.9%

TOTAL	877.7	782.8	12.1%	13.0%

*Minor differences may arise due to rounding*

*\*CC – Constant Currency*

## Commentary

**Constant currency revenue growth of 13.0% in 1H25 with all three Theatres in double-digit growth**

**Americas:** Solid growth in US, with Canada rebasing from the failure of Hudson's Bay. Coffee continued double-digit growth, Cooking rebounded to low double-digit growth, and Food Prep ran at a slight negative (though its sellout was positive)

**APAC:** Strong growth over a weaker prior period. All categories in growth, with Coffee in strong double-digit growth. South Korea continued to move from strength to strength, and APAC distributor markets bounced back into healthy growth as predicted

**EMEA:** Strong growth led by Coffee (double digit). Key retail partners continue to grow well, alongside DTC. EMEA distributors in good growth over a weaker prior period. Overall Theatre lapping the changeover from a 1P to 3P model with Amazon (temporary headwind)

# EBIT Growth from 1H24 - 1H25

\$13.8m or 10.5%

## Commentary

- D&A growth flowing from increased investment in new products and solutions in recent periods
- Employee cost increase driven by salary increases and geographic expansion
- Third-party marketing and advertising spend increased 20.9% behind key 1H25 launches and initiatives
- Increase in “Other” spend includes forex losses and extra logistics costs associated with tactical inventory build in the US

# Financial Position at 31 December

<b>CAPITAL EMPLOYED</b>	<b>1,027.9</b>	923.3
<b>ROE%<sup>1</sup></b>	<b>14.7%</b>	14.8%

## Commentary

- Inventory increase of \$63.4m largely driven by tactical pull forward of 2H25 US inventory as a hedge against possible US tariff increases
- Aggregate of non-US inventory balances broadly flat
- Increase in PPE reflects beginning of tooling investment in alternative manufacturing locations
- Capitalised Development Costs and Software reflects growing investment in new products and solutions
- Strong free cash flow in 12 months to December '24 led improved Net Debt position vs. prior period
- Seasonal collection of peak receivables during first few weeks of 2H25 has the Group back in a net cash position of \$18.7m as of January 31st, 2025
- Debt Leverage at 0.2x EBITDA, with unused debt facilities of \$152.4m and cash of \$121.6m, providing flexibility for further expansion

<sup>1</sup> ROE is calculated as NPAT for the 12 months ended 31 December 2024 (1H24: 12 months ended 31 December 2023) divided by the average of shareholders' equity in December each year and 12 months earlier.

# How Does It Work?

Fulfilment

Origination

- Service aggregates and curates roasters and coffees
- Processes coffee orders, tracks delivery and roaster SLA performance, and clears financial flows across the order chain
- Beanz makes a retailer margin when BRG Group is the order originator and makes a processing fee when a 3<sup>rd</sup> Party originates
- Beanz never takes physical possession of the coffee (100% dropship by roaster)

# 2H25 Considerations

- Markets stabilising (consumers and retailers)
- Retailers enter 2H25 in a good inventory position (sell-in / sell-out tracking in 1H25)
- Coffee continuing to lead, ovens performing well, and other subcategories finding their footing
- NPD delivering as expected with new launches in 2H25
- Breville | Sage will move to a direct model in China
- US Trade policy still evolving
- Project moving 120v (US products) out of China in full swing, 2H25 US bound inventory pulled forward as a tactical hedge

# US/China Tariff Update

For personal use only

- Colombia, the EU, China, Mexico and Canada have been in the tariff conversation. What is lined up to be implemented (unless suspended) is that products imported from China into the US that were manufactured after Feb 1<sup>st</sup>, or that don't arrive before March 7<sup>th</sup>, will incur an incremental 10% tariff
- This is a tactical problem, which begets a tactical solution. Remember, in FY18/19, we managed through tariffs of up to 25%
- We do not expect this incremental 10% tariff (assuming implementation) to meaningfully impact our reported FY25 results because (i) 2H25 inventory pull forward; (ii) "goal post" model of running the company; and (iii) tactical adjustments we may make to individual SKUs
- There are 5 possible tactical adjustments at the SKU level: (i) manufacturer absorbs all or part of the increase; (ii) adjust the SKU's distribution in market; (iii) adjust promotion plan; (iv) adjust price; or (v) do nothing ... and any combination of levers
- Structural solution for the China-US trading pair is to move 120v production out of China. Project on track. As of July 1, 2025, ~40% of BRG Group's purchases are exposed to this trading pair. By January 1, 2026, we expect this to drop to ~10% of purchases, then further reductions in the 2H26

# FY25 Outlook

For personal use only

We expect FY25 EBIT growth to be in the range of 5% - 10% assuming:

- No significant change in economic conditions in the Group's major trading markets;
- No material supply chain interruptions; and,
- Taking into account our expected 2H25 investment levels into marketing, R&D and technology
